**Rural Labor Migration, Discrimination, and the New Dual Labor Market in China** Guifu Chen, Shigeyuki Hamori, 2013-11-29 This book studies some important issues in China's labor market such as rural labor migration employment and wage discrimination the new dual labor market and economic returns on schooling using the newer and representative data and advanced estimation models This approach has yielded many interesting results including a solution to the dilemma of two ongoing crises since 2004 the rural labor surplus and severe shortage of migrant labor While male workers generally received less favorable treatment and consequently enjoyed a lower average employment probability than female workers in 1996 they also received preferential treatment over female workers who otherwise had identical worker characteristics in 2005 We provide new estimates for male female hourly wage differentials in urban China and our results indicate that the hourly wage differentials and the unexplained part of the hourly wage differentials are smaller than the differentials obtained by ignoring the sample selection bias We study China's new dual labor market which

is shifting from a rural migration versus urban workers setup to informal workers versus formal workers setup and present some interesting results Our study is the first to adopt the IV methodology and the Heckman 1979 two step procedure simultaneously for the estimation of economic returns on schooling in China Work and Organizations in China after Thirty Years of Transition Lisa Keister,2009-09-17 Thirty years of economic change have fundamentally altered the nature of organizations and work in China This volume brings together the research by many of the top scholars studying these issues and provides a glimpse into the state of thinking on organizations and work at the start of the fourth decade of transition

but have also led to unprecedented economic inequality. During this period, China's educational system was restructured to support economic development with educational reforms occurring at a startling pace. Today the educational system has diversified in structure, finance, and content; it has become more market oriented and it is serving an increasingly diverse student population. These changes carry significant consequences for China's social mobility and inequality and future economic prospects. In *Education and Reform in China*, leading scholars in the fields of education, sociology, demography, and economics investigate the evolution of educational access and attainment, educational quality, and the economic consequences of being educated. *Education and Reform in China* shows that economic advancement is increasingly tied to education in China, even as educational services are increasingly marketized. The volume investigates the varying impact of change for different social, ethnic, economic, and geographic groups. Offering interdisciplinary views on the changing role of education in Chinese society and on China's educational achievements and policy challenges, this book will be an important resource for those interested in education, public policy, and development issues in China. [Migration And Social Protection In China](#)

Ingrid Nielsen, Russell Smyth, 2008-09-16. China has an estimated 120-150 million internal migrants from the countryside living in its cities. These people are the engine that has been driving China's high rate of economic growth. However, until recently, little or no attention has been given to the establishment of a social protection regime for migrant workers. This volume examines the key issues involved in establishing social protection for them, including a critical examination of deficiencies in existing arrangements and an in-depth study of proposals that have been offered for extending social security coverage. Featuring contributions from leading academics outside China who have written on the topic, as well as experts from leading Chinese academic institutions such as the Chinese Academy of Social Sciences and the Development Research Center in the State Council, this volume provides a comprehensive account from both inside and outside China. □

□ Di Mo, 2013. Mozi, fifth century B.C., was an important political and social thinker and formidable rival of the Confucianists. He advocated universal love, his most important doctrine, according to which all humankind should be loved and treated as one's kinfolk, honoring and making use of worthy men in government and identifying with one's superior as a means of establishing uniform moral standards. He also believed in the will of Heaven and in ghosts. He firmly opposed offensive warfare, extravagance, including indulgence in music and allied pleasures, elaborate funerals, and mourning. Fatalistic beliefs and Confucianism. *A Comparative Study of East Asian Capitalism*. Hong Yung Lee, 2014. This book represents an initial attempt to compare China, Japan, and South Korea, three close geographical and cultural neighbors whose developmental trajectories, though divergent in the past, have been moving more recently toward convergence.
