Passion in Action Rowland Stout, 2025-06-05 Developing a sophisticated and original approach to the nature of emotion this volume demonstrates that the way we feel about things is simultaneously a product of our reason and a force on it an aspect both of our agency and of our passivity As a force on the way we think about things emotions are passions and felt as such As a product of the way we think about things having emotions means we find values in our world Starting from a conception of what it is to be sensitive to reason Stout develops an account of emotional dispositions as manifested in forming and maintaining goals When these dispositions are active we feel like behaving in certain ways and this feeling characterizes the phenomenological aspect of emotional states Each type of emotion corresponds to a characteristic behavioural pattern Since emotional states are rational responses to features of our environment having an emotion means that we are treating our environment as meriting that emotional state i e as having value It follows that every emotion corresponds to a rational perspective a way of thinking about things The familiar problem of emotional recalcitrance where you know your emotional state is not rational but cannot stop feeling that way is resolved by showing how we may have rational perspectives on our rational perspectives

Public Passion Rebecca Kingston, 2011 Whether in the reception of rousing political oratory like that of de Gaulle or Martin Luther King or in the motivations of demonstrators in popular uprisings like those in Tunisia and Egypt there is no denying that emotion and politics are connected Nonetheless criticism of political debate and discourse as emotionally rather than rationally based is ubiquitous

and emotion is often presented as a negative factor in politics Public Passions shows that reason and emotion are not mutually exclusive and restores the legitimacy of shared emotion in political life Public Passion traces the role of emotion in political thought from its prominence in classical sources through its resuscitation by Montesquieu to the present moment Combining intellectual history philosophy and political theory Rebecca Kingston develops a sophisticated account of collective emotion that demonstrates how popular sentiment is compatible with debate pluralism and individual agency and shows how emotion shapes the tone of interactions among citizens She also analyzes the ways in which emotions are shared and transmitted among citizens of a particular regime paying particular attention to the connection between political institutions and the psychological dispositions that they foster Public Passion presents illuminating new ways to appreciate the forms of popular will and reveals that emotional understanding by citizens may in fact be the very basis through which a commitment to principles of justice can be sustained

The Trouble With Passion Cheryl Hall, 2013-01-22 Political theorists have long argued that passion has no place in the political realm where reason reigns supreme But is this dichotomy between reason and passion sustainable Does it underestimate the indispensable role of passion in a fully democratic society Drawing upon Plato Rousseau and contemporary feminist theorists Cheryl Hall argues that passion is an essential component of a just political community and that the need to educate passion together with reason is paramount Trouble with Passion provides a compelling defense of the crucial place of passion in politics

Hume, Passion, and Action Elizabeth Schmidt Radcliffe, 2018 David Hume s theory of action is well known for several provocative theses including that passion and reason cannot be

opposed over the direction of action Elizabeth S Radcliffe defends an original interpretation of Hume's views on passion reason and motivation which is consistent with other theses in Hume's philosophy loyal to his texts and historically situated She challenges the now orthodox interpretation of Hume on motivation presenting an alternative that situates Hume closer to Humeans than many recent interpreters have Part of the strategy is to examine the thinking of the early modern intellectuals to whom Hume responds Most of these thinkers insisted that passions lead us to pursue harmful objects unless regulated by reason and most regarded passions as representations of good and evil which can be false Understanding Hume's response to these claims requires appreciating his respective characterizations of reason and passion The author argues that Hume's thesis that reason is practically impotent apart from passion is about beliefs generated by reason rather than about the capacity of reason Furthermore the argument makes sense of Hume's sometimes ridiculed description of passions as original existences having no reference to objects The author also shows how Hume understood morality as intrinsically motivating while holding that moral beliefs are not themselves motives and why he thought of passions as self regulating contrary to the admonitions of the rationalists

Passion for Our Planet Terry Bagia, 2010-08-12 Of late there has been a very serious interest in alerting the entire world on the volatility of oil dependence and the dangers of climate change This book is an indispensable contribution to the growing debates on the overarching concepts of the danger of perpetual oil dependence climate change and the urgent need for switching to a new habit in energy use the use of alternative renewable energy sources This book is framed around the foundation laid in my first book *Delta in Distress* And it goes further to situate the problems associated with the worlds perpetual unquenchable quest for energy within the global context In my first book there was an elaborate treatment of the concepts of deprivation destitution desperation and distress associated with the exploration and extraction of oil in the contemporary human society as typified by the case of the Niger Delta region in the core Southern Nigeria The description and analysis was clearly articulated with an enduring affinity for possible solutions to these endemic problems of humanity Emphatically in my first book the case of the Niger Delta region of Nigeria which has since become a mosaic of restive communities attracted a critical treatment This was done with very thoughtful and insightful examination There was proper exposure of the plights of the common community people in that first book *Delta in Distress* These common citizens of the oil communities within the reviewed region are perpetually made to suffer the pangs of untold denials and despair while enormous oil and gas resources of inestimable economic worth are continually extracted from underneath their land Of course these problems are not limited to only one region They are global in scope and effects Thus the perpetual dependence on oil has drastically placed the security and economic future of the global community on tenuous hooks Of late there appears to have been increasing interest in the concepts of oil related crises and conflicts These man made mishaps have claimed many human lives Their causes are directly linked to the mismanagement of the economic proceeds of the oil and gas resources The problems associated with perpetual global dependence on oil surpass the issues of deprivations disaffections conflicts and crises which in a collaborative sense perpetually pose threat to global security More than that is the negative environmental impacts of oil operations in most oil regions This trend has gone down to put the lives of plants animals and human beings on our increasingly ailing planet Earth in serious jeopardy Obviously energy is at the very center of our daily lives Everybody uses energy from the time of rising from bed until the time of going back to sleep In every nation of the

world there is a persistent drive to continually advance in technology This growing technological break through is what makes modern live easier and more convenient So the more technology the human folks use every blessed day the greater our need for energy Looking at the compelling nature of this energy problem and its interrelationship with almost every facet of the lives of virtually everybody in the society every attempt to face the fearful odds associated with this problem implies a different and well defined approach to the issue In the first place America like any of the other developed nations of the world can no longer afford to risk treading the path of isolationism neither can any of the other nations of the world afford to bask in the luxury of self contentment or toughness under the present dispensation To say the least President Obama and his team are truly driven by the realization that the United States must telegraph a new message of respect collaboration and mutuality in the quest to lead the way out of the present pace of uncertainty that defines the global energy future This new drive and President Obamas passion for our planets overall serenity prosperity and progress are the themes which this must read volume drastically and critically examines This book is truly a must read
