[Adoption and Foster Care](#) Deborah N. Silverstein,Susan Livingston Smith,2008-12-30 Normally our relationships with our brothers and sisters are the longest relationships in our lives outlasting time with our parents and most marriages today The sibling relationship is emotionally powerful and critically important giving us a sense of continuity throughout life So what happens when a child loses contact not only with his or her parents but with siblings too That is what happens in thousands of cases each year inside the child welfare system Children are surrendered by parents or taken by the government and placed in the foster care system There they are often separated and sent to different foster families or adopted by different couples In this work a team of top experts details for us how this added separation further traumatizes children This stellar

team of internationally known researchers some of whom are themselves adoptees shares with us hard poignant and personal insights as well as ways we might act to solve this widespread problem Contributors address not only the importance of nurturing sibling bonds and mental health strategies to support those relationships but also the legal rights of siblings to be together as well as issues in international adoptions Emerging and standing programs to encourage and facilitate adoptions that keep siblings together are featured as are programs that at least enable them to stay in contact

The Wellbeing of Children in Care Kwame

Owusu-Bempah, 2010-05-07 This important book looks at how children in care can best be helped to attain desirable developmental outcomes Owusu Bempah introduces his notion of socio genealogical connectedness to help explain why children in kinship care fare better than children in non relative foster care

Freedom and Responsibility in Reproductive Choice J R Spencer, Antje du Bois-Pedain, 2006-04-03

What responsibilities if any do we have towards our genetic offspring before or after birth and perhaps even before creation merely by virtue of the genetic link What claims if any arise from the mere genetic parental relation Should society through its legal arrangements allow fatherless or motherless children to be born as the current law on medically assisted reproduction involving gamete donation in some legal systems does Does the possibility of establishing genetic parentage with practical certainty necessitate reform of current legal regimes of parenthood And what limits if any should we set on parental procreative choices in the interests of future children particularly with regard to genetic engineering and related techniques These are the questions explored in this book by some of the foremost legal bioethical and biomedical thinkers Assembled with a view to assisting the reader to reflect critically on the ongoing social experiment which medically assisted reproduction is today the essays in this collection highlight what are and what else might in the nearby future become possible reproductive options and respond to the difficulties we encounter in assessing these practices and possibilities from our traditional ethical vantage points
