In 1939 in the significant moment just before the involvement of the United States in World War II influential and successful industrial designer Russel Wright conceived a project intended to engage fellow designers craftspeople manufacturers and key department stores in a mission to secure the pre eminence of American design for a national audience The American Way project as Wright called it brought together craft and industry in the design of objects for middle class Americans homes It was an ambitious marketing scheme but far more than that the American Way project was a philosophy of American ness in design when the country was struggling to define itself in all arenas Almost forty designers including Gilbert Rohde Marianne Strengell Raymond Loewy and Wright himself as well as some thirty six prominent craftspeople joined to take American design into every aspect of the domestic interior The venture brought issues of meaning and moral intent such as Modernism s implications for everyday Americans the primacy of native design and the necessity of good design for all to the American consumer Further American Way sought to combine the machine and the hand in an effort to coalesce these two polarities of the industrialized world This paper examines the ideas and objects of the American Way project for what they express about America s mid century cultural and design contexts Situating the project within the career and ideological framework of Russel Wright the paper examines the structure and intent of the American Way program analyzes a representative sample of its designs and details its outcomes Building on previous scholarship on Russel Wright s prolific industrial design career this paper examines the American Way project as a tangible expression of Wright s ideas about native American design American mid century lifestyle and good design for all of the buying public It further places the American Way project at the center of significant movements in design in the pre World War II period

Pulos, 1988 The American Design Adventure continues the fascinating and detailed examination of industrial design begun by Arthur Pulos in American Design Ethic The first volume discussed and illustrated the objects and artifacts the major designers and schools of design from Colonial times to the 1940s This second splendidly illustrated volume carries the story into the heroic era of American industrial design from the 1940s to the 1970s These were the decades of American industrial design's dominance when special exhibitions and world fairs made design a subject of national pride Big business realized the influence that trademarks packaging and corporate identity programs could have on their bottom line and the world of fashion created a consumer demand for name brands and well designed products Industrial design flourished under the capable hands of Raymond Loewy and Charles Eames while corporations like IBM RCA Herman Miller and Knoll were sponsors of the great American design adventure The extraordinary collection of illustrations that Pulos has assembled documents all of these important design trends while evoking the nostalgia of the 50s and 60s when Pop and Rock held sway Pulos probes all aspects of industrial designers and their work in education and private corporations in professional organizations and governmental agencies He also covers prefabricated housing graphics manufactured products from the exotic to the pragmatic and public systems from the sociopolitical to the economic **Mid-Century Modern Interiors** Lucinda Kaukas Havenhand, 2019-01-24 Mid Century Modern Interiors explores the history of interior design during arguably its most iconic and influential period The 1930s to the 1960s in the United States was a key moment for interior design It not only saw the emergence of some of interior design's most globally important designers it also saw the field of interior design emerge at last as a profession in its own right Through a series of detailed case studies this book introduces the key practitioners of the

period world renowned designers including Ray and Charles Eames Richard Neutra and George Nelson and examines how they developed new approaches by applying systematic and rational principles to the creation of interior spaces It takes us into the mind of the designer to show how they each used interior design to express their varied theoretical interests and reveals how the principles they developed have become embodied in the way interior design is practiced today This focus on unearthing the underlying ideas and concepts behind their designs rather than on the finished results creates a richer more conceptual understanding of this pivotal period in modernist design history With an extended introduction setting the case studies within the broader context of twentieth century design and architectural history this book provides both an introduction and an in depth analysis for students and scholars of interior design architecture and design history
