Paleoanthropology and Paleolithic Archaeology in the People's Republic of China Wu Rukang, John W

Olsen, 2016-09-16 This book represents the first comprehensive attempt to bring to western scholarship the great advances made in Paleolithic archaeology and palaeoanthropology in the People's Republic of China. The 15 chapters are devoted to a historical overview of past and recent studies, the development of chronological frameworks, the composition and stratigraphy of vertebrate fauna, the pongid and hominid palaeontological records, and Pleistocene prehistoric archaeology. Maps, illustrations, and tables illustrate the materials presented here.

Palaeoanthropology and Palaeolithic Archaeology in the People's Republic of China John W. Olsen, 1985 **The Archaeology of Early China** Gideon

Shelach-Lavi, 2015-01-26 This volume aims to satisfy a pressing need for an updated account of Chinese archaeology. It covers an extended time period from the earliest peopling of China to the unification of the Chinese Empire some two thousand years ago. The geographical coverage includes the traditional focus on the Yellow River basin but also covers China's many other regions. Among the topics covered are the emergence of agricultural communities, the establishment of a sedentary way of life, the development of sociopolitical complexity, advances in lithic technology, ceramics and metallurgy, and the appearance of writing, large-scale public works, cities, and states. Particular emphasis is placed on the great cultural variations that existed among the different regions and the development of interregional contacts among those societies. The

People's Peking Man Sigrid Schmalzer, 2024-05-31 In the 1920s an international team of scientists and miners unearthed the richest evidence of human evolution the world had ever seen: Peking Man. After the communist revolution of 1949, Peking Man became a prominent figure in the movement to bring science to the people. In a new state with twin goals of crushing superstition and establishing a socialist society, the story of human evolution was the first lesson in Marxist philosophy offered to the masses. At the same time, even Mao's populist commitment to mass participation in science failed to account for the power of popular culture, represented most strikingly in legends about the Bigfoot-like Wild Man, to reshape ideas about human nature. The People's Peking Man is a skilled social history of twentieth-century Chinese paleoanthropology and a compelling cultural and at times comparative history of assumptions and debates about what it means to be human. By focusing on issues that push against the boundaries of science and politics, The People's Peking Man offers an innovative approach to modern Chinese history and the history of science. Moscow to Mao Gregory Guldin, 2016-09-16 This book studies the development of the four fields of anthropology in China.

Looking at both the political and social contexts, Greg Guldin demonstrates how political turmoil has shaped China's twentieth-century anthropological landscape. *Encyclopedia of Human Evolution and Prehistory* Eric Delson, Ian
