Switching Time Richard Baer,2007-10-02 A n absorbing journey through a psychiatrist s dauntingly challenging first case of multiple personality disorder from the beginning of therapy to stable integration and recovery Colin Ross author of Multiple Personality Order and The Osiris Complex In 1989 Karen Overhill walks into psychiatrist Richard Baer s office seeking help for her depression and a persistent memory problem she routinely loses parts of her day finds herself in places she doesn t remember going to and is told about conversations she doesn t remember having While trying to discover the root cause of her memory loss Baer works to gain Karen s trust but it s years before he learns the true extent of the trauma buried in her past What she eventually reveals is nearly beyond belief a narrative of a childhood spent grappling with unimaginable horror Then Baer receives an envelope in the mail It s marked with Karen s return address but contains a letter from a little girl who writes that she s seven years old and lives inside of Karen Soon Baer receives letters from others claiming to be parts of Karen Under hypnosis these alternate Karen personalities reveal themselves in shocking variety One alter is a young boy filled with frightening aggression another an adult male who considers himself Karen s protector a third a sassy flirt who seeks dominance over the others It s only by compartmentalizing her pain guilt and fear in this fashion that Karen has been able to function since childhood Realizing that his patient represents an extreme case of multiple personality disorder Baer faces the daunting task of creating a therapy that will make Karen whole again As powerful as Sybil or The Three Faces of Eve *Switching Time* is the first complete account of such therapy to be told from the perspective of the treating physician a stunningly devoted healer who worked selflessly for decades so that Karen could one day live as a single human being *Race, Time, and Utopia* William M. Paris,2024 Racial injustice at its core is the domination of time Utopia

has been one response to this domination The racially dominated are not free to define what counts as progress they are not free from the accumulation of past injustices and most importantly they are not free from the arbitrary organization of work in capitalist labor markets Racially unjust societies are forms of life where the justifications for how to organize time around life labor and leisure are out of the hands of the dominated In *Race Time and Utopia* William Paris provides a theoretical account of utopia as the critical analysis of the sources of time domination and the struggle to create emancipatory forms of life Rather than focusing on inclusion and equality before the law as found in liberal theories of racial injustice Paris analyses the neglected utopian tradition of justice in black political thought that insists justice can only be secured through the transformation of society as a whole This transformation is nothing less than the democratic transformation of how organize and narrate our shared time Bringing into conversation the work W E B Du Bois Martin Delany Marcus Garvey Frantz Fanon and James Boggs with the critical theory of Karl Marx Ernst Bloch Rahel Jaeggi and Rainer Forst Paris reconstructs a social theory and normative account of forms of life as the struggle over how time will be organized asking Can there be freedom without a new order of time

Chaucer and the Ethics of Time Gillian Adler, 2022-02-15 Geoffrey Chaucer wrote at a turning point in the history of timekeeping but many of his poems demonstrate a greater interest in the moral dimension of time than in the mechanics of the medieval clock Chaucer and the Ethics of Time examines Chaucer's sensitivity to the insecurity of human experience amid the temporal circumstances of change and time passage as well as strategies for ethicising historical vision in several of his major works While wasting time was sometimes viewed as a sin in the late Middle Ages Chaucer resists conventional moral dichotomies and explores a complex and challenging relationship between the interior sense of time and the external pressures of linearism and cyclicity Chaucer's diverse philosophical ideas about time unfold through the reciprocity between form and discourse thus encouraging a new look at not only the characters' ruminations on time in the tradition of St Augustine and Boethius but also manifold narrative sequences and structures including anachronism
