Rural Development In China Insights From The Beef Industry:

Rural Development in China Scott A. Waldron, Colin G. Brown, 2017-11-22 This title was first published in 2003 The greatest challenge facing China today is to curb the growing economic divide between urban and rural people Achieving this requires that the rural economy in general and rural industries in particular transform rapid growth into sustained development However policy makers are struggling to modernise rural industries such as the cattle and beef industry especially in a way that contributes to rural incomes This book provides a systematic detailed and up to date analysis of how institutional and policy reforms impact on rural and industry development in China Academics policy makers and others will find that this case study offers new insights into China s rural economy institutional change and transition process It will also be of interest to those concerned with ways to develop livestock industries in a way that benefits rural communities

Politics and Markets in Rural China Björn Alpermann, 2012-03-29 Thirty years have passed since the beginning of the reform era in China which saw important changes in agriculture and rural organizations but it is clear that certain entrenched legacies from pre reform China still linger on even after WTO accession most importantly the key role played by state actors and politics in the development of markets in rural China Although increasingly diversified markets have emerged for major agricultural inputs and products their development cannot be understood without taking this role into account Against this backdrop the contributors to this book offer a fresh account of rural politics and markets consciously linking these two realms and highlighting their interconnectedness The book is organized in three parts addressing respectively markets for agricultural inputs and outputs as well as current policies in rural development The perspectives adopted link macro and micro level analysis in each chapter and thus contribute substantially to our understanding of existing markets As an original account of rural politics and markets in China this book will appeal to students and scholars of Chinese politics economics development studies and political economy **China's Cotton Industry** Björn

Alpermann, 2010-04-05 This book examines the political economy of the cotton processing industry analyzes the process of cotton policy making and looks at how local governments and the former monopolist cope with the changes brought about by marketization

Common Grasslands in Asia Colin G. Brown, 2020-02-28 This book unravels the complexities of the grassland systems of Mongolia and northern China identifying the ways in which policies and incentives can be strengthened to improve grassland condition and herder livelihoods Offering a comparative analysis of policies and incentives chapters argue for a mix of incentives and associated policy measures to benefit both grassland conditions and herder lifestyles

The Political Economy of Agro-Food Markets in China L. Augustin-Jean, B. Alpermann, 2013-11-19 China s agricultural production and food consumption have increased tremendously leading to a complete evolution of agro food markets The book is divided into two parts the first part reviews the theoretical framework for the social construction of the markets while the second part presents the implication for the agro food markets in China Modernizing China's

Industries Colin G. Brown, Scott A. Waldron, John William Longworth, 2005-01-01 The book fills an important gap in understanding the process of economic transformation by providing a comprehensive and in depth micro level analysis of industrial transition The book is highly recommended for those who are working on or studying the Chinese economic transformation focusing especially on industry and its transition Ligang Song Economic Record As the authors admit the wool industry may seem a rather obscure choice p 23 Yet this is a book of interest to a much wider relationship than agro business specialists It provides a meticulous case study of one industry which illuminates a number of broader issues currently under discussion in the China studies field As the Chinese economy becomes more variegated economists and political scientists trying to understand the Chinese economic reform experience will increasingly have to rely on such studies They bring out the intricacies of this process and help us to move from across the board generalizations on property rights reform to more nuanced analyses of economic transition Bj rn Alpermann The China Journal China defies generalizations and the only way that we can hope to obtain a clear idea of the process of reform is through detailed studies that trace the complex ebb and flow of reforms including the interactions between centre and locality and between the stages of the processing This is a valuable study that will stand the test of time Will Martin The World Bank US This book is more than yet another industry report This is a book on transition It describes the mega forces privatization state owned enterprise reform internationalization increasing competition and their mega consequences the proliferation of small private traders the diversification of the process sector the disintegration of government agencies and private initiatives that had been in charge of coordinating and managing quality that not only affected the wool sector but are literally re defining the fabric of China s economy For those interested in trying to better understand the fastest growing economy in the world this is a must read Neither the authors competence in wool technology nor their description of the institutional details of the wool economy gets in the way of their main message Powerful economic forces are at work in China In some cases there are positive benefits through competitive and improved incentives In other cases however there is a cost in terms of rising transaction costs imperfect information and the inability to rationalize the evolving supply chains Scott Rozelle University of California US China is the world s largest producer and consumer of wool textiles but the structure of its industry remains confusing and complex to many While China offers the most important growth opportunity in the world today the transition from a centrally planned to a market economy has compounded the difficulties and risks for many traders and investors wishing to deal with and in this market This publication makes a major contribution towards unravelling the complexity of Chinese industrial structures through its review of recent changes to one of China s oldest but still significant manufacturing sectors the wool textile industry The lessons learned through this study will be relevant to anyone wishing to understand China s industrial modernization processes Barry White Chief Executive Officer International Fibre Council IFC Ltd Director Australia China Business Council Exposed to powerful new economic forces and undergoing dramatic ownership reforms and technological

changes China's industries are modernizing at a breakneck pace. In many industries the outcomes have been chaotic and poorly aligned with societal objectives. This book analyses the transformation and modernization of China's industries through a detailed investigation of the wool and wool textile industries. The authors argue that to remain **China's Agricultural Trade: Competitive Conditions and Effects on U.S. Exports**, *Beef Cattle Production and Trade* David Cottle, Lewis Kahn, 2014-04-15. Covers all aspects of the beef industry from paddock to plate. **The Efficiency of China's Stock Market** Shiguang Ma, 2017-11-30. By investigating the efficiency of China's stock market in accordance with the theoretical framework of the Efficient Market Hypothesis, this book focuses on weak form and semi-strong form market efficiency. Empirical tests have been intensively conducted on the random walk hypothesis, the presence of market seasonality and the price reaction to publicly released information. In addition, *The Efficiency of China's Stock Market* provides a comparative analysis between China's stock market and other countries' stock markets. **China's Livestock Revolution** Scott A. Waldron, 2007-01-01. The livestock sector of China today is barely recognizable to that of two decades ago. The enormous change and growth of the industry will continue to have profound effects both within China and internationally. Understanding China's livestock revolution requires an in-depth study of the forces at work in the market, policy, institutional and agribusiness environment in rural China. This is achieved through an investigation of the emerging and especially intriguing sheep meat industry. The authors also draw upon their extensive field work based research on other livestock industries in China over the last two decades to enrich the analysis and identify broader trends throughout the livestock sector as a whole. This book is a significant addition to the literature on China's agricultural economy. It is an especially valuable resource for researchers, policy makers and industry participants concerned with China's ruminant livestock and meat sector. **Modernising Agrifood Chains in China** Scott Waldron, 2010-09-13. China faces major challenges in generating viable and inclusive agricultural and rural development. However, rapid economic growth provides new opportunities to meet the challenges. In particular, the development of higher value agrifood chains provides opportunities for rural households to increase their levels of specialisation, scale and incomes and for rural areas to broaden their employment and tax bases. While an agricultural and rural development strategy based on upgrading agrifood chains is widely described and prescribed, it has not proceeded without problems and has been the subject of little rigorous scrutiny. This book presents an industry case study that draws on a novel methodological framework and reliable micro-level data to provide a nuanced, grounded and diachronic analysis of China's efforts to upgrade agrifood chains. While China seeks to fast-track the development of high value agrifood chains through interventionist policies, a more viable and inclusive modernisation strategy is to incrementally develop mid-value agrifood chains through facilitative policies. This and other findings of the book will be of interest to policy makers, researchers and development agencies working on agricultural and rural development in China and other developing and transition countries. Rural Development Abstracts, 2011 **Beef in China** John William

Longworth, Colin G. Brown, Scott A. Waldron, 2001 China's emergence as a beef giant has enormous implications for the world beef market The first up to date and full scale analysis of the booming beef industry of China which produces a phenomenal five times more beef than Australia The product of several years of fieldwork and university research a collaboration with recognised industry authorities here and in China Abundantly illustrated John Longworth is the author of Beef in Japan published in 1983 *Sustainable Development in Western China* Scott A. Waldron, John William Longworth, Colin G. Brown, 2014-05-14 This study provides a guide to analysis of the intricate web of policies institutions that now impact on grassland degradation sustainable development in China's pastoral region It also reveals broader insights into how China grapples with complex ecological livelihood problems as it rapidly modernises develops *China Review International* ,2004

Towards Pax Sinica? Emile Kok-Kheng Yeoh (editor.), 2009 This book examines and critically analyzes the regional political and economical implications of the rise of China from the perspectives of her Northeast and Southeast Asian neighbours the rural and urban developmental dilemmas and challenges the Asian giant is facing on the domestic front as well as the future of the country's continued odyssey of development modernization and reform against the backdrop of consequential policy responses at momentous critical junctures and subsequent State policy development within the context of the exigencies engendered by ethnoterritoriality and the interplay of the central State and peripheral nationalism
