Informer Magazine ,2008 **The Lost Planets** John Wenz,2019-10-08 A fascinating account of the pioneering astronomer
who claimed erroneously to have discovered a planet outside the solar system There are innumerable planets revolving
around innumerable stars across our galaxy Between 2009 and 2018 NASA s Kepler space telescope discovered thousands of
them But exoplanets planets outside the solar system appeared in science fiction before they appeared in telescopes
Astronomers in the early decades of the twentieth century spent entire careers searching for planets in other stellar systems
In *The Lost Planets* John Wenz offers an account of the pioneering astronomer Peter van de Kamp who was one of the first to
claim discovery of exoplanets Van de Kamp working at Swarthmore College s observatory announced in 1963 that he had
identified a planet around Barnard s Star the second closest star system to the Sun He cited the deviations in Barnard s star s
path wobbles that suggested a large object was lurching around the star Van de Kamp became something of a celebrity
appearing on a television show with Mr Wizard Don Henry but subsequent research did not support his claims Wenz
describes van de Kamp s stubborn refusal to accept that he was wrong discusses the evidence found by other researchers
and explains recent advances in exoplanet detection including transit radial velocity direct imaging and microlensing Van de
Kamp retired from Swarthmore in 1972 and died in 1995 at 93 In 2009 Swarthmore named its new observatory the Peter van
de Kamp Observatory In the 1990s astronomers discovered and confirmed the first planet outside our solar system In 2018
an exoplanet was detected around Barnard s Star not however the one van de Kamp thought he had discovered in 1963 *A*
