

MARIANNE VAN DEN WIJNGAARD

♂ REINVENTING THE SEXES ♀

The book cover features a reproduction of the Mona Lisa, but with a male figure instead of a female. The figure has a mustache and a goatee. A large, bold, black male symbol (♂) is superimposed over the word 'REINVENTING'. The word 'THE' is written in a smaller, white, sans-serif font, and 'SEXES' is written in a larger, white, sans-serif font, both following the curve of the figure's body. A large, bold, black female symbol (♀) is superimposed over the word 'SEXES'.

Robert Alan Brookey

Reinventing The Sexes Biomedical Construction Of Femininity And Masculinity:

Reinventing the Sexes Marianne van den Wijngaard,1997 Examines the influence of traditional views of femininity and masculinity on brain research **Reinventing the Sexes** Marianne van den Wijngaard,1991 *Reinventing the Male Homosexual* Robert Alan Brookey,2002-03-15 Reinventing the Male Homosexual The Rhetoric and Power of the Gay Gene examines the assumption that embracing the biological research on homosexuality is a viable political strategy for the gay rights movement The biological argument for gay rights is treated as a bio rhetoric a means of incorporating scientific research into public debates The book investigates the biological research on which this gay rights argument is based and explores how male homosexuality is conceptualized in the fields of behavioral genetics neuroendocrinology sociobiology and evolutionary psychology Robert Alan Brookey demonstrates that most biological research begins with the assumption that male homosexuality is a state of physical effeminate pathology Although biological research may seem to support a pro gay rights agenda the same research can actually be used to support conservative political interests *Globalism and Gendering Cancer* Miriam O'Kane Mara,2019-11-07 This book connects a rhetorical examination of medical and public health policy documents with a humanistic investigation of cultural texts to uncover the link between gendered representations of health and cancer The author argues that in western biomedical contexts cancer is considered a women s disease and their bodies are treated as inherently oncogenic or cancer producing which leads to biomedical practices that adversely impact their bodily autonomy She examines how these biases traverse national boundaries by examining the transmission of biomedical cancer practices from the US and international organizations to Kenya This book is suited to scholars and students working in the fields of Rhetorics of Health and Medicine Medical Humanities and Gender Studies It is also of interest to medical professionals and readers interested in globalism and global health **Women, Science, and Technology** Mary Wyer,Mary Barbercheck,Donna Cookmeyer,Hatice Ozturk,Marta Wayne,2013-09-11 Women Science and Technology is an ideal reader for courses in feminist science studies This third edition fully updates its predecessor with a new introduction and twenty eight new readings that explore social constructions mediated by technologies expand the scope of feminist technoscience studies and move beyond the nature culture paradigm *How the Clinic Made Gender* Sandra Eder,2022-06-07 An eye opening exploration of the medical origins of gender in modern US history Today a world without gender is hard to imagine Gender is at the center of contentious political and social debates shapes policy decisions and informs our everyday lives Its formulation however is lesser known Gender was first used in clinical practice This book tells the story of the invention of gender in American medicine detailing how it was shaped by mid twentieth century American notions of culture personality and social engineering Sandra Eder shows how the concept of gender transformed from a pragmatic tool in the sex assignment of children with intersex traits in the 1950s to an essential category in clinics for transgender individuals in the 1960s Following gender outside the clinic she reconstructs the variable ways feminists

integrated gender into their theories and practices in the 1970s The process by which ideas about gender became medicalized enforced and popularized was messy and the route by which gender came to be understood and applied through the treatment of patients with intersex traits was fraught and contested In historicizing the emergence of the sex gender binary Eder reveals the role of medical practice in developing a transformative idea and the interdependence between practice and wider social norms that inform the attitudes of physicians and researchers She shows that ideas like gender can take on a life of their own and may be used to question the normative perceptions they were based on Illuminating and deeply researched the book closes a notable gap in the history of gender and will inspire current debates on the relationship between social norms and medical practice

Queering Elementary Education William J. Letts IV, James T.

Sears, 1999-10-27 Queering Elementary Education is not about teaching kids to be gay lesbian bisexual or straight It is not part of a sinister stratagem in the gay agenda Instead these provocative and thoughtful essays advocate the creation of classrooms that challenge categorical thinking promote interpersonal intelligence and foster critical consciousness Queer elementary classrooms are those where parents and educators care enough about their children to trust the human capacity for understanding and their educative abilities to foster insight into the human condition Those who teach queerly refuse to participate in the great sexual sorting machine called schooling where diminutive GI Joes and Barbies become star quarterbacks and prom queens while the Linuses and Tinky Winkies become wallflowers or human doormats Queering education means bracketing our simplest classroom activities in which we routinely equate sexual identities with sexual acts privilege the heterosexual condition and presume sexual destinies Queer teachers are those who develop curriculum and pedagogy that afford every child dignity rooted in self worth and esteem for others In short queering education happens when we look at schooling upside down and view childhood from the inside out This groundbreaking volume demands we explore taken for granted assumptions about diversity identities childhood and prejudice

Queering Elementary Education

William J. Letts, James Thomas Sears, 1999 This volume assembles a range of writers from diverse backgrounds and geographies to examine five broadly defined areas in elementary education foundational issues social and sexual development curriculum the family and gay lesbian educators and their allies

Women's Health and Medicine:

Transforming Perspective Alice J. Dan, Sue V. Rosser, 2003-06 A vital collection of essays on women's health and women's health studies edited by leaders in the field

Beyond the Natural Body Nelly Oudshoorn, 2003-09-02 It is now impossible to imagine a world without sex hormones Women all over the world take hormonal pills to control their fertility and estrogen and progesterone have become the most widely used drugs in the history of medicine But why has the female rather than the male body become increasingly subjected to hormonal treatment Nelly Oudshoorn challenges the idea that there exists such a thing as a natural body and shows how concepts such as the hormonal body assume the appearance of natural phenomena by virtue of the activities of scientists rather than being rooted in nature *Beyond the Natural Body* tells the fascinating story

of scientists search for the ovaries testes and urine required to develop the hormonal concept investigating how sex hormones have shaped our understanding of sex and the body trans forming science and medicine and ultimately redefining the relationship of women to reproduction Nelly Oudshoorn concludes by evaluating the mixed blessings of the hormonal revolution
