Haecceity G.S. Rosenkrantz, 2013-03-09 Many contemporary philosophers are interested in the scotistic notion of haecceity or thisness because it is relevant to important problems concerning identity and individuation reference modality and propositional attitudes Haecceity is the only book length work devoted to this topic The author develops a novel defense

of Platonism arguing first that abstracta nonqualitative haecceities are needed to explain concreta s being diverse at a time and second that unexemplified haecceities are then required to accommodate the full range of cases in which there are possible worlds containing individuals not present in the actual world In the cognitive area an original epistemic argument is presented which implies that certain haecceities can be grasped by a person his own those of certain of his mental states and those of various abstracta but not those of external things It is argued that in consequence there is a clear sense in which one is directly acquainted with the former entities but not with external things

The Problem of the Earth's Shape from Newton to Clairaut John L. Greenberg, 1995-07-28 This book investigates through the problem of the earth s shape part of the development of post Newtonian mechanics by the Parisian scientific community during the first half of the eighteenth century In the Principia Newton first raised the question of the earth s shape John Greenberg shows how continental scholars outside France influenced efforts in Paris to solve the problem and he also demonstrates that Parisian scholars including Bouguer and Fontaine did work that Alexis Claude Clairaut used in developing his mature theory of the earth s shape The evolution of Parisian mechanics proved not to be the replacement of a Cartesian paradigm by a Newtonian one a replacement that might be expected from Thomas Kuhn s formulations about scientific revolutions but a complex process instead involving many areas of research and contributions of different kinds from the entire scientific world Greenberg both explores the myriad of technical problems that underlie the historical development of part of post Newtonian mechanics which have only been rarely analyzed by Western scholars and embeds his technical discussion in a framework that involves social and institutional history politics and biography Instead of focusing exclusively on the historiographical problem Greenberg shows as well that international scientific communication was as much a vital part of the scientific progress of individual nations during the first half of the eighteenth century as it is today

The Oxford Handbook of the Jesuits Ines G. Županov, 2019 Through its missionary pedagogical and scientific accomplishments the Society of Jesus known as the Jesuits became one of the first institutions with a truly global reach in practice and intention The Oxford Handbook of the Jesuits offers a critical assessment of the Order helping to chart new directions for research at a time when there is renewed interest in Jesuit studies In particular the Handbook examines their resilient dynamism and innovative spirit grounded in Catholic theology and Christian spirituality but also profoundly rooted in society and cultural institutions It also explores Jesuit contributions to education the arts politics and theology among others The volume is organized in seven major sections totaling forty articles on the Order s foundation and administration the theological underpinnings of its activities the Jesuit involvement with secular culture missiology the Order s contributions to the arts and sciences the suppression the Order endured in the 18th century and finally the restoration The volume also looks at the way the Jesuit Order is changing including becoming more non European and ethnically diverse with its members increasingly interested in engaging society in addition to traditional pastoral duties

Modern Political Thought in East Central Europe Balázs Trencsényi, Maciej Janowski, Monika Baár, Maria Falina, Michal Kopeček, 2016 The volume offers the first ever synthetic overview of the history of modern political thought in East Central Europe **A Cultural History of Physics** Károly Simonyi, 2025-02-28 While the physical sciences are a continuously

evolving source of technology and of understanding about our world they have become so specialized and rely on so much prerequisite knowledge that for many people today the divide between the sciences and the humanities seems even greater than it was when C P Snow delivered his famous 1959 lecture The Two Cultures In A Cultural History of Physics Hungarian scientist and educator Károly Simonyi succeeds in bridging this chasm by describing the experimental methods and theoretical interpretations that created scientific knowledge from ancient times to the present day within the cultural environment in which it was formed Unlike any other work of its kind Simonyi's seminal opus explores the interplay of science and the humanities to convey the wonder and excitement of scientific development throughout the ages These pages contain an abundance of excerpts from original resources a wide array of clear and straightforward explanations and an astonishing wealth of insight revealing the historical progress of science and inviting readers into a dialogue with the great scientific minds that shaped our current understanding of physics Beautifully illustrated accurate in its scientific content and broad in its historical and cultural perspective this book will be a valuable reference for scholars and an inspiration to aspiring scientists and humanists who believe that science is an integral part of our culture

The National Union Catalog, Pre-1956 Imprints Library of Congress, American Library Association. Committee on Resources of American Libraries. National Union Catalog Subcommittee, 1970 Einführung in den Jugoslawischen Marxismus-Leninismus L.

Vrtacic, 2012-12-06 Die vorliegende Arbeit gehört zur Reihe der Untersuchungen über den Marxismus Leninismus in den nicht sowjetischen kommunistischen Ländern Europas welche im Auftrag des Osteuropa Instituts an der Universität Freiburg Schweiz in Angriff genommen sind Im Gegensatz zu den früher veröffentlichten Werken handelt es sich jedoch nicht um eine vollständige Monographie sondern um eine Vorarbeit Sie besteht im wesentlichen in einer Bibliographie des

jugoslawischen philosophischen Schrifttums seit 1945 und in einer Übersicht sowohl des organisatorischen Rahmens als auch der Literatur. Der Verfasser bereitet jetzt auf Grund der hier zusammengefaßten Ergebnisse eine umfassende Monographie der genannten Art vor. Die Veröffentlichung erfolgt in der Hoffnung, daß diese meines Wissens erste und bisher einzige Einführung in den jugoslawischen Marxismus-Leninismus auch den anderen Forschern auf diesem Gebiet sowohl in Jugoslawien als auch im Ausland nützlich sein dürfte. Es ist für mich eine angenehme Pflicht, jenen Personen und Institutionen zu danken, ohne deren Hilfe dieses Buch nicht hätte geschrieben werden können. Ich danke dem Osteuropa-Institut der Universität Freiburg/Schweiz für den Auftrag der Rockefeller Foundation, welche meine Arbeit großzügig unterstützt hat; der Schweizerischen Landesbibliothek in Bern, der Freiburger Universitätsbibliothek und der Bibliothek des Osteuropa-Instituts in Bern für die Hilfe, die ich bei der Zusammenstellung der Bibliographie von ihnen erhalten habe. Vor allem möchte ich meinem verehrten Lehrer Prof. J. M. Bochenski meinen Dank aussprechen, ich habe von ihm ebenso wie die Anregung wie zahlreiche Weisungen und ständige Hilfe bei meiner Arbeit erhalten.

Deep Time of the Media Siegfried Zielinski, 2008-02-15. A quest to find something new by excavating the deep time of media's development not by simply looking at new media's historic forerunners but by connecting models, machines, technologies and accidents that have until now remained separated. *Deep Time of the Media* takes us on an archaeological quest into the hidden layers of media development: dynamic moments of intense activity in media design and construction that have been largely ignored in the historical media archaeological record. Siegfried Zielinski argues that the history of the media does not proceed predictably from primitive tools to complex machinery. In *Deep Time of the Media* he illuminates turning points of media history, fractures in the predictable that help us see the new in the old. Drawing on original source materials, Zielinski explores the technology of devices for hearing and seeing through two thousand years of cultural and technological history. He discovers the contributions of dreamers and modelers of media worlds from the ancient Greek philosopher Empedocles and natural philosophers of the Renaissance and Baroque periods to Russian avant-gardists of the early twentieth century. Media are spaces of action for constructed attempts to connect what is separated. Zielinski writes: He describes models and machines that make this connection, including a theater of mirrors in sixteenth-century Naples, an automaton for musical composition created by the seventeenth-century Jesuit Athanasius Kircher, and the eighteenth-century electrical tele-writing machine of Joseph Mazzolari, among others. Uncovering these moments in the media archaeological record, Zielinski says, brings us into a new relationship with present-day moments; these discoveries in the deep time media history shed light on today's media landscape and may help us map our expedition to the media future.

Substance Among Other Categories Joshua Hoffman, Gary S. Rosenkrantz, 1994-11-25 This book revives a neglected but important topic in philosophy the nature of substance The belief that there are individual substances for example material objects and persons is at the core of our common sense view of the world yet many metaphysicians deny the very coherence of the concept of substance The authors develop a novel account of what an individual substance is in terms of independence from other beings In the process many other important ontological categories are explored property event space time The authors show why alternative theories of substance fail and go on to defend the intelligibility though not the existence of interacting spiritual and material substances

Cultural Heritage of East Central Europe Wojciech Roszkowski, 2015-01-02 The concept of culture is a relatively modern invention It stems from the Latin term cultura meaning cultivation Cicero was the first to use this word in a non agricultural context In his Tusculanae Disputationes he reflected on the cultivation of the soul cultura animi Later this term was rarely used in this sense but as of the 17th century more and more authors considered culture an intellectual and not an agricultural phenomenon Samuel Pufendorf 1632 1694 described culture as a vehicle overcoming natural barbarism He was followed by German philosophers of culture Johann Gottfried Herder 1744 1803

argued that human creativity was as important as human rationality and called attention to national cultures The works of German romantic philosophers were mainly focused on the specificity of the German culture a factor that was to unite divided German statehoods At the same time however Herder and his followers noticed other national cultures including first of all those of East and Central Europe It is therefore noteworthy that the early philosophical reflection on culture was closely connected with the specific traditions of East and Central Europeans Encyclopedia of Renaissance Philosophy Marco Sgarbi,2022-10-27 Gives accurate and reliable summaries of the current state of research It includes entries on philosophers problems terms historical periods subjects and the cultural context of Renaissance Philosophy Furthermore it covers Latin Arabic Jewish Byzantine and vernacular philosophy and includes entries on the cross fertilization of these philosophical traditions A unique feature of this encyclopedia is that it does not aim to define what Renaissance philosophy is rather simply to cover the philosophy of the period between 1300 and 1650 **Earthquakes** Peter Moczo,Eva Rutšeková,Jozef Kristek,Martin Galis,Miriam Kristekova,2024-10-16 Discover the profound surprising and instructive tales embedded within the tragic earthquakes and tsunamis of the years 1755 1906 1960 1985 2004 2011 and 2023 Uncover the impact these events have had on our understanding of the planet we call home and explore how they shaped the destinies of entire nations In this book you ll delve into the intriguing connection between seismic events and human missions to the Moon and Mars pondering the warnings they carry for our future As seismic risks on Earth escalate and humanity extends its reach into space these challenges become pivotal for both current and future seismologists Lastly this book will allow you to embark on a riveting journey through the seismic tapestry of our past present and the uncharted territories of our future
