Lord Peasant In Peru A Paradigm:

Lord and Peasant in Peru F. LaMond Tullis, *Poverty and Peasantry in Peru's Southern Andes, 1963-90* R.F. Watters, 1994-06-18 This study views the peasantry in the context of the historical experience of conquest and domination Since the 1950s the community of Chilca has become more mobilized and confident and increasingly affected by capitalism urbanization the Peruvian Revolution and agrarian reform **Peasant Cooperation and Capitalist Expansion in Central Peru** Norman Long, Bryan R. Roberts, 2014-11-06 This book brings together the research into regional development and social change carried out in highland Peru by a team of British and Latin American social anthropologists and sociologists The area studied the Mantaro Valley of central Peru is one of the most densely populated and economically differentiated of highland zones it is also notable for its community based forms of cooperation and its high level of peasant political activity The book presents a series of case studies that examine cooperative forms of organization in relation to developments in the regional economy and to changes in national policy The analysis attempts to avoid interpreting local processes merely as responses to externally initiated change It stresses instead the need to consider the interplay of local and national forces because local groups and processes themselves affect the pattern of regional and national development The case studies cover a range of political and economic topics from peasant movements to the achievements and shortcomings of government sponsored agricultural and manufacturing cooperatives The concluding chapter by the editors explores the theoretical implications of these studies **Peasants, Politics and Revolution** Joel S. Migdal, 2015-03-08 During the last quarter century peasant participation in politics has increased markedly in parts of Latin America and Asia Why the poor and vulnerable peasant population has chosen to leave the confines of the village for political activity and at times for sustained revolution is the question this book explores The author draws on informal interviews and observation of peasants in Mexico and India and on fifty one community studies of peasants in Asia and Latin America compiled by ethnographers in the last forty years He suggests that severe economic crises have driven peasants to roles in the larger economy outside the village where they are initially attracted to politics by material incentives Originally published in 1975 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 *Radicalism In The Contemporary Age, Volume 1* Seweryn Bialer, Sophia Sluzar, 2019-08-16 This volume Sources of Contemporary Radicalism begins with Seweryn Bialer's examination of the definitional aspects of radicalism as well as with the identification of specific contemporary sources of the radical impulse and the social groups that are the carriers of radicalism within society In the next two chapters Seymour Lipset and Stanley Rothman consider the case of the United

States Lipset asks anew the question posed by Werner Sombart at the beginning of this century Why is there no socialism in the United States From the perspective of a century of literature addressed to this question he provides his own critique and explanation Rothman considers the relatively new phenomenon of student radicalism in the United States and on the basis of interviews with student activists and results of tests they agreed to take he offers hypotheses concerning their psychological motivation Sidney Tarrow's chapter presents a comparison and contrast of the societal sources contributing to the growth of radical movements in post World War II France and Italy Henry Landsberger in his chapter concentrates on one societal group the peasantry Landsberger addresses the methodological issue that arises in defining peasant discontent as radicalism and examines what it is that provides a new dimension to peasant discontent in modern times In the final chapter William Overholt presents a valuable interpretative survey of the literature on radicalism

Energy and Structure Richard Newbold Adams, 2014-02-19 All social structures are essentially power structures dependent on energy The concept of power and the role of energy in social organization are crucial and timely concerns especially in light of the current apprehension about future energy resources In *Energy and Structure* Richard N Adams argues that social power affects humanity's approach to ecological economic and political problems directing people to seek solutions that are often deceptively shortsighted Adams an anthropologist proposes that social power is directly derived from control over energy processes He identifies how power and mentalistic structures constitute fundamental determinants that shape the lives of people at all stages of cultural development forcing them to accept alternatives often far removed from their desires His central thesis is that the amount of power in any system varies with the amount of control exercised over the environment and that increasing power and control lead to increasing centralization of decision making social marginalization and environmental despoliation Thus the more highly developed societies by virtue of their greater controls are responsible for the greater ultimate subordination and destruction of human potential as humanity combines technological advances with a growing inability to exercise good judgment with respect to our own survival *Energy and Structure* begins with an examination of the basic theory of social power what it is and how it works Adams defines and differentiates between the concepts of power and control authority and legitimacy power domains and levels He then examines the underlying metatheory of energetic and mentalistic structures and provides an analytic model of the evolution of power from the primitive band to modern nations He predicts the emergence of supranational blocs and discusses other future possibilities Throughout his theoretical points are solidly supported by examples drawn from a wide range of cultures
