Miles from the laid back lifestyle of No Name Key and just shy of the raucous nightlife of Miami and South Beach lies Coconut Grove a tropical oasis with a distinct Bohemian flair Lately a seedy underside has emerged along the Grove's waterfront preying on adventurous young women Somewhere amid all the glitz and glamour hides a thief who stole a fortune in Aztec emeralds Or did he Jesse McDermitt must first determine if the victim herself is a thief The trail of clues leads him to evidence that the thief may be involved in a string of more heinous crimes Jesse and Chyrel enlist the help of the recently returned Charity and the trio go undercover at a floating swinger's party headed for the Bahamas which may well be a front for torture and murder When a sudden violent storm strikes Stiltsville Jesse finds himself alone on the ocean trying to recover the treasure and put a murderer behind bars but first he must win the battle with Mother Nature Forty-Seven Years Aloft Brian Burdett,2019-03-30

A journey through 47 years of aviation history through the memories of one pilot From antics in jet fighters and civil aviation to retirement Vintage Airfix It all began for London born Brian Burdett as it has for so many with the Air Cadets flying Tiger Moths at the age of just fourteen He obtained his civil license at the age of seventeen and six months later he was accepted into the RAF The year was 1954 It was to fly Hunters that Brian was posted to 257 Burma Squadron at Wattisham in Suffolk where the jets were frequently scrambled to intercept Soviet intruders in the dark days of the Cold War His RAF career developed further with a transfer to Transport Command where Brian could fly the planes he loved the best the big jets After training on Handley Page Hastings Brian was given the chance to fly the famous de Havilland on long distance routes between the RAF bases around the world through the Middle East Pakistan Sri Lanka and down to South Africa and Australasia He eventually turned to the commercial world flying Falcons VC 10s Tristars and every type of Boeing 747 for a variety of airlines His adventures are legion From a double engine failure on takeoff and still managing to land safely to losing control in cloud and leveling off feet from the ground to a midair near miss with an American aircraft that no one knew was there to spotting a strange object that remains unidentified to this day A fascinating career in military aviation and commercial aviation spanning 47 years Highly Recommended Firetrench *Turned On!* S. P. Perone,2014-09-17

No decade before or since witnessed cultural technical and social changes as dramatic as the 1960s Pop culture reflected a transition from the rigid 1950s to the permissive 1970s The Vietnam War spawned student protests draft card burning and a hippie counter culture Caught up in these turbulent times was author Sam Perone a naive young professor

beginning his career at the tender age of twenty three young enough to run in student circles Perones unlikely arrival in 1962 at a prestigious university lacking credentials and experience launched an erratic journey laced with angst liberating diversions exciting research bitter conflicts dismal failures and exhilarating successes In *Turned On* he shares his own life story against the backdrop of the times A collection of personal experiences that characterize that turbulent decade this memoir tells about the time Perone got tipsy during his university job interview the weeks he slept in chemistry labs the explosions floods flashes pranks and jolts that marked his early research the wild parties fueled by lab alcohol his unexpected love affair in 1967 San Francisco the sometimes serious sometimes disturbing and always laughable instances of faculty clashes and finally his pivotal involvement in the minicomputer revolution *Turned On* describes a personal journey toward self realization in a world that was rapidly changing in fascinating ways It captures the impact on campus life of historical events that defined the 1960s but also provides insights to the inner workings of the academic world in that era and beyond

The Bamboo Fire William E. Mitchell, 2017-09-29 Anthropology is primarily done in the field unlike the laboratory oriented experimental sciences Experimental sciences make their observations in constructed settings that permit variables influencing the outcome of the experiment to be known and controlled In contrast anthropology s object of inquiry like the science of ethology is life experience in its natural setting To understand how people organize their lives both in thought and in action one must settle among them for a very long time The Wape of Papua New Guinea inhabit a mountainous rain forest and live in sedentary villages They are slash and burn horticulturalists marriage is by bride wealth and polygyny is permitted

but rare Male status is egalitarian and although the society is hierarchical in terms of sex and age differences both women and the young enjoy higher status than in many other New Guinea societies While most Wape are nominal Christians traditional religious beliefs and practices are of major importance This book concentrates on describing the field work process by giving the reader a feeling of the reflexive nature of this experience It demonstrate not only how the anthropologist proceeds in her or his work but describes the social and psychological context in which that work evolves and how anthropologists respond to it both within oneself and in communication with others While it is a book about the Wape people it is also a book about how one anthropologist tried to understand them It integrates the subjective and objective into a common research method Related to the book the author has published a film Magical Curing and a CD The Living Dead and Dying Music of the New Guinea Wape
