

BAHA'I FAITH

Lay not on any soul a load that you would not wish to be laid upon you, and desire not for anyone the things you would not desire for yourself.
Baha'i Faith, Catechisms

HINDUISM

This is the sum of duty: do not do to others what would cause pain if done to you.
Mahabharata 5:15:27

BUDDHISM

Treat not others in ways that you yourself would find hurtful.
Udana-Varga 5:18

CONFUCIANISM

One word which sums up the basis of all good conduct... loving kindness. Do not do to others what you do not want done to yourself.
Confucius, Analects 15:23

ISLAM

Not one of you truly believes until you wish for others what you wish for yourself.
The Prophet Muhammad 1982:184:10

JUDAISM

What is hateful to you, do not do to your neighbour. This is the whole Torah; all the rest is commentary.
Hillel, Talmud, Shabbat 31a

JAINISM

One should treat all creatures in the world as one would like to be treated.
Mahavira, Sudrakasthanga

ZOROASTRIANISM

Do not do unto others whatever is injurious to yourself.
Shayest-nar-Shayest 13:29

NATIVE SPIRITUALITY

We are as much alive as we keep the earth alive.
Chief Dan George

UNITARIANISM

We affirm and promote respect for the interdependent web of all existence of which we are a part.
Unitarian principles

CHRISTIANITY

In everything, do to others as you would have them do to you; for this is the law and the prophets.
Jesus, Matthew 7:12

SIKHISM

I am a stranger to no one; and no one is a stranger to me. Indeed, I am a friend to all.
Guru Granth Sahib, pg. 5299

TAOISM

Regard your neighbour's gain as your own gain, and your neighbour's loss as your own loss.

Mass Appraisal Methods Tom Kauko, Maurizio d'Amato, 2009-01-28 This book takes a cross disciplinary and cross cultural look at mass appraisal expertise for property valuation in different market conditions and offers some cutting edge approaches The editors establish an international platform and present the scientific debate as well as practical feasibility considerations Heretic and orthodox valuation methods are assessed based on specific criteria partly technical and partly institutional Methodological evaluation is approached using two types of criteria operational concerns about how to determine property value differentials between spatial and functional units of real estate in a valid and reliable way technical criteria and the kind of market circumstances being operated in institutional criteria While technical criteria are relatively well researched there is little theoretically informed work on the connection between country context and selection of property appraisal methods The book starts with an examination of current mass property appraisal practices presenting case studies from widely differing markets from the American and Dutch where regression based methods have been used successfully for some time to the Eastern European and other emerging economies where limitations have to be compensated by focusing on the modelling assumptions The second part of the book looks at sophisticated modelling approaches some of which represent combinations of elements from two or more techniques Whatever the exact modelling approach the requirements are always high for the quality of the data and suitability of the method In the final section methods are evaluated and compared according to technical criteria and against institutional contexts With its exceptionally wide coverage of valuation issues Mass Appraisal Methods an international perspective for property valuers addresses property

valuation problems common to different countries and approaches applicable in both developed and emerging economies

Intelligent Agents V: Agents Theories, Architectures, and Languages Jörg Müller, Munindar P. Singh, Anand S.

Rao, 2007-04-29 The leading edge of computer science research is notoriously fickle. New trends come and go with alarming and unfailing regularity. In such a rapidly changing world, the fact that research interest in a subject lasts more than a year is worthy of note. The fact that after five years interest not only remains but actually continues to grow is highly unusual. As 1998 marked the fifth birthday of the International Workshop on Agent Theories Architectures and Languages ATAL, it seemed appropriate for the organizers of the original workshop to comment on this remarkable growth and reflect on how the field has developed and matured. The first ATAL workshop was co-located with the Eleventh European Conference on Artificial Intelligence ECAI 94 which was held in Amsterdam. The fact that we chose an AI conference to co-locate with is telling at that time we expected most researchers with an interest in agents to come from the AI community. The workshop which was planned over the summer of 1993 attracted 32 submissions and was attended by 55 people. ATAL was the largest workshop at ECAI 94 and the clear enthusiasm on behalf of the community made the decision to hold another ATAL workshop simple. The ATAL 94 proceedings were formally published in January 1995 under the title *Intelligent Agents* and included an extensive review article, a glossary, a list of key agent systems and unusually for the proceedings of an academic workshop, a full subject index. The high scientific and production values embodied by the ATAL 94 proceedings appear to have been recognized by the community and resulted in ATAL proceedings being the most successful sequence of books published in Springer Verlag's Lecture Notes in Artificial Intelligence series. *Finite-State Text Processing* Kyle Gorman, Richard Sproat, 2022-06-01

Weighted finite state transducers WFSTs are commonly used by engineers and computational linguists for processing and generating speech and text. This book first provides a detailed introduction to this formalism. It then introduces Pynini, a Python library for compiling finite state grammars and for combining, optimizing, applying and searching finite state transducers. This book illustrates this library's conventions and use with a series of case studies. These include the compilation and application of context dependent rewrite rules, the construction of morphological analyzers and generators and text generation and processing applications. Morality Bernard Gert, 1998 For more than thirty years philosopher Bernard Gert has been developing and refining his distinctive and comprehensive moral theory. This book presents the fullest statement yet of his influential theoretical model. **Congressional Record** United States. Congress, 1981 The
