The Personalization Paradox Val Swisher, Regina Lynn Preciado, 2021-03-08 According to Infosys 86% of consumers surveyed indicated that personalized content has some impact on what they purchase and 25% said that personalization plays a large role in their purchases And yet looking at the data two things stand out Most companies say that personalizing the customer experience is a critical must have and they have the statistics to back it up Very few companies believe they are delivering enough personalized content or deliver it well What's holding these companies back from their personalization goals And how can you avoid the pitfalls and make personalization possible with your own enterprise content In this book global content strategy expert Val Swisher and senior content strategist Regina Lynn Preciado show you exactly what it takes to deliver personalized experiences at scale You'll learn Why personalized content is imperative to the enterprise Why so many companies fail to deliver and how to avoid the pitfalls The five dimensions of content standardization How to bring people technology and process together The impact of big data and artificial intelligence The only way to deliver personalized content at scale is to automate the process at the point of delivery And for that to work you've got to change how you do content The Personalization Paradox Why Companies Fail and How to Succeed at Delivering Personalized Experiences at Scale shows you how

Design Principles for Interactive Software Gilbert Cockton, Christian Gram, 2013-04-17 IFIP's Working Group 2.7.13.4 has since its establishment in 1974 concentrated on the software problems of user interfaces From its original interest in operating systems interfaces the group has gradually shifted emphasis towards the development of interactive systems The group has organized a number of international working conferences on interactive software technology the proceedings of which have contributed to the accumulated knowledge in the field The current title of the Working Group is User Interface Engineering with the aim of investigating the nature concepts and construction of user interfaces for software systems The scope of work involved is to increase understanding of the development of interactive systems to provide a framework for reasoning about interactive systems to provide engineering models for their development This report addresses all three aspects of the scope as further described below In 1986 the working group published a report Beech 1986 with an object oriented reference model for describing the

components of operating systems interfaces The model was implementation oriented and built on an object concept and the notion of interaction as consisting of commands and responses Through working with that model the group addressed a number of issues such as multi media and multi modal interfaces customizable in interfaces and history logging However a conclusion was reached that many software design considerations and principles are independent of implementation models but do depend on the nature of the interaction process
