Managing Welfare Reform In New York City:

Managing Welfare Reform in New York City Emanuel S. Savas, 2005 Welfare reform was a spectacular success in New York under Mayor Giuliani despite the city's history of liberal social programs and its huge entrenched welfare system. The city reduced the numbers on welfare from 1 120 000 to 460 000 by changing the organizational culture protecting against fraud insisting on work first adapting information technology and contracting for job placement. The organizational culture was transformed by bold leadership that changed the welfare agency's mission and goals overcame internal resistance and prevailed over politicians who had a vested interest in the status quo and the media that were opposed to welfare reform. Welfare fraud was largely eliminated by dropping from the rolls those who were working and could not appear for in person interviews by fingerprinting recipients to catch those enrolled under multiple identities and those receiving welfare checks from other jurisdictions by uncovering hidden income by enrolling new applicants only after thorough investigation and by tightening controls to prevent fraud by corrupt employees. JobStat a computer based system modeled after the Police Department's system used to track precinct activity was developed to track the status of welfare recipients and to monitor the performance of the Job Centers which were formerly called welfare offices. JobStat focused the attention of department personnel on performance indicators rather than on minutely specified rules. The Giuliani administration's major contribution to national welfare reform was the creation of the only system in the country with large scale alternative work arrangements that was able to acculturate large numbers of the never employed to the world of work.

Reforming Social Services in New York City Thomas J. Main, 2025-09-15 *Reforming Social Services in New York City* examines efforts across six decades to respond to poverty joblessness and homelessness through the establishment and periodic restructuring of the city's Human Resources Administration HRA and related social welfare agencies. As Thomas J. Main shows through archival research and interviews with key figures the HRA has been the focus of several mayoralties. The John Lindsay administration's creation of the HRA in 1966 was a classic liberal effort to fight poverty. Rudy Giuliani brought dramatic change by implementing work oriented welfare reform and the Bill de Blasio administration attempted to install a progressive social welfare agenda within the city's social service agencies to reduce inequality. *Reforming Social Services in New York City* tells the story of these efforts assessing the strategies employed and the success of their outcomes concluding that major nonincremental change in urban welfare policy is not only possible but has been effective.

Managing Welfare Reform in Five States Sarah F. Liebschutz, 2000-10-01 Analyzes the responses of five states Florida Mississippi New York Washington and Wisconsin to the challenges of implementing welfare reform. **The ^AOxford Handbook of New York State Government and Politics** Gerald Benjamin, 2012-09-03 *The Oxford Handbook of New York State Government and Politics* brings together top scholars and former and current state officials to explain how and why the state is governed the way that it is. The book's thirty one chapters assemble new scholarship in key areas of governance in New York document the

state's record in comparison to other U.S. states and identify directions for future research **New Black Renaissance**

Manning Marable, Adina Popescu, Khary Jones, Patricia Lespinasse, 2015-12-03 Against a backdrop of multiculturalism and Afrocentricity in the intellectual traditions of African American studies this book sets new standards and directions for the future. It is the first book to systematically address the many themes that have changed the political and social landscape for African Americans. Among these changes are new transnational processes of globalization, the devastating impact of neoliberal public policies upon urban minority communities, increasing imprisonment and attendant loss of voting rights, especially among black males, the surging of Hispanic population and widening class differences as deindustrialization, crack cocaine, and gentrification entered urban communities. Marable and a cast of influential contributors suggest that a new beginning is needed for African American scholarship. They explain why Black Studies needs to break its conceptual and thematic limitations, exploring blackness in new ways and in different geographic sites. They outline the major intersectionalities that should shape a new Black Studies: the complex relationships between race, gender, sexuality, class, and youth. They argue that African American Studies scholarship must help shape and redirect public policies that affect black communities, working with government foundations and other private institutions on such issues as housing, health care, and criminal justice. *Improving Public Services* Douglas J. Besharov, Karen J. Baehler, Jacob Alex Klerman, 2017 This volume spotlights recent advances in the worldwide use of quantitative performance measures in the public sector, especially approaches that incorporate program evaluation techniques. Chapters include single country case studies, multi country comparisons, and thoughtful essays on the challenges of making performance measurement and management work in diverse settings. *Handbook of Crisis and Emergency Management* Ali Farazmand, 2001-06-22 Including contributions from sixty international authors, this book examines emergency responses to environmental dangers such as chemical fires, hazardous material, and oil spills, nuclear reactor accidents, and earthquakes, and crises in the environment, global public service, and politics. It covers a wide range of international issues and topics using various analyses, including critical, descriptive, empirical, quantitative, and normative methods. The book discusses approaches to natural disasters, resolutions to cultural, religious, and political tensions, terrorism, and the potential use of biological, chemical, and nuclear weapons, the role of crisis public relations, and more. **Public Housing That Worked** Nicholas Dagen Bloom, 2014-08-04 When it comes to large scale public housing in the United States, the consensus for the past decades has been to let the wrecking balls fly. The demolition of infamous projects such as Pruitt Igoe in St. Louis and the towers of Cabrini Green in Chicago represents to most Americans the fate of all public housing. Yet one notable exception to this national tragedy remains: The New York City Housing Authority. America's largest public housing manager still maintains over 400,000 tenants in its vast and well-run high-rise projects. While by no means utopian, New York City's public housing remains an acceptable and affordable option. The story of New York's success, where so many other housing authorities faltered, has been ignored for too long. Public

Housing That Worked shows how New York's administrators beginning in the 1930s developed a rigorous system of public housing management that weathered a variety of social and political challenges. A key element in the long term viability of New York's public housing has been the constant search for better methods in fields such as tenant selection, policing, renovation, community affairs, and landscape design. Nicholas Dagen Bloom presents the achievements that contradict the common wisdom that public housing projects are inherently unmanageable. By focusing on what worked rather than on the conventional history of failure and blame, Bloom provides useful models for addressing the current crisis in affordable urban housing. *Public Housing That Worked* is essential reading for practitioners and scholars in the areas of public policy, urban history, planning, criminal justice, affordable housing, management, social work, and urban affairs. *Intergovernmental Management for the 21st Century* Timothy J. Conlan, Paul L. Posner, 2009-11-01. A Brookings Institution Press and the National Academy of Public Administration publication. America's complex system of multi-layered government faces new challenges as a result of rapidly changing economic, technological, and demographic trends. An aging population, economic globalization, and homeland security concerns are among the powerful factors testing the system's capacity and flexibility. Major policy challenges and responses are now overwhelmingly intergovernmental in nature, and as a result, the fortunes of all levels of government are more intertwined and interdependent than ever before. This volume, cosponsored by the National Academy of Public Administration (NAPA), defines an agenda for improving the performance of America's intergovernmental system. The early chapters present the current state of practice in intergovernmental relations, including discussion of trends toward centralization, devolution, and other power-sharing arrangements. The fiscal underpinnings of the system are analyzed along with the long-term implications of current trends in financing at all levels. The authors identify the principal tools used to define intergovernmental management: grants, mandates, preemptions. In discussing emerging models and best practices in the design and management of those tools, *Intergovernmental Management for the 21st Century* applies these crosscutting themes to critical policy areas where intergovernmental management and cooperation are essential, such as homeland security, education, welfare, health care, and the environment. It concludes with an authoritative assessment of the system's capacity to govern, oversee, and improve. Contributors include Jocelyn Johnston (American University), Shelley Metzenbaum (University of Maryland), Richard Nathan (SUNY at Albany), Barry Rabe (University of Michigan), Beryl Radin (American University), Alice Rivlin (Brookings Institution), Ray Sheppach (National Governors' Association), Frank Shafroth (George Mason University), Troy Smith (BYU Hawaii), Carl Stenberg (University of North Carolina). *Oversight on the New York City Seasonal Financing Act* United States Congress, Senate, Committee on Banking, Housing, and Urban Affairs, 1976. **Proceedings of the Federal Management Improvement Conference**, 1971. Activation or Workfare? Governance and the Neo-Liberal Convergence Ivar Lodemel, Amilcar Moreira, 2014-09-29. The last decade of the 20th century was marked by a shift in how welfare states deal with those at the bottom of the income ladder. This shift involved the introduction, strengthening of work obligations as a

condition for receiving minimum income benefits which in some countries was complemented by efforts to help recipients return to the labour market namely through the investment in active labour market policies ALMP Based on case studies of developments in the US and eight European nations UK Norway Denmark Netherlands Germany France Portugal and the Czech Republic this book argues that this first set of reforms was followed by a second wave of reforms that whilst deepening the path towards the focus on work brings important innovations be it the tools used to help recipients back to the labour markets ex financial incentives and in how activation policies are delivered ex integration of benefit and employment services Looking at the array of developments introduced during this period we discern two key trends The first concerns the strengthening of the role of the market in the governance of activation which is visible in the strengthening of the focus on work or the marketisation of employment services The second concerns a move towards the individualisation of service delivery visible in the expansion of the use of personal action plans or in efforts to streamline service delivery Finally we show that the onset of the sovereign debt crisis in Europe has triggered a new wave of reforms Whilst tentative only our analysis points to a worrying trend of the curtailment or benefits Portugal and activation services Netherlands Czech Republic to minimum income recipients and in parallel a further deepening of the focus on work conditionality UK and Norway

The PerformanceStat Potential Robert D. Behn,2014-06-24 It started two decades ago with CompStat in the New York City Police Department and quickly jumped to police agencies across the U S and other nations It was adapted by Baltimore which created CitiStat the first application of this leadership strategy to an entire jurisdiction Today governments at all levels employ PerformanceStat a focused effort by public executives to exploit the power of purpose and motivation responsibility and discretion data and meetings analysis and learning feedback and follow up all to improve government s performance Here Harvard leadership and management guru Robert Behn analyzes the leadership behaviors at the core of PerformanceStat to identify how they work to produce results He examines how the leaders of a variety of public organizations employ the strategy the way the Los Angeles County Department of Public Social Services uses its DPSSTATS to promote economic independence how the City of New Orleans uses its BlightStat to eradicate blight in city neighborhoods and what the Federal Emergency Management Agency does with its FEMAStat to ensure that the lessons from each crisis response recovery and mitigation are applied in the future How best to harness the strategy s full capacity The PerformanceStat Potential explains all
