data John Peters tells the story of how inequality is unfolding in Canada today by examining post democracy financialization and labour market deregulation Timely and novel Jobs with Inequality explains how and why business and government have rewritten the rules of the economy to the advantage of the few and considers why progressive efforts to reverse these trends have so regularly run aground

Antony, 2022-06-30T00:00:00Z Power and Resistance debunks the dominant neoliberal hyper individualist approach to society's problems that sees poverty as a result of laziness environmental crises as a result of market demands for products that pollute and Indigenous Peoples struggles as a result of not assimilating We argue that it is social inequality and oppression that are the underlying causes of social problems In a society like ours powerful groups make choices that benefit them and force those choices onto others creating life problems for others and society as a whole The powerful also have influence over what is and is not called a social problem Solving social problems requires changing the structures of inequality and oppression For example industrial corporate agriculture has created huge profits for a few gigantic food corporations but left much of the world hungry But farmers and their allies are pushing back through agroecology an agriculture based on local small scale ecologically sustainable farming that brings eaters and growers closer to one another The seventh edition of Power and Resistance includes new chapters on anti Black racism in schools Indigenous people and

mental health food security and sovereignty and work in the gig economy      **Forces of Production, Climate Change and Canadian Fossil Capitalism** Nicolas Graham, 2020-12-29 Listen to the podcast In Forces of Production Climate Change and Canadian Fossil Capitalism Nicolas Graham reinterprets the concept of forces of production from an ecological standpoint and in the context of the deepening climate crisis He argues that ecological knowledge itself as well as associated developments in renewable energy technology and green infrastructure represent advancements in productive forces However such green productive forces are fettered by capitalist relations of production including the power of carbon capital In addition to a conceptual and theoretical reinterpretation case studies focusing on Canadian fossil capitalism provide a concrete complex analysis of the deepening of fossil fuelled productive forces and the process of fettering in both renewable energies and in the development and application of ecological knowledge
