Much is made of the test scores earning power and innovative contributions of highly intelligent kids but we rarely ask what it s actually like to be gifted In a culture obsessed with exceptionalism sorting by intelligence has become an educational norm leading thousands of American students to be ushered through or noticeably left out of advanced academic programs Stereotypes and generalizations about these students from the socially inept genius to the high strung overachiever have filled the gap in data about who they are apart from what they achieve At a time of educational upheaval and rapidly declining youth mental health former gifted kids particularly women and nonbinary people also wrestling with questions of identity inequality and parenthood are reckoning with the gifted label This work offers personal accounts from diverse voices each one considered a gifted kid in their youth and considers questions of identity inequality poverty racism and more Essays address the dangers of praising achievements over efforts imposter syndrome intelligence as identity and why even the smartest among us often feel like failures among many other topics      Public Papers of the Presidents of the United States United States.
