Research Issues In Public Librarianship Trends For The Future:

Research Issues in Public Librarianship Joy M. Greiner, 1994-05-25 Public librarianship is a constantly changing field and the direction of its development depends on theoretical and applied research This book examines many of the research needs in public librarianship and discusses appropriate strategies to meet those needs The chapters written by active researchers in the public library field reflect a variety of issues and opinions Included are chapters on the evaluation of collections community awareness of the library as an information source models for library siting and communication between librarians and public library educators Recommendations for further investigations provided by the researchers identify possibilities for increasing knowledge in this field and a bibliographic essay organizes and summarizes much of the work discussed in the text

Planning for a New Generation of Public Library Buildings Gerard B. McCabe, 2000-01-30 The public library director needs information that helps in understanding what is involved in planning for a public library building project This applies whether the subject is a free standing independent building a branch library a joint use facility with a museum a senior academic library a community or junior college library or a school library Reading this book will not turn a reader into a qualified specialist on library buildings but it will help librarians and others learn what should be known about a project so that they may function effectively as part of the planning team The concept of modern libraries is moving toward interactive connections with information sources far beyond the immediate community For the contemporary public library this means connection to a network with several terminals constantly online to the Internet New library buildings must be constructed with these and other needs in mind The public library director needs information that helps in understanding what is involved in planning for a public library building project This applies whether the subject is a free standing independent building a branch library a joint use facility with a museum a senior academic library a community or junior college library or a school library This book will help librarians and others learn what should be known about a project so that they may function effectively as part of the planning team

Readers' Advisory Service in North American Public Libraries, 1870-2005 Juris Dilevko, Candice F.C. Magowan, 2007-02-13 Beginning in the early 1980s readers advisory services were a widely discussed topic in North American public libraries By 2005 almost every public library in the United States and Canada offered some form of readers advisory service The services offered have changed significantly in ways perhaps disadvantageous to adult North American library patrons This book provides a critical history of readers advisory philosophy and offers a new perspective on the evolution of the service The book analyzes the debate that shaped readers advisory and discusses how the service has assumed its present form The study follows readers advisory through its three prominent stages of development beginning with the period 1870 to 1916 when the service was still a subject of much crucial debate about its meaning and purpose During the second phase 1917 to 1962 readers advisory systematically committed itself to meaningful adult education through serious and purposeful reading The book argues however that during the most

recent phase of readers advisory from 1963 until the present contemporary public libraries have turned their backs on the rich heritage of readers advisory services by valorizing the reading of entertainment oriented and commodified genre titles and bestsellers Historical analysis case studies and statistical charts augment the book s central argument

Youth Services and Public Libraries Susan Higgins, 2007-04-30 Youth Services and Public Libraries offers strategies to match the information needs and wants of children and young adults in public libraries and translates these into knowledge for providing relevant services The latest trends in service provision are covered within the context of appropriate management programming and marketing of services The book is grounded in the principles of public library services to children and young adults everywhere Links practical application of library programming to theoretical foundations of service Illustrates concepts with reference to the developmental needs of children and young adults Describes how to implement library policies which recommend design direct supervise and evaluate active youth services programs

Libraries to the People Robert S. Freeman, David M. Hovde, 2003-02-10 With today s technology anyone anywhere can access public library materials without leaving home or office one simply logs on to the library s website to be exposed to a wealth of information But one of the concerns that arises is the lack of access for groups isolated by socioeconomic geographical or cultural factors This problem is not a new one For almost two centuries public libraries and other organizations have been trying to bring library services to isolated populations This book is a collection of fourteen essays examining the contributions of librarians educators and organizations in the United States who have endeavored to bring library services to groups that previously did not have access There are three sections Benevolent and Commercial Organizations Government Supported Programs and Innovative Outreach Services The essays discuss reading materials for two centuries of rural Louisianians shipboard libraries for the American Navy and merchant Marine library outreach to prisoners the Indiana Township Library Program tribal libraries in the lower forty eight states open air libraries electronic outreach and the use of radio in promoting the Municipal Reference Library of the City of New York to name just a few of the essay topics

Library Evaluation Danny P. Wallace, Connie J. Van Fleet, 2001-01-15 Bringing together library and information science faculty and practicing library managers this work combines some of the most exciting concepts and methodologies of library evaluation with the practical experiences of those working in the field A variety of approaches e g focus groups TQM are thoroughly described then illustrated with actual case studies These cases can serve as inspiration and models to library managers and other individuals responsible for evaluation as well as to those who aspire to library management positions

Scholarly Book Reviewing in the Social Sciences and Humanities Ylva Lindholm-Romantschuk, 1998-01-26 This study explores the flow of information within and among academic disciplines in the social sciences and humanities through analyses of the patterns of scholarly book reviewing An elite sample of scholarly monographs published by university presses between 1971 and 1990 was used Beginning with Derek de Solla Price the measurement of communication within the disciplines of science has been ongoing

In the present book that field of inquiry is summarized and provides a basis for examining the flow of information in the social sciences and humanities

Current Practices and Future Plans of Public Library Webmasters Primary Research Group, 2005 The new report from Primary Research Group is based on interviews with webmasters from the San Jose Public Library the Salt Lake City Public Library the Alexandria Library the Los Angeles Public Library the Charlotte Mecklenburg County Public Library the Houston Public Library the Carnegie Library of Pittsburgh the Colorado Virtual Library and the Boston Public Library A free sample chapter is available for download A few of the report's conclusions are summarized below

CONTENT MANAGEMENT Libraries take widely varying approaches to the issue of how should control the website and who should be empowered to add content to the site Some libraries prefer to centralize access in the hands of just a few librarians who act as gatekeepers to the website Others prefer to empower as many librarians as possible to contribute to the site and to oversee their own contributions to the site To achieve this some libraries have purchased off the shelf content management systems while others have developed in house content management systems that allow non technical librarians to function independent of the need for technical help

THE IMPACT OF CASCADING STYLE SHEETS CSS Cascading style sheet that allow librarians to edit entire sites or subsets of site with one click of the mouse have become popular ways to introduce some uniformity and lower the labor demand of editing public library websites Cascading style sheets are important because librarians are finding more and more reasons to add more and more content to their sites Public library websites have often quickly become unwieldy monsters that voraciously eat up librarian time Correcting and editing these beasts by hand is dangerous and cascading style sheets allow proper measured feeding without loss of limb

MOST POPULAR PAGES Some of the most popular pages on the public library websites surveyed were the events calendar basic library info page database gateways and children's and teen pages

STAFFING Relative to the importance of the library website to the overall success of the library the size of most library web staffs when such staffs exist is quite small Usually one to three individuals run the website and they often have other responsibilities The strategy that most have pursued to overcome their small staffs is to devolve responsibility for content to subject specialist librarians and to empower them to be able to edit the portions of the website for which they are responsible

UNIQUE CONTENT Most librarians interviewed stressed the need to develop unique content that would draw traffic to the website Among the type of content mentioned were interactive storytelling and educational games reading lists and contests book reviews by librarians posted online subject guides and events calendars

CHILDREN'S TEEN SERVICES One of the most vibrant areas for website development has been services for children and teens This age group grew up with access to the world wide web and it is truly the only generation for which web use and communication is as natural as turning on the television for most Americans Libraries have responded with books clubs personalized spaces interactive stories and games and other features aimed at this audience Nonetheless many libraries have just scraped the surface of their potential in this area We like what the Charlotte

Mecklenburg County Public Library has done in this area developing unique content focused marketing and web teams to create a unique site for Charlotte area children SPECIAL COLLECTIONS Many libraries have plans to digitize their special collections or at the very least to digitize finding aids for those collections and increase access to them through the library website We expect that this will soon become a major area of public library investment and a challenge for website administrators who must devise access schemes to digitized resources

Knowledge into Action Danny P. Wallace, Connie J. Van Fleet, 2012-06-12 The only book currently available that comprehensively integrates research and evaluation for evidence based library and information science practice Numerous books cover research and evaluation in general but not within the context of library and information science Many others cover the field of library and information science overall but with little focus on research Knowledge into Action Research and Evaluation in Library and Information Science offers in a single volume an expert introduction to these two distinct yet deeply interrelated phases of information gathering as they are practiced in the information sciences Knowledge into Action takes readers through the core principles working processes and practical tools for conducting and evaluating research in library and information science enhancing the presentation with examples informational graphics study questions and exercises directly relevant to this field It is a welcomed resource for students and scholars who want to use appropriate techniques for gathering and assessing research as well as information professionals looking to improve services at their libraries or information centers The book is also designed to educate practitioners as consumers of the research and evaluation literature and as active participants in professional conferences meetings and workshops

Brief Tests of Collection Strength Howard D. White, 1995-09-26 For purposes of accreditation resource sharing and institutional mission librarians need to assess the strengths of their collections in particular subject areas This book describes and illustrates a brief test for determining a library's collection strength Though such tests are most often employed in academic libraries the methodology outlined by the author should be useful to all types of libraries in assessing the strength of their holdings In a time of increasing material and limited resources libraries need to be particularly judicious in deciding which works to acquire Oftentimes a library seeks to develop strong holdings in one or more subject areas Such an approach is especially useful for libraries that share their resources with other institutions To plan their acquisitions carefully and to be of greatest use to other consortia members a library needs to gauge the strength of its holdings accurately This volume describes and illustrates a relatively brief test to assign libraries a score for existing collection strength in a subject area Drawing upon expert human judgment and holdings data available from OCLC the test can assist librarians in setting and verifying collection levels on the RLG or WLN Conspectus scales Collection strength is often verified in a labor intensive fashion The brief test presented by the author is an economical alternative to the more typical labor intensive approach to collection analysis

Reflecting on the Future of Academic and Public Libraries Peter Hernon, Joseph R. Matthews, 2013-01-08 The collection of knowledge and practical wisdom in this book will help

academic and public libraries find ways to honor their missions while planning for the broader institutional changes already underway

Librarianship and Information Work Worldwide, 1995 Maurice Bernard Line, Graham Mackenzie, John Feather, 1995

The Responsive Public Library Collection Sharon L. Baker, 1993 Public libraries can operate more efficiently serve their communities better attract more users and supporters and raise more funding if they apply basic marketing principles and techniques to their operations This book shows how With a vision of the library as a healthy and integral part of the community the book offers effective strategies that apply marketing principles to such functions as library services and collection development

Revolutionizing the Development of Library and Information Professionals: Planning for the Future Hines, Samantha Schmehl, 2013-10-31 As more associations struggle with limited professional development funding the opportunities for library and information experts to advance their skills are being examined in a more effective and cost efficient manner

Revolutionizing the Development of Library and Information Professionals Planning for the Future examines the future of library professional development by investigating the aspects that make these development events worthwhile This book is essential for library association personnel educational institutions and management personnel in large library systems to aid in determining future trends in professional development opportunities for their staff

Research 2.0 and the Future of Information Literacy Tibor Koltay, Sonja Spiraneć, Laszlo Z

Karvalics, 2016-01-22 Research 2.0 and the Future of Information Literacy examines possible congruencies between information literacy and Research 2.0 because the work of today's researcher mobilizes a number of literacies. From among the various types of relevant literacies at least three types of literacies can be mentioned in this relation: information literacy, scientific literacy, and academic literacy. This book addresses these literacies in the light of the changing research landscape. Broad contexts of the researcher's abilities as adaptive and innovative thinking, problem solving skills, self management, and design mindset are also examined. Computational thinking and the computational paradigm in a number of fields of research are taken into consideration as well. Researchers differ to non researchers when populating social media which means that these two different groups require different literacies. The relationship between information literacy and information is approached in a new way. Among the multitude of issues we introduce a new interface between information literacy and Research 2.0. It encompasses the issues of research data management and data literacy which represent also a challenge both for the academic library and for the communities of researchers. Similarly the questions of new metrics of scientific output are addressed in the book. Summarizes the most important and up to date approaches towards Research 2.0 including researchers skills and abilities, the data intensive paradigm of scientific research, open science, not forgetting about factors that inhibit a wider uptake of Research 2.0. Discusses the nature of information literacy in the light of its definitions, declarations and related frameworks and by outlining the new literacies context, reading and writing the cultural context and the turns of library and information science. Numerous literacies other than information literacy, its relationship to information overload and personal information management are also subject of the book. Theoretical and practical perspectives are given to enable the understanding of the transformations of information literacy and its relationship to Research 2.0.
