conversation about how Dr Simeons protocol has relevance not only as a hormonal therapy but as a means to end our national eating disorder Instead of continuing to apply the protocol as a short term diet it should be discussed as a real solution a tool to end irrational eating for emotional fulfillment This country is dealing with a crisis an addiction to eating emotionally and the obvious result is the overwhelming increase in obesity Think about the number of people in our culture who eat without hunger When you observe our nation's behavior with food it's very clear that fat isn't what we should be obsessed about and weight shouldn't be the target of the problem We need a genuine desire to eat less one that isn't dependent on weight loss as a reward This requires each of us to be accountable for our own emotions and find happiness in life not centrally stimulated by food Finally a book that credibly answers the questions every doctor patient and skeptic needs
