*The Evolution of Consciousness* Rudolf Steiner, 2006 According to the research of initiate Rudolf Steiner humanity is in a continual process of transformation and evolution Modern consciousness based primarily on sensory

perception and abstract logic differs considerably from the consciousness of ancient human beings Steiner tells us that the ancients saw human beings as microcosms or concentrations of cosmic laws and activities The loss of such knowledge has led to an existential quest for meaning and even the cul de sac we know as atheism In these comprehensive lectures delivered to an English audience Steiner discusses the very real possibility of reconnecting to the cosmos today He explains how we can develop higher faculties of consciousness what he calls imagination inspiration and intuition and vividly describes life after death and how individuals progress through the planetary spheres In these spheres he tells us tasks and purpose for future incarnations are prepared in cooperation with spiritual beings of the heavenly hierarchies The lectures culminate in a call for us to take charge of our own destiny through conscious free development of our spiritual potential This new edition of a fundamental work from Rudolf Steiner features a revised translation as well as previously unavailable addresses and Steiner's answers to questions from his audience
