Perceiving Environmental Quality Research And Applications:

Perceiving Environmental Quality Kenneth Craik, 2013-03-09 The purpose of this publication is to report on a series of research workshops which examined the place of environmental perception in a comprehensive system of indices for assessing and monitoring trends in environmental quality The specific objectives of the workshops were to 1 define the state of the art in research on perception of environmental quality and identify salient conceptual and methodological issues 2 delineate potential uses of perceived environmental quality indices PEQIs and related issues regarding ways in which PEQIs might enhance implementation revision or refinement of policy orientations 3 identify the types of research which would assess adequately the efficacy of the development and the application of PEQIs and 4 out line a realistic pragmatic research strategy that relates to potential uses and identified policy issues The workshops were supported by a grant from the National Science Foundation No GSOC75 0782 and were held during the spring and summer of 1975 in Amherst Massachusetts and New York City Contributed chapters for this volume were commissioned with funds from the Institute for Man and Environment University of Massachusetts Scientific contributors to the understanding of environmental perception have increased substantially over the last decade along with recognition that this realm of knowledge is crucial for an informed perspective on the impact of man on the environment At the same time there exists general consensus that the field remains diffuse and uncoordinated Lowenthal 1972b Perceiving environmental quality; research and applications K.

Magnusson, David Magnusson, 2013-05-13 Published in the year 1981 *Toward a Psychology of Situations* is a valuable contribution to the field of Social Psychology *Profile and Measurement of Social Well-being Indicators for Use in the Evaluation of Water and Related Land Management Planning* Patricia K. Guseman, Katheryn T. Dietrich, 1978 As a part of the continuing development of the Water Resources Assessment Methodology WRAM this report focuses on the Social Well Being SWB account as defined by the Water Resource Council's Principles and Standards An outline of SWB categories subcategories and variables as interpreted from Principles and Standards is included In addition for selected variables definitions information about measurement and suggestions for prediction are provided It is noted that although the set of variables discussed in this report assists in defining SWB the list is tentative not exhaustive and is intended for use within the framework of WRAM The particulars of each planning study and the judgment of professionals and publics will dictate omission of some variables and inclusion of others Author **Environmental Permits** Donna Rona, 2012-12-06 Environmental permits enable regulatory agencies to control the disturbance and degradation of the environment caused by man's activities Created by governments through legislation the permit processes are administered by elected officials Environmental legislation is relatively new as an independent field of the law the laws themselves are primarily a

conglomeration of older legal doctrines from other fields of law modified and adapted for particular situations Landau and Rheingold 1971 Like other laws environmental laws are meant to serve and protect the rights and well being of the public However like other laws they have created confusion a proliferation of costly paperwork and some inequities Numerous statutes dealing with most aspects of pollution exist at every level of government so many in fact that they frequently conflict and overlap These statutes establish a public policy toward polluters They also empower the regulatory bodies that issue permits It would be impossible to compile a list of requirements for each type of permit Therefore this book will acquaint the reader with the common aspects of environmental permits their terminology components and application processes This book covers the permit process from initial agencies applicant contacts through application parts and procedures to application approval Special emphasis has been placed on bringing together copies of laws and lists of agencies as appendices The appendices give the reader easy access to materials that will help clarify the permit process *Environmental Design Evaluation* Arnold Friedmann, Craig Zimring, Ervin Zube, 2013-12-14 As the nature of the field of environment behavior relations is interdisciplinary the collaboration of three persons of diverse professional backgrounds in writing this book is therefore not surprising This collaboration started in 1972 with the offering of a graduate seminar Environment Behavior and Design Evaluation at the University of Massachusetts Several research projects dealing with design evaluation which have been conducted at the University are also included as case studies in this book Chapter III the ELEMN study and the Visitor Center study Two of the authors have worked as part of the instructional team in the seminar and all of the authors have participated in varying degrees in the ELEMN Project The authors backgrounds in design psychology and landscape architecture suggest by example that professionals with diverse backgrounds but a common interest in environment behavior problems can indeed learn to communicate and to collaborate Since design evaluation is a new field and very little specific literature on the subject exists to date we hope this book fills a current need **Directions in Person-Environment Research and Practice (Routledge Revivals)** Jack Nasar, Wolfgang F. Design by Competition Jack L. Nasar, 1999-02-28 What meanings do buildings and places convey to the people who use and visit them Too often design competitions and signature architecture result in costly eyesores that do not work How can sponsors and clients get more meaningful results In answer to these questions Dr Nasar supported by riveting studies of competitions and Peter Eisenman's competition winning design for the Wexner Center at the Ohio State University suggests the use of pre jury evaluation PJE He shows the potential value of this approach as well as visual quality programming for many kinds of environmental design for which the client wants to convey certain desirable meanings The studies from those specific to the Wexner Center to those covering the scope of history point to an alternative method for shaping the visual form of buildings places and cities
