

HOW MUCH DO YOU KNOW ABOUT DEEP VEIN THROMBOSIS?

DEEP VEIN THROMBOSIS

is the formation of a blood clot (also known as thrombosis) in a deep vein. DVT predominantly occurs in the legs but also can occur in the pelvic area or arms. It can lead to partial or complete blockage of circulation which will cause serious medical problems.

WARNING SIGNS OF DVT

You should contact your doctor if you experience the following:

- Pain
- Warmth
- Tenderness
- Redness
- Swelling

ACROSS THE COUNTRY

Nearly 2 million Americans are affected by DVT each year.

Up to 600,000 people are hospitalized due to DVT each year.

COMPLICATIONS

In the most serious cases of DVT, a part of the clot can break away and travel through the bloodstream to the lungs. This can cause a **PULMONARY EMBOLISM (PE)** and is potentially life threatening.

WARNING SIGNS OF PE

If a blood clot has travelled to your lungs, you may experience:

- Shortness of breath
- Rapid breathing
- Chest pain
- Rapid heart rate
- Light headedness

CAUSES OF DVT

The formation of a blood clot can happen to anyone at any age or health. Sometimes there are no warning signs or symptoms. You should be aware of the circumstances that can trigger a blood clot.

Pregnancy

Pregnant women are 5 times more likely to develop a DVT than non-pregnant women. Women taking oral contraceptives or hormone replacement can be at increased risk of DVT, as well.

Health Factors

You have control over a number of health factors that can increase your risk of DVT, such as obesity, smoking, taking birth control pills and dehydration.

Extended Bed Rest

You should move around as soon as possible after having been confined to a bed, such as after surgery, illness or injury.

STAY ACTIVE

Immobility increases the chances of developing a blood clot. If you're sitting for an extended period of time - like on an airplane or at work - get up, stretch your legs and walk around. These foot exercises can also help create blood flow.

Absorbing Perfections Moshe Idel, 2008-10-01 In this wide ranging discussion of Kabbalah from the mystical trends of medieval Judaism to modern Hasidism one of the world's foremost scholars considers different visions of the nature of the sacred text and of the methods to interpret it Moshe Idel takes as a starting point the fact that the postbiblical Jewish world lost its geographical center with the destruction of the temple and so was left with a textual center the Holy Book Idel argues that a text oriented religion produced language centered forms of mysticism Against this background the author demonstrates how various Jewish mystics amplified the content of the Scriptures so as to include everything the world or God for example Thus the text becomes a major realm for contemplation and the interpretation of the text frequently becomes an encounter with the deepest realms of reality Idel delineates the particular hermeneutics belonging to Jewish mysticism investigates the progressive filling of the text with secrets and hidden levels of meaning and considers in detail the various interpretive strategies needed to decodify the arcane dimensions of the text

Blood and Justice

Pete Moore, 2003-06-13 The 17th Century Parisian doctor who made blood transfusion history In 1667 a Parisian doctor by the name of Jean Baptiste Denis performed an operation that had never previously been attempted he transfused blood into another human being This was the first attempt at a procedure that over subsequent centuries was to save the lives of thousands of people But at the time Denis was nearly convicted of murder The victim of Denis s experiment was a middle aged man suffering from mad rages Denis believed that by transfusing the blood of a calf into the man the man would assume the placid nature of the calf The experiment appeared to work The highly toxic blood made the man in question very ill and therefore very placid It is now believed that the man was in fact suffering from syphilis which induced his violent behaviour The symptoms of the syphilis would also have been relieved by the high fever that the toxic blood would have induced Encouraged by this apparent success though unaware of the reasons for it many other people attempted similar experiments Eventually the man died and Denis was arrested for his murder Further investigations revealed however that the man had not in fact died from the blood transfusion although he certainly would have done so very shortly but from cyanide placed in

his food by his wife Giving an insight into the first attempts at a procedure that has gone on to be developed for the benefit of humanity and into the symbolism of blood throughout the history of medicine Blood and Justice raises ethical issues that are as relevant today as they were at the time
