Research In Marketing Vol 6 Research In Marketing:

Relationship Theory and Business Markets Michael Kleinaltenkamp, Michael Ehret, 2006 **Internal Marketing** Tatsuya Kimura, 2017-04-21 Establishing developing or promoting a brand or product in a market stems from aligning of divisions within an organization with the perspective of providing value to customers an idea which is known as internal marketing Unlike external marketing internal marketing ensures that organizational divisions are aligned in the marketing strategies so that the resultant external marketing is effective and not impeded by internal shortcomings This book provides a comprehensive review of internal marketing research and illustrates the role of internal marketing in enhancing the capabilities of a company s internal resources Putting forward a guiding principle for business practices by considering such questions from a multilateral perspective this book is a must read for practitioners and academics alike **Building Models for Marketing Decisions** Peter S.H. Lee, Dick R. Wittink, Michel Wedel, Philippe A. Naert, 2013-06-29 This book is about marketing models and the process of model building Our primary focus is on models that can be used by managers to support marketing decisions It has long been known that simple models usually outperform judgments in predicting outcomes in a wide variety of contexts For example models of judgments tend to provide better forecasts of the outcomes than the judgments themselves because the model eliminates the noise in judgments And since judgments never fully reflect the complexities of the many forces that influence outcomes it is easy to see why models of actual outcomes should be very attractive to marketing decision makers Thus appropriately constructed models can provide insights about structural relations between marketing variables Since models explicate the relations both the process of model building and the model that ultimately results can improve the quality of marketing decisions Managers often use rules of thumb for decisions For example a brand manager will have defined a specific set of alternative brands as the competitive set within a product category Usually this set is based on perceived similarities in brand characteristics advertising messages etc If a new marketing initiative occurs for one of the other brands the brand manager will have a strong inclination to react The reaction is partly based on the manager s desire to maintain some competitive parity in the marketing variables **Principles of Marketing** Ayantunji Gbadamosi, Ian Bathgate, Sonny Nwankwo, 2013-11-19 This user friendly textbook offers students an overview of each aspect of the marketing process explored uniquely from the value perspective Delivering value to customers is an integral part of contemporary marketing For a firm to deliver value it must consider its total market offering including the reputation of the organization staff representation product benefits and technological characteristics and benchmark this against competitors market offerings and prices Principles of Marketing takes this thoroughly into account and ensures that students develop a strong understanding of these essential values The book also looks in detail at the impact of social media upon marketing practices and customer relationships and the dramatic impact that new technologies have had on the marketing environment Written by a team of experienced instructors Principles of Marketing is an ideal companion for all

Managing Market Relationships Adam Lindgreen, 2017-11-28 Sole reliance on traditional marketing practices can cost

a lot of money for little gain That's why establishing developing and maintaining market relationships with customers and other stakeholders is often hailed as an effective means to achieve a sustained competitive market advantage Despite this the benefits of relationship marketing remain uncertain and efforts in this arena often fail Managing Market Relationships explains what relationship marketing entails how it is implemented how it evolves and how it is controlled Building on research with colleagues Adam Lindgreen argues that companies must add value either through their products and services or through their relationships networks and interactions Readers are introduced to the buyer seller market exchange model that recognizes the importance of relationship marketing but argues that it should co exist with traditional marketing The book offers guidance on how to develop involve and evaluate management and employees in relationship building market activities To avoid the one size fits all approach to relationships that so often leads to the premature death of managers efforts a relationship management assessment tool is provided that helps companies to question identify and prioritize critical aspects of relationship marketing This timely and comprehensively researched book is essential reading for researchers those involved in the professional training and development of marketers and higher level students and practitioners who will want to learn more about relationship marketing relevant research methodologies and how to use sound managerial models and tools *Review of Marketing 1981* Ben M. Robin Roslender, Richard M.S. Wilson, 2013-09-13 When marketing managers and financial managers join forces within any business the result can often be poor communication on financial criteria and goals The risk of this situation occurring is inevitably present when those with different professional backgrounds and roles are working in accordance with their own norms In his seminal 1956 paper on general systems theory the economist Kenneth Boulding referred to the phenomenon of specialised ears and generalised deafness which can be seen to exist when marketing managers are financially illiterate or when financial managers lack the necessary insights to design implement and operate accounting systems which are useful to marketing managers in carrying out their roles It is increasingly difficult to attach credence to the idea of marketing managers who lack financial skills or financial managers who fail to relate to the context in which marketing managers operate Understanding the marketing accounting interface is therefore important in generating emergent properties from the interaction of marketers and accountants whereby the whole is greater than the sum of the parts The chapters in this volume seek to address this challenge This book was originally published as a special issue of the Journal of Marketing Management **Strategic Marketing Management (RLE Marketing)** Gordon Foxall, 2014-09-15 This book considers

marketing management within the overall corporate system of business policy making strategic planning and the

implementation and control of effective plans The information requirements of marketing management are highlighted and the marketing information system concept is developed within the framework of managerial information systems In the chapters which deal with the elements of the marketing mix the interrelated nature of these variables is emphasized The book illustrates how the successful marketing manager can master each weapon in the marketing armoury and how s he can integrate those weapons to achieve the right mix for each product The accent on integrated marketing continues in the final section where differentiated marketing is presented as an integrative framework and where the systematic control of marketing operations is described This book is for students who will one day be managers its emphasis is therefore on what is possible in marketing management and the most effective means by which marketing objectives can be attained

Corporate Innovation (RLE Marketing) Gordon Foxall,2014-09-15 This volume is concerned with understanding the factors that determine innovation and its contribution to corporate achievement It considers the whole range of innovation consumer and industrial and both final and intermediate buying behaviour Although the tenor of the book is towards understanding and evaluation its ultimate concerns are with the practicalities of marketing and corporate innovation
