R. R. Tolkien Nicholas Birns,2023-12-22 This volume analyzes the literary role played by history in the works of J R R Tolkien It argues that the events of *The Lord of the Rings* are placed against the background of an already existing history both in reality and in the fictional worlds of the books History is unfolded in various ways both in explicitly archival annals and in stories told by characters on the road or on the fly and in which different visions of history

emerge In addition the history within the work can resemble or be patterned on histories in our world These histories range from the deep past of prehistoric and ancient worlds to the early medieval era of the barbarian invasions and Byzantium to the modern worlds of urbane civility and a paradoxical longing for nature and finally to great power rivalries and global prospects The book argues that Tolkien did not employ these histories indiscriminately or reductively Rather he regarded them as aspects of aesthetic and representative figuration that are above all literary While most criticism has concentrated on Tolkien's use of historical traditions of Northern Europe this book argues that Tolkien also valued Southern and Mediterranean pasts and registered the Germanic and the Scandinavian pasts as they related to other histories as much as his vision of them included a primeval mythic aura **The Illustrated Dublin Journal** ,1862 **English Journal** ,2000
