Putin's style of leadership has transitioned into another era but there is much still inherited from the past In the often anarchic environment of the 1990s the nascent Russian Federation experienced misunderstandings and missteps in civil military relations Under Boris Yeltsin it has been questioned whether the military obeyed orders from civilian authorities or merely gave lip service to those it served to protect while implementing its own policies and courses of action Robert Brannon sets forth the circumstances under which the military instrument of Russia's power and influence could be called upon to exert force Deriving in part from its Soviet past the author examines how Russia's military doctrine represents more than just a road map of how to fight the nation's wars it also specifies threats to national interests in this case the United States NATO and international terrorism Against this background of politics and power the military's influence may reveal as much about politics as it does the military

**Fallen Elites** Andrew Bickford, 2011-03-09 Military officers are often the first to be considered politically dangerous when a state loses its authority Overnight actions once considered courageous are deemed criminal and men once praised as heroes are redefined as villains In *Fallen Elites* Andrew Bickford examines how states make soldiers and what happens to fallen military elites when they no longer fit into the political spectrum Gaining unprecedented entry into the lives of former East German officers in unified Germany Bickford relates how these men and their families have come to terms with the shock of unification capitalism and citizenship since the fall of the Berlin Wall Often caricatured as unrepentant hard line communists former officers recount how they have struggled with their identities and much diminished roles Their disillusionment speaks to global questions about the contentious relationship between the military citizenship masculinity and state formation today Casting a critical eye on Western triumphalism they provide a new perspective on our own deep seated assumptions about soldier making both at home and abroad

**Demilitarization in the Contemporary World** Peter N. Stearns, 2013-11-16 Contemporary world history has highlighted militarization in many ways from the global Cold War and numerous regional conflicts to the general assumption that nationhood implies a significant and growing military Yet the twentieth century also offers notable examples of large scale demilitarization both imposed and voluntary *Demilitarization in the Contemporary World* fills a key gap in current historical understanding by examining demilitarization programs in Germany Japan Honduras Guatemala El Salvador and Costa Rica In nine insightful chapters this volume's contributors outline each nation's demilitarization choices and how they were made They investigate factors such as military defeat border security risks economic pressures and the development of strong peace cultures among citizenry Also at center stage is the influence of the United States which fills a paradoxical role as both an enabler of demilitarization and a leader in steadily accelerating militarization Bookended by Peter N Stearns thought provoking historical introduction and forward looking conclusion the chapters in this volume explore what true demilitarization means and how it impacts a society at all levels military and civilian political and private The examples chosen reveal that successful demilitarization must go beyond mere troop demobilization or arms reduction to generate significant political and even psychological shifts in the culture at large Exemplifying the political difficulties of demilitarization in both its failures and successes *Demilitarization in the Contemporary World* provides a possible roadmap for future policies and practices

**The Politics of German Defence and Security** Tom Dyson, 2008-03-01 The post Cold War era has witnessed a dramatic transformation in the German political consensus about the legitimacy of the use of force However in comparison with its EU and NATO partners Germany has been reticent to transform its military to meet the challenges of the contemporary security environment Until 2003 territorial defence rather than crisis management remained the armed forces core role and the Bundeswehr continues to retain conscription The book argues that strategic culture provides only a partial explanation of German military reform It demonstrates how domestic material factors were of crucial importance in shaping the pace and outcome of reform despite the impact of international structure and adaptational pressures from the EU and NATO The domestic politics of base closures ramifications for social policy financial restrictions consequent upon German unification and commitment to EMU s Stability and Growth Pact were critical in determining the outcome of reform The study also draws out the important role of policy leaders in the political management of reform as entrepreneurs brokers or veto players shifting the focus in German leadership studies away from a preoccupation with the Chancellor to the role of ministerial and administrative leadership within the core executive Finally the book contributes to our understanding of the Europeanization of the German political system arguing that policy leaders played a key role in uploading and downloading processes to and from the EU and that Defence Ministers used Atlanticization and

Europeanization in the interests of their domestic political agendas

**America's New Allies** Andrew A. Michta, 2016-11-18 America's New Allies comprehensively analyzes the strengths and liabilities that accompany the 1999 addition of three former Soviet satellite nations Poland Hungary and the Czech Republic to the ranks of the 16 member North Atlantic Treaty Organization This controversial enlargement of NATO formalizes the new geopolitical realities in Eastern Europe and forces the U S military to confront the prospect of defending these former enemies against armed attack This round of enlargement is part of a larger restructuring of NATO underway since the end of the Cold War and tested by NATO's 1999 action in Kosovo The current enlargement together with the prospect of adding other countries to NATO and the unprecedented institutional challenges highlighted during the Kosovo conflict represents a defining moment for the emerging post Cold War security architecture and in turn for the long term relationship between the United States and Europe The issues discussed in America's New Allies will be vigorously debated for years to come

**Producing Security** Stephen G. Brooks, 2011-10-16 Scholars and statesmen have debated the influence of international commerce on war and peace for thousands of years Over the centuries analysts have generally treated the questions Does international commerce influence security and Do trade flows influence security as

synonymous In Producing Security Stephen Brooks maintains that such an overarching focus on the security implications of trade once made sense but no longer does Trade is no longer the primary means of organizing international economic transactions rather where and how multinational corporations MNCs organize their international production activities is now the key integrating force of global commerce MNC strategies have changed in a variety of fundamental ways over the past three decades Brooks argues resulting in an increased geographic dispersion of production across borders The author shows that the globalization of production has led to a series of shifts in the global security environment It has a differential effect on security relations in part because it does not encompass all countries and industries to the same extent The book's findings indicate that the geographic dispersion of MNC production acts as a significant force for peace among the great powers The author concludes that there is no basis for optimism that the globalization of production will promote peace elsewhere in the world Indeed he finds that it has a net negative influence on security relations among developing countries

**Ruptures in the Everyday** Andrew Stuart Bergerson, Leonard Schmieding, TG26, 2017-07-01 During the twentieth century Germans experienced a long series of major and often violent disruptions in their everyday lives Such chronic instability and precipitous change made it difficult for them to make sense of their lives as coherent stories and for scholars to reconstruct them in retrospect Ruptures in the Everyday brings together an international team of twenty six researchers from across German studies to craft such a narrative This collectively authored work of integrative scholarship investigates Alltag through the lens of fragmentary anecdotes from everyday life in modern Germany Across ten intellectually adventurous chapters this book explores the self society families objects institutions policies violence and authority in modern Germany neither from a top down nor bottom up perspective but focused squarely on everyday dynamics at work on the ground
