

EVIDENCE REVIEW

Effective drug and alcohol education

This briefing was produced to accompany the **PSHE Association teacher guidance** and suite of drug and alcohol education lessons for key stages 1-4, developed for Public Health England. It draws together key research into effective education about alcohol and other drugs within a wider PSHE education curriculum. It is intended for PSHE leads and teachers who are beginning to teach about substances and their associated risks to young people, or who are reviewing their existing PSHE education curriculum content.

Research Developments In Drug And Alcohol Use Ed:

Recent Developments in Alcoholism Marc Galanter, 2013-11-22 From the President of the Research Society on Alcoholism In recent years increasingly convincing evidence in support of a biobehavioral conceptual model of the etiology of alcoholism has emerged In this model the disorder is perceived as arising from the interaction of genetic/biological vulnerability and psychosocial risk Drinking or alcohol seeking is a metric trait Alcoholism which is a state of abnormally intense alcohol seeking behavior that over time leads to the alcohol dependence syndrome lies at the extreme high end of this quantitative measure Metric traits are influenced by multiple genes the extent of genetic loading of biological risk for alcoholism would be different in different individuals Added to this kind of variability is the wide range of options for exposure to the psychosocial risk factors of heavy drinking provided by modern society Further environmental provocation also changes when life events change It is not surprising therefore from the combination of the kinds of genetic and environmental variability described above that there is a wide array of patterns of expression of the disorder alcoholism referred to by some as alcoholisms In the search for understanding of underlying mechanisms and rational bases for potential therapy it is important to focus our attention on the final common pathway of this disorder alcohol seeking behavior This series ever since its beginning in 1983 has been sensitive to the complexities of the interaction between biological and psychosocial risk factors in alcoholism

Alcohol Alert , 2003-04 *Drug Abuse* Seymour Eiseman, Joseph A Wingard, George J Huba, 2019-07-09 Departing from largely ineffective medically oriented approaches to the problems of drug abuse education the contributors to this volume present relevant empirical findings and theoretical models within a comprehensive psychosocial framework which draws upon recent advances in understanding the physiological psychological interpersonal and social forces that are the causes of youthful drug addiction **Handbook of Clinical Geropsychology** Michel Hersen, Vincent B. Van Hasselt, 2013-11-22 Over the last two decades the number of persons over 65 has increased by 65% Handbook of Clinical Geropsychology focuses attention on how the contributions of clinical psychology address the problems faced by this enormous population In the first part chapters cover a historical perspective clinical geropsychology and U S federal policy psychodynamic issues and other key topics Part II details assessment and treatment for a wide range of disorders affecting the elderly Part III considers such special issues as family caregiving minority issues physical activity and elder abuse and neglect **Research Advances in Alcohol and Drug Problems** H.M. Annis, H.D. Cappell, F.B. Glaser, L.T. Kozlowski, M.S. Goodstadt, 1990-01-31 This is the tenth volume in the Research Advances series and the seventh published by Plenum Press Volume 10 is another omnibus volume providing specialized and advanced reviews in a number of areas related to the use of alcohol illicit drugs and tobacco We include also a brief history of the Center for Alcohol Studies that gives Mark Keller's unique perspective on this noted institution Two of the chapters are decidedly longer than the others very long chapters have appeared occasionally in

the past and we think that it is one of the strengths of the series that we are able to accommodate such reviews. Again the editorial board has changed. After several years of service Reginald G. Smart has stepped down. New to the board are Helen M. Annis, Michael S. Goodstadt, Lynn T. Kozlowski, and Evelyn R. Vingilis. This is likely to be the sole volume for which Goodstadt is on the board since before completion of this volume he moved from the Addiction Research Foundation to the Center for Alcohol Studies, Rutgers University.

The Pharmacology of Alcohol Abuse Henry R. Kranzler, 2012-12-06 In recent years alcohol abuse has received increased international attention. Such attention is justified by the enormous negative impact that this disorder has on health as well as on economic and social well-being. Governmental and other sources of research support have promoted substantial investigation into the negative consequences of alcohol, examining both animal models and human subjects. Consequently, there has been a virtual explosion of preclinical and clinical data, much of it focused on alcohol's pharmacologic effects. However, there have been few efforts to integrate this wealth of new information into a single manageable volume. This volume provides an up-to-date, in-depth treatment of the pharmacology of alcohol, particularly as it relates to alcohol abuse. The overriding theme of the book is the interplay between the preclinical and clinical domains. Increasingly, these areas of investigation have served to inform one another, a trend that can be expected to grow with time. The topics covered include the effects of alcohol on biological systems and the impact of medications on those effects. In addition, recent insights obtained from molecular biological investigations are discussed in terms of their relevance for understanding the effects of alcohol at the cellular level and the implications of these for the development of medications. Consideration is also given to important methodological issues that influence the evaluation of medications in the context of clinical trials.

Subject Guide to Books in Print, 1997 **Drugs, Alcohol, and Social Problems** James D. Orcutt, David R. Rudy, 2003-09-03 *Drugs, Alcohol, and Social Problems* a collection edited by James D. Orcutt and David R. Rudy includes 14 clearly written articles that exemplify the best of sociological scholarship on drug and alcohol problems. The readings strike a balance between constructionist, epidemiological, and ethnographic approaches to the study of drinking, drug use, and related problems such as domestic violence, crime, and the spread of HIV/AIDS. A general introduction and five section introductions, written especially for this volume, highlight basic theoretical questions and analytical themes that run through the articles. In contrast to many books on problems of substance use, *Drugs, Alcohol, and Social Problems* devotes equal attention to drug and alcohol-related issues. The volume is organized around important theoretical and research approaches to the sociology of social problems, making it suitable for adoption as a supplement in undergraduate courses on social problems as well as for more specialized undergraduate and graduate courses in the area of drug and alcohol studies.
