Security Protocols 9th International Workshop Cambridge Uk April 25/27 2001 Proceedings:

Security Protocols Bruce Christianson, Bruno Crispo, James A. Malcolm, Michael Roe, 2002-09-23 Hello and welcome
These are the proceedings of the 9th International Workshop on Security Protocols the first to be held in the new millennium
This year our theme was mobile computing versus immobile security As usual the insights and challenges which emerged
during the workshop are reflected in the position papers which appear here in rewritten form Transcripts are also included of
the discussions which took place in Cambridge as the initial versions were presented These transcripts are intended to provide
a perspective on lines of argument which are worth pursuing further Our desire is that you will join with us in this activity
and that as a result you will like many of our participants feel moved to propound something quite different from what you
originally planned Our thanks as always to Prof Roger Needham FRS and to Microsoft Research Ltd Cambridge for the use of
the meeting room and coffee machine Thanks also to Lori Klimasewska of the University of Cambridge Computing Service
for transcribing the audio tapes and for revealing in Audrey James a previously unsuspected double life of a well known
double agent and to Dr Mary Buchanan for her assistance in editing the transcripts into a Thucydidean mould Actually we are
often asked how we go about producing the transcripts especially upon those occasions when for various reasons no audio
recording was made This year we bow to pressure and reveal the details of our methodology in the Afterword

Security Protocols Bruce Christianson, Bruno Crispo, William S. Harbison, Michael Roe, 1999-02-26 This book constitutes the thoroughly
refereed post workshop proceedings of the 6th International Workshop on Security Protocols held in Cambridge UK in April
1998 The 15 revised papers presented as position statements are followed by transcripts of the discussions between the
authors and the audience Also included is a report on the final panel discussion on future directions in security protocols
research and developments Thus the volume reflects the lively interaction at the workshop The papers are devoted to the
interrelations between trust and delegation exploring the implications and effects of these upon such issues as authorization
security policy and cryptosystems and component design
