Studies in Sociology, Economics, Politics and History, 1918 Genomic Citizenship Ian McGonigle, 2021-08-24 An anthropological study based on ethnographic work in Israel and Qatar explores the relationship between science particularly genetics and national identity Based on ethnographic work in Israel and Qatar two small Middle Eastern ethnations with significant biomedical resources Genomic Citizenship explores the relationship between science and identity Ian McGonigle originally trained as a biochemist draws on anthropological theory STS intellectual history critical theory Middle Eastern studies cultural studies and critical legal studies He connects biomedical research on ethnic populations to the political economic legal and historical context of the state to global trends in genetic medicine and to the politics of identity in the context of global biomedical research Genomic Citizenship is more an anthropology of scientific objects than an anthropology of scientists or an ethnography of the laboratory McGonigle bases his untraditional project on traditional anthropological methods including participant observation Some of the most persuasive data in the book are from public records legal and historical sources published scientific papers institutional reports websites and brochures McGonigle discusses biological understandings of Jewishness especially in relation to the intellectual history of Zionism and Jewish political thought and considers the

possibility of a novel application of genetics in assigning Israeli citizenship He also describes developments in genetic medicine in Qatar and analyzes the Qatari Biobank in the context of Qatari nationalism and state building projects Considering possible consequences of findings on the diverse origins of the Qatari population for tribal identities he argues that the nation cannot be defined as either a purely natural or biological entity Rather it is reified reinscribed and refracted through genomic research and discourse
