Bibliographical Survey of Contemporary Sources for the Economic and Social History of the War Carnegie Endowment for International Peace. Division of Economics and History,Mildred Emily Bulkley,1922

The German Historical School and European Economic Thought José Luís Cardoso,Michalis Psalidopoulos,2015-10-30 The financial crisis of 2008 has revived interest in economic scholarship from a historical perspective The most in depth studies of the relationship between economics and history can be found in the work of the so called German Historical School GHS The

influence of the GHS in the USA and Britain has been well documented but far less has been written on the rest of Europe. This volume studies the interconnection between economic thought and economic policy from the mid nineteenth century to the interwar period. It examines how the School's ideas spread and was interpreted in different European countries between 1850 and 1930 analysing its legacies in these countries. In doing so the book is able to trace the interconnection between economic thought and economic policy adding new voices to the debate on the diffusion of ideas and flow of knowledge. This book identifies issues related to topics such as nationalism and cosmopolitanism in the history of ideas and clarifies themes in policy making that are still currently debated. These include monetary policy and benefits of free trade for all parties involved in international exchanges. This book will be of a great interest to those who study history of economic thought economic theory and political economy.

Alan S. Milward and Contemporary European History Fernando Guirao, Frances M.B. Lynch, 2015-10-14

Alan S. Milward was a renowned historian of contemporary Europe. In addition to his books as well as articles and chapters in edited books he also wrote nearly 250 book reviews and review articles some in French and German which were published in journals world wide. Taken together they reveal a remarkable degree of theoretical consistency in his approach to understanding the history of Europe since the French Revolution. This book brings together these previously unexamined pieces of historical analysis in order to trace and shed light on key intellectual debates taking place in the second half of the 20th century. Many of these discussions continue to influence us today such as the role of Germany in Europe the economic social and political foundations of European integration the European rescue of the nation state the reasons for launching the single currency the conditions for retaining the allegiance of European citizens to the notions of nation and supra nation and ultimately the issue of democratic governance in a global environment. In bringing together these reviews and review articles the book provides an introduction to the main scholarly achievements of Milward in his own words. Fernando Guirao and Frances M. B. Lynch provide an introduction to the volume which both guides the reader through many of the academic debates embedded within the text while underlining their contemporary relevance. By introducing and bringing together this hitherto overlooked treasure trove of historical analysis this book maps a close itinerary of some of the most salient intellectual debates of the second half of the 20th century and beyond. This unique volume will be of great interest to scholars of economic history European history and historiography.
