British Royal and State Funerals Matthias Range, 2016 The first in depth study of the ceremonial and music performed at British royal and state funerals over the past 400 years British royal and state funerals are among the most elaborate and solemn occasions in European history This book is the first in depth study of the ceremonial and the music performed at these events over the past 400 years from the funeral of Elizabeth I in 1603 Covering funerals of both royalty and non royalty including Nelson Wellington and Churchill this study goes up to the funerals of Queen Elizabeth The Queen Mother in 2002 and the ceremonial funeral of Baroness Thatcher in 2013 While some of these funerals have received a good deal of attention especially the 1997 funeral of Diana Princess of Wales these extraordinary events have largely not been discussed in their longer historical context The book examines the liturgical changes in the Anglican funeral rite since the Reformation and also the change from the so called public to private funerals It includes many new findings on the development of the ceremonial and its intricate peculiarities as well as new insights into the music and its performance British Royal and State Funerals shows that despite a strong emphasis on continuity in the choice of music the ceremonial itself has shown an astonishing flexibility over the last four centuries Overall the book also contributes to the debate on the monarchy's changing public image over time by paying particular attention to topics such as tradition and propaganda Drawing on substantial research in principal libraries and archives including those of Westminster Abbey the College of Arms Lambeth Palace and the British Library this book is an exhaustive resource for musicologists musicians and historians alike providing an unprecedented insight into this most sombre of royal and state occasions MATTHIAS RANGE is author of Music and Ceremonial at British Coronations 2012 He is a post doctoral researcher for the Digital Image Archive of Medieval Music and its partner AHRC funded Tudor Partbooks project at the Faculty of Music University of Oxford

The Media and Modernity John B. Thompson,1995 What role have communication media played in the formation of modern societies How should we understand the social impact of new forms of communication and information diffusion from the advent of printing in fifteenth century Europe to the expansion of global communication networks today In this major new work Thompson addresses these and other questions by elaborating a distinctive social theory of communication media and their impact He argues that the development of communication media has transformed the spatial and temporal constitution of social life creating new forms of action and interaction which are no longer linked to the sharing of a common locale The consequences of this transformation are far reaching and impinge on many aspects of our lives from the most intimate aspects of personal experience and self formation to the changing nature of power and visibility in the public domain Combining breadth of vision with sensitivity to detail this book situates the study of the media where it belongs among a set of disciplines concerned with the emergence development and structural characteristics of modern societies and their futures [Proceedings of the Grand Chapter of Royal Arch Masons of the State of Delaware](#) Royal Arch Masons.
