Buttel, 1980 **Routledge Library Editions: Political Geography** Various, 2021-06-23 From votes to strikes to street violence politics is intrinsically geographical Many of the books in this set originally published between 1964 and 1990 illustrate that the social contexts provided by localities are crucial in defining distinctive political identities and subsequent political activities **The Social Science Encyclopedia** Adam Kuper, 2003-12-16 The Social Science Encyclopedia first published in 1985 to acclaim from social scientists librarians and students was thoroughly revised in 1996 when reviewers began to describe it as a classic This third edition has been radically recast Over half the entries are new or have been entirely rewritten and most of the balance have been substantially revised Written by an international team of contributors the Encyclopedia offers a global perspective on the key issues within the social sciences Some 500 entries cover a variety of enduring and newly vital areas of study and research methods Experts review theoretical debates from neo evolutionism and rational choice theory to poststructuralism and address the great questions that cut across the social sciences What is the influence of genes on behaviour What is the nature of consciousness and cognition What are the causes of poverty and wealth What are the roots of conflict wars revolutions and genocidal violence This authoritative reference work is aimed at anyone with a serious interest in contemporary academic thinking about the individual in society **Developments in Electoral Geography** Ron Johnston, Fred M. Shelley, Peter J. Taylor, 2014-10-03 The essays in this collection show how electoral geography has shifted from empiricist activity towards a closer involvement with the wider issues addressed by social scientists They illustrate the potential contributions that electoral geographers can make towards the understanding of global national and local societies **The Handbook of Food Research** Anne Murcott, Warren Belasco, Peter Jackson, 2013-08-15 The last 20 years have seen a burgeoning of social scientific and historical research on food The field has drawn in experts to investigate topics such as the way globalisation affects the food supply what cookery books can and cannot tell us changing understandings of famine the social meanings of meals and many more Now sufficiently extensive to require a critical overview this is the first handbook of specially commissioned essays to provide a tour d horizon of this broad range of topics and disciplines The editors have enlisted eminent researchers across the social sciences to illustrate the debates concepts and analytic approaches of this widely diverse and dynamic field This volume will be essential reading a ready to hand reference book surveying the state of the art for anyone involved in and actively concerned about research on the social political economic psychological geographic and historical aspects of food It will cater for all who need to be informed of research that has been done and that

is being done Finance Capital And Uneven Development Gary P. Green,2019-04-08 This book examines the theoretical issues of finance capital by developing a comparative analysis of capital flows at industry region and nation state levels The analysis hopes to make an important methodological contribution to the literature on finance capital Sustainable Food Systems Terry Marsden,Adrian Morley,2014-01-21 In response to the challenges of a growing population and food security there is an urgent need to construct a new agri food sustainability paradigm This book brings together an integrated range of key social science insights exploring the contributions and interventions necessary to build this framework Building on over ten years of ESRC funded theoretical and empirical research centered at BRASS it focuses upon the key social economic and political drivers for creating a more sustainable food system Themes include regulation and governance sustainable supply chains public procurement sustainable spatial strategies associated with rural restructuring and re calibrated urbanised food systems minimising bio security risk and animal welfare burdens The book critically explores the linkages between social science research and the evolving food security problems facing the world at a critical juncture in the debates associated with not only food quality but also its provenance vulnerability and the inherent unsustainability of current systems of production and consumption Each chapter examines how the links between research practice and policy can begin to contribute to more sustainable resilient and justly distributive food systems which would be better equipped to feed the world by 2050 Labor Relations in Globalized Food Terry Marsden,Josefa Salete Barbosa Cavalcanti,Alessandro Bonanno,2014-05-28 This book looks at labor in agriculture and food in a global era by studying salient characteristics of the conditions and use of labor in global agri food Written by experienced and also emerging scholars the chapters present a wealth of empirical data and robust theorizations that allow readers to grasp the complexity of this topic **Small Farms** Alessandro Bonanno,2019-07-11 Why do small farms continue to coexist with ever larger farming operations in advanced Western societies Through a thorough case study of Italy and a comparative analysis of small farms in the United States Dr Bonanno seeks to answer this question exploring the complex relationships among farm family members ideology and behavior the small farm economic sector and the interaction of small farms within the relevant spheres of society He finds that at the structural level a lack of occupational alternatives and contradictions within both labor and land markets often force farmers to retain marginal farms despite personal dissatisfaction At the ideological level many farm families display deep attachment to the agrarian way of life and cite this as a fundamental reason for not leaving the farm for other work Dr Bonanno also analyzes the role of small farms within the social system and concludes that they serve a legitimative function This legitimative role fosters contradictions within the social and economic systems that the state is unable to resolve thus contributing to the continuation of a dual structure in agricultural development large and very large farms at one end of the scale and marginal but persistent small farms at the other **The Social Risks of Agriculture** Ronald C. Wimberley,Craig K. Harris,Joseph J. Molnar,Terry J. Tomazic,2002-08-30 In a vast society where environmentally conscious nonfarming voters

and consumers have grown to greatly outnumber those directly engaged in agriculture what happens in agriculture becomes increasingly subject to control by the general society as policies and laws cater to constituents and consumers This book provides an overview of how Americans perceive and value farmers and examines public opinion with regard to a number of agricultural issues Based on analysis of national survey data the authors offer an empirically based discussion and interpretation of those views and perceptions that help to shape policy and social sustainability This unique collection illustrates that in addition to its natural biological and economic risks agriculture has social risks that reverberate through all levels of society As the general population grows and the number of farms and farmers diminishes the weight of public opinion becomes more important in the policy arena of society as well as in the market demands for food and fiber grown in safe and favorable environmental conditions Setting the stage with a consideration of the larger society's interests in agricultural issues and of social and agricultural interdependence the contributors cover a range of topics and issues affecting agriculture at the end of the 20th century Chapters examine public perceptions of government's role in farming support for an environmentally friendly agricultural system views on pesticides and chemicals in foods consumer attitudes on food safety threats to clean drinking water concerns over farm animal welfare and the basic agrarian ethic of American society The book concludes with a look to the future of the social risks of agriculture in the 21st century **Agrarian**

Capitalism in Theory and Practice Susan Archer Mann, 2017-10-10 Susan Mann focuses on a longstanding controversy in sociological theory why has agriculture been traditionally resistant to wage labor Capitalist development has been slower and more uneven in agriculture than in other spheres of production and major parts of the rural economy remain almost preindustrial in their reliance on family labor lack of separation between industry and household and failure to develop a highly specialized division of labor Emphasizing the agriculture of the American South Mann adopts an interdisciplinary approach drawing insights from history and economics as well as sociology Mann points out that most theories of agrarian capitalism both Marxist and non Marxist ignore the implications of agriculture as a production process centered in nature with natural features that cannot be synchronized easily into the tempos required by industrial production She argues that various natural and technical features of agricultural production such as the relatively lengthy production time of certain crops and the irregular labor requirements imposed by seasonal production make some types of farming particularly risky avenues for capitalist investment To test this pioneering theory of natural obstacles to rural capitalist development Mann creatively combines diverse research methodologies Analyzing U S Agricultural Census data she shows the correlations between type of agricultural commodity or crop produced the natural and technical features of these rural commodities and the use of wage labor Using an historical comparative approach she investigates the persistence of nonwage labor in American cotton production after the Civil War She examines why sharecropping rather than wage labor replaced slavery in the older cotton producing regions of the southeastern United States She then discusses the domestic and international

factors that finally led to the demise of sharecropping and the rise of wage labor in the decades following the Great Depression In this historical study of the rise and demise of sharecropping the interplay between nature gender race and class is highlighted By closely examining both natural and social obstacles to wage labor within the context of a global economy Mann presents not only an intriguing analysis of agrarian capitalist development but also an entirely new framework for examining the social history of the American South Originally published in 1990 A UNC Press Enduring Edition UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value Farming Women Sarah Whatmore,2016-07-27 This book presents a feminist critique and reconstruction of the political economy of contemporary family farming at a time when the significance of household and kinship to the organisation of production and work in advanced industrial countries is being more widely reassessed Focusing on the social construction of women as farm wives the book challenges the prevailing invisibility of women in farming and segregated analysis of home and work **A Companion to Economic Geography** Eric Sheppard,2008-04-15 A Companion to Economic Geography presents students of human geography with an essential collection of original essays providing a key to understanding this important subdiscipline The contributions are written by prominent international scholars offering a wide ranging overview of the field Places economic geography in the wider context of geography Contributions from leading international scholars in the field Presents a comprehensive up to date and accessible overview of all the major themes in the field Explores key debates controversies and questions using a variety of historical and theoretical vantage points Charts the important work that has been done in recent years and looks forward to new developments in the global economy **Partners in Production?** Patricia O'Hara,1998-06-01 In Ireland family farming retains enormous ideological and cultural significance As a social form it is one of the last preserves of male dominance in which women s contributions and concerns are largely overlooked This book breaks new ground as the first major study of Irish farm families in which women are the focus of attention Little is known of how gender relations actually work themselves out within farm families or of farm women s understanding of their situation but even a casual observer would conclude that Irish farm women are not without influence This volume reveals how contemporary farm women experience life on the family farm often through their own voices and how they have managed to create their own spheres of influence despite their apparent unequal status and invisibility in the male world of agriculture This study not only makes farm women s subordination explicit but in discerning the sources and force of their influence within and outside the farm family it offers a challenge to existing explanations of the evolution of Irish rural social structures It also suggests that feminist theories of the family need to pay closer attention to the mother s influence on social reproduction Outstanding in His Field Frederick V. Carstensen,2002-09 Honoring Wayne D Rasmussen Mr Agriculture at

the U S Department of Agriculture and throughout the nation this book comprises essays by distinguished authors from varied disciplines on the past achievements current status and future challenges of agriculture history *Towards A New Political Economy Of Agriculture* William H Friedland,2021-11-28 The emergence of a truly global economy in the 1970s and the need to understand the subsequent changes in economic structure provided the impetus for this synthesis of the sociology of agriculture The book offers the first formulations of a political economy theory that explains the transnational social and production relations of food and agriculture Drawing upon studies of labour technology the state and gender the contributors put forward a basis for reassessing and restating the intellectual framework of agriculture **Locality and Inequality** Linda M. Lobao,1990-01-01 This book explores how the recent restructuring of farming and industry has affected economic and social equality in the United States The author explains how the farm sector has undergone a dramatic restructuring with profound effects Moderate size family farms the mainstay of American agriculture have declined during the postwar period and are now under severe financial stress Large scale industrialized farms the factories in the field often run by corporations continue to expand their share of agricultural sales while small farms operated on a part time basis appear to be replacing traditional family farming Lobao shows that public concern about farm restructuring is indeed warranted and that the nation now appears to be losing its most beneficial farms as well as industries While local and regional social and economic forces and state policy can be brought to bear on these trends Lobao particularly focuses on how community empowerment and broad based political coalitions offer the most promise for fundamental change
