Government Policy and Critical Success Factors of Small Businesses in Singapore Harold Siow Song Teng, 2011-09-22 One of the main economic players responsible for Singapore's economic success is its small and medium sized enterprises or SMEs Their overall success has helped propel the country and its people forward From economic policies to politics Singapore is a planned and regulated economy Singapore's economic success story is actually the result of a form of capitalism carefully calibrated and controlled by the government An important element or aspect of good critical success factors CSFs emerges from the role being played by the government The existence of good government or public policies that are pro business is vital for the success of firms Despite the fact that government policies and CSFs are widely studied in areas around the world including in Singapore there is no comprehensive prediction model available to test if firms have potential to be successful or are more prone to failures Much research investigates the non financial factors contributing to success versus failure of small firms but empirical tests of the predictability of these factors are less common This book which is primarily quantitative positivist in nature will attempt to fill this gap Singapore Criminal Laws, Regulations and

 Tortajada,Yugal Kishore Joshi,Asit K. Biswas,2013-03-05 Singapore s journey during the past 45 years is an outstanding
 example that in spite of multiple hardships pragmatic policies clear visions long term planning forward looking strategies and
 political will as well as a relentless urge to improve can result in strong foundations for sustainable development This book
 describes the journey of Singapore s development and the fundamental role that water has had in shaping it What makes this
 case so unique is that the quest for self sufficiency in terms of water availability in a fast changing urban context has been
 crucial to the way development policies and agendas have been planned throughout the years The authors analyse plans
 policies institutions laws and regulations water demand and water supply strategies water quality and water conservation
 considerations partnerships and importance of the media They assess overall how all these issues have evolved in response to
 the dynamic needs of the city state The study of Singapore shows how a dynamic society can address development without
 losing its focus on the environment In the city state environmental concerns in general and water concerns in particular have
 played a major role in its transformation from a third world to a first world country How and why this transformation took
 place is the main focus of this authoritative book *Singapore Financial and Business Sourcebook* Chwee Huat Tan,2002

 how will Singapore fare and what is the relevance of its model of development for other countries Singapore s successful

 elements are now under threat from rising energy prices and the global financial crisis which started in 2007 that will leave a

 what could take its place This book poses questions for not just for Singapore planners but also for anyone interested in
 modern economics and trade beyond the current era The book also looks into the numerous subsectors within Singapore s

broad energy sector and examines the energy sector's links with the other pillars of its economy: trade, financial, offshore marine operations, manufacturing and transportation. It considers possible threats and challenges: Singapore's rising energy intensity, its vulnerability to energy supply cut-offs, the likely impact of peak oil, terrorism and environmental climate issues. It also looks at China's growing investment and role in Singapore's oil and gas industry. The book is a must-read for an excellent insight into Singapore's energy economy, filled with data, information, interviews and analyses previously not available to the public.

Private Education In Singapore: Contemporary Issues And Challenges Choon-yin Sam, 2017-05-23 Not much has been written about the private education sector in Singapore despite the fact that the sector houses about 300 private education institutions (PEIs) and enrolls about 150,000 students. *Private Education in Singapore: Contemporary Issues and Challenges* is an exciting book that aims to fill a gap in the literature. In the book, the author offers an extensive discussion on: i) the key elements of the sector types and features of the PEIs; ii) the regulatory framework for private education; iii) students' aspiration and the impact of the ASPIRE report on PEIs; and iv) the provision of external degree programme through transnational partnership. The book also tackles the hotly debated discussion in relation to academic quality and standard of PEI courses. The author identifies the reasons some of them have more characteristics of a myth and suggests a number of ways to overcome the issues and challenges.

Productivity In Singapore's Retail And Food Services Sectors: Contemporary Issues Mun Heng Toh, Shandre M Thangavelu, 2016-11-25 The Retail and Food Services sectors play an important role in Singapore. They add to the vibrancy of the economy and contribute to the social well-being of Singaporeans. At the same time, they are often highlighted and scrutinised for their low productivity performance and high reliance on manpower. There is to date a lack of local literature that addresses the issues faced by the two sectors at the enterprise and worker levels. This timely book includes major topics in services productivity in the Singapore context with emphasis on Retail and Food Services. Topics covered include the key productivity levers of the services sectors, holistic productivity measurement framework, effective entrepreneurship, manpower management, promotion by social media, marketing, costing process and accounting sophistication. These areas are explored through literature reviews and in-depth interviews with companies and consumers. The chapters also include recommendations for policy makers and industry stakeholders. Written in a simple and accessible manner, this book will serve as an insightful guide to researchers, policy makers, industry practitioners and enterprises and those who are keen to learn from the Singapore experience.

Singapore International Monetary Fund. Asia and Pacific Dept, 2019-07-15 The 2019

Article IV Consultation with Singapore analyses that Singapore's growth is expected to continue to moderate as export momentum slows and growth drivers shift back to domestic demand. Risks to the near term outlook are tilted to the downside and arise mainly from external sources. Over the medium term, modern services are expected to become increasingly important in driving growth. The report highlights that policies should be geared toward addressing the challenges to growth and inequality posed by shifts in the global economy, aging and technological change, which could also promote external rebalancing. Policies have been aimed at boosting growth while promoting greater equity. The authorities are implementing measures to turn Singapore into a global innovation hub, redoubling efforts to boost labor productivity through investment in human, physical and organizational capital and digitalization. Singapore is also emerging as a regional leader in fintech, supported by the Monetary Authority of Singapore. Meanwhile, social policies are being updated with the aim of raising wages and standards of living for lower skilled Singaporeans.

Intraco: Blazing A Trail Overseas For Singapore? Faizal Bin Yahya, 2014-12-23. Through the lens of the now defunct Singapore government linked company GLC called International Trading Company INTRACO, this book offers a historical analysis of the country's economic development strategy. Since its Independence in 1965, GLCs like INTRACO were introduced by the former Deputy Prime Minister, the late Dr Goh Keng Swee, a pioneer of Singapore's remarkable transformation from Third World to First, to fulfil strategic economic objectives. As the country's lifeblood has been entrepôt trade, INTRACO was created to blaze a trail overseas by facilitating commercial ties behind the Iron Curtain during the Cold War. The eventual divestment of INTRACO highlights the same way in which the Singaporean state is acutely responsive to changing global economic and geopolitical trends. This book is useful to academics.

A History of Modern Singapore, 1819-2005 C.M. Turnbull, 2009-01-01 When C M Turnbull s A History of Singapore 1819 1975 appeared in 1977 it quickly achieved recognition as the definitive history of Singapore A second edition published in 1989 brought the story up to the elections held in 1988 In this fully revised edition rewritten to take into account recent scholarship on Singapore the author has added a chapter on Goh Chok Tong s premiership 1990 2004 and the transition to a government headed by Lee Hsien Loong The book now ends in 2005 when the Republic of Singapore celebrated its 40th anniversary as an independent nation Major changes occurred in the 1990s as the generation of leaders that oversaw the transition from a colony to independence stepped aside in favour of a younger generation of leaders Their task was to shape a course that sustained the economic growth and social stability achieved by their predecessors and they would be tested towards the end of the decade when Southeast Asia experienced a severe financial crisis Many modern studies on Singapore focus on current affairs or very recent events and pay a great deal of attention to Singapore s successful transition from the developing to the developed world However younger historians are increasingly interested in other aspects of the country s past particularly social and cultural issues A History of Modern Singapore 1819 2005 provides a solid foundation and an overarching framework for this research surveying Singapore s trajectory from a small British port to a major trading and financial hub within the British Empire and finally to the modern city state that Singapore became after gaining independence in 1965
