**Researching School Experience** Martyn Hammersley, 1999-09-09 There is a tendency in much educational thinking to view pupils in passive terms as the material on which schools operate This damaging view is

challenged here Significant recent research shows the effects of changing educational conditions on the experience of teaching and learning in schools By redressing the balance and acknowledging the affective side of pupils and their learning this book shows that improved understanding leads to improved teaching Contributions from Stephen Ball Martyn Descombe Ann Filer Andy Hargreaves Bob Jeffrey Geoff Troman Andrew Pollard and Peter Woods *Theory and Method* Mel Churton, Anne Brown, 2017-09-16 Knowledge of theory is essential to study but it often seems quite abstract and distant from the real world Research methods on the other hand are strategies that allow us to gather evidence from the people around us to help explain social phenomena This book explores these two key areas and shows new sociologists how they can understand appreciate and use both theory and method Written with student needs firmly in mind this new edition begins by exploring the most important theories and debates that are essential to understanding sociology It then goes on to examine the concepts techniques and trends in research methods and explains how these link back to theory Whilst continuing to cover traditional ideas debates and methodologies the book has also been updated to address recent thinking and research techniques It explains how sociologists have responded to contemporary developments in sociology including postmodernists views on science and introduces contemporary research techniques such as cyberethnography Exploring the basics of quantitative and qualitative methods and explaining how to choose the right method the book combines practical and theoretical coverage throughout Part of the Skills Based Sociology series Theory and Method continues to encourage an active approach to learning Each chapter uses a variety of tasks activities and practice questions that promote critical thinking and develop interpretation analysis and evaluation skills It is an invaluable guide for those learning about theory and research for the first time *Qualities of Education in a Globalised World* Diane Brook Napier, 2014-09-11 In a growing revisionist tradition comparative educational scholars challenge conventional assumptions about quality education as a singular undertaking dominated by standardised assessments and globalisation influences The contributors to this volume illustrate the complexities and global dimensions of educational quality that emerged in their research Several chapters critique educational reforms employing assessments aligned to global standards and large scale assessments revealing how considerations of contextual factors internal needs and local traditions are essential for developing a quality curriculum or for overhauling a national education system Most chapters interrogate the uses and misuses of standardised assessment results The contributors reveal the importance of asking critical questions about quality education how to access it and for what purposes what contextual and cultural factors are important what implementation issues and local level realities must be considered for true understanding of standardized assessment results what content skills and values are necessary and desirable ingredients what roles teachers and administrators play and what benefits accrue in terms of outcomes for employment and labor market needs or for achieving autonomy and stakeholder participation Critiques of narrow interpretations of standardised assessment data contrast with research based evidence that participation in large scale

assessments such as PISA TIMSS and PIRLS can indeed be beneficial to identify needed reform refinements and implementation shortcomings Specific country cases include Brazil Canada the United States Spain Portugal Ukraine Kyrgyzstan and the Philippines Other chapters provide insights on quality education issues worldwide The volume offers readers a panorama of views on the diversity of paths to quality education

*Cross-Curricular Primary Practice* Dr Rosemary Webb, Rosemary Webb, 2002-11-01 This text discusses the theory and practice of several important areas of cross curricular work in primary schools It uses the National Curriculum Council's categories of themes skills and dimensions to examine what is involved in such practice and to consider its current status in schools and future possibilities Providing practical suggestions for more well established areas such as environmental studies it also examines topical but under represented themes skills and dimensions such as media education pupil self assessment and discipline The authors argue that cross curricular practice both contributes to National Curriculum requirements and gives these requirements overall coherence Cross curricular practice also enables children to develop the knowledge skills and concepts that are of value in coping with and enjoying the complexities of the 21st century Suggestions are provided on how to provide leadership and stimulate staff interest in these areas by reviewing existing policies teaching and resources

**Bilingual Learners and the Mainstream Curriculum** Jean Bleach, 1990 The general purpose of the book is to further establish and maintain the place of developing bilingual students as normal learners within the mainstream of schools It argues this as a central requirement for achieving a fair curriculum in a multicultural society
