Schroeder,2013-03-01 Shenoute of Atripe led the White Monastery a community of several thousand male and female Coptic monks in Upper Egypt between approximately 395 and 465 C E Shenoute s letters sermons and treatises one of the most detailed bodies of writing to survive from any early monastery provide an unparalleled resource for the study of early Christian monasticism and asceticism In *Monastic Bodies* Caroline Schroeder offers an in depth examination of the asceticism practiced at the White Monastery using diverse sources including monastic rules theological treatises sermons and material culture Schroeder details Shenoute s arduous disciplinary code and philosophical structure including the belief that individual sin corrupted not only the individual body but the entire corporate body of the community Thus the purity of the community ultimately depended upon the integrity of each individual monk Shenoute s ascetic discourse focused on purity of the body but he categorized as impure not only activities such as sex but any disobedience and other more general transgressions Shenoute emphasized the important practices of discipline or askesis in achieving this purity Contextualizing Shenoute within the wider debates about asceticism sexuality and heresy that characterized late antiquity Schroeder compares his views on bodily discipline monastic punishments the resurrection of the body the incarnation of Christ and monastic authority with those of figures such as Cyril of Alexandria Paulinus of Nola and Pachomius      Pachomius Philip Rousseau,2023-11-15 Pachomius who died in 346 has long been regarded as the founder of monasticism Available again Philip Rousseau s careful reading of the available texts reveals that Pachomius s pioneering enterprise has been consistently misread in light of later monastic practices Rousseau not only provides a fuller and more accurate portrait of this great teacher and spiritual director but also gives a new perspective on the development of monasticism In a new preface Rousseau reviews the scholarly developments that have modified his views and emphases since the book was published The result is to make Pachomius an even less assured pioneer a man likely to have been more involved in the village and urban

society of his time than previously thought Pachomius who died in 346 has long been regarded as the founder of monasticism Available again Philip Rousseau s careful reading of the available texts reveals that Pachomius s pioneering enterprise has been consistently misread in light of later mo

**The Story of Monasticism** Greg Peters,2015-08-11 Some evangelicals perceive monasticism as a relic from the past a retreat from the world or a shirking of the call to the Great Commission At the same time contemporary evangelical spirituality desires historical Christian manifestations of the faith In this accessibly written book Greg Peters an expert in monastic studies who is a Benedictine oblate and spiritual director offers a historical survey of monasticism from its origins to current manifestations Peters recovers the riches of the monastic tradition for contemporary spiritual formation and devotional practice explaining why the monastic impulse is a valid and necessary manifestation of the Christian faith for today s church

*Desert Christians* William Harmless,2004-06-17 In the fourth century the deserts of Egypt became the nerve center of a radical new movement what we now call monasticism Groups of Christians from illiterate peasants to learned intellectuals moved out to the wastelands beyond the Nile Valley and in the famous words of Saint Athanasius made the desert a city In so doing they captured the imagination of the ancient world They forged techniques of prayer and asceticism of discipleship and spiritual direction that have remained central to Christianity ever since Seeking to map the soul s long journey to God and plot out the subtle vagaries of the human heart they created and inspired texts that became

classics of Western spirituality These Desert Christians were also brilliant storytellers some of Christianity's finest This book introduces the literature of early monasticism It examines all the best known works including Athanasius Life of Antony the Lives of Pachomius and the so called Sayings of the Desert Fathers Later chapters focus on two pioneers of monastic theology Evagrius Ponticus the first great theoretician of Christian mysticism and John Cassian who brought Egyptian monasticism to the Latin West Along the way readers are introduced to path breaking discoveries to new texts and recent archeological finds that have revolutionized contemporary scholarship on monastic origins Included are fascinating snippets from papyri and from little known Coptic Syriac and Ethiopic texts Interspersed in each chapter are illustrations maps and diagrams that help readers sort through the key texts and the richly textured world of early monasticism Geared to a wide audience and written in clear jargon free prose Desert Christians offers the most comprehensive and accessible introduction to early monasticism

*Christian Friendship in the Fourth Century* Carolinne White, 2002-04-18 Friendship was a quality valued highly in ancient Greece and Rome and was also regarded as highly significant in nascent Christianity Carolinne White's aim in this study is to describe and compare the ideas about friendship developed by the Christians whose culture was in many ways dependent upon its pagan background and thus to develop a coherent picture of how the concept of friendship was understood in the fourth century The Christian writers discussed are considered against the background of their personal lives and their relations with one another All of the writers considered had a profound influence on later ages as well as on their own period which means that the survey provided should be of wide interest both to ancient historians and theologians

*Riot in Alexandria* Edward J. Watts, 2017-02-23 This innovative study uses one well documented moment of violence as a starting point for a wide ranging examination of the ideas and interactions of pagan philosophers Christian ascetics and bishops from the fourth to the early seventh century Edward J Watts reconstructs a riot that erupted in Alexandria in 486 when a group of students attacked a Christian adolescent who had publicly insulted the students teachers Pagan students Christians affiliated with a local monastery and the Alexandrian ecclesiastical leaders all cast the incident in a different light and each group tried with that interpretation to influence subsequent events Watts drawing on Greek Latin Coptic and Syriac sources shows how historical traditions and notions of a shared past shaped the interactions and behavior of these high profile communities Connecting oral and written texts to the personal relationships that gave them meaning and to the actions that gave them form Riot in Alexandria draws new attention to the understudied social and cultural history of the later fifth century Roman world and at the same time opens a new window on late antique intellectual life

[A History of Christian Psalmody](#) Charles H. Cosgrove, 2025 A History of Christian Psalmody traces history of Christian psalm singing during the church's first five centuries It describes the formats melodic character and uses of psalmody in a wide range of settings including personal and domestic devotion church liturgy monastic life and public ecclesial events such as processions

**Seeing the Lord's Glory** Christopher Barina Kaiser, 2014-04-01 The dilemma of early Christology Kaiser

observes is found in the early Christian claims to have seen the Lord and beheld his glory expressions that in early Judaism would have pointed unequivocally to visions of Israel's God. The shift of those claims onto the figure of Jesus is usually explained either as a result of the resurrection of Jesus presumed as a historical event or on the influence of pagan polytheism. Kaiser examines the phenomenon of kyriocentric visions in Second Temple Judaism asking whether such traditions are sufficient to account for the shape of early claims regarding the divinity of Christ.

**The Text of a Coptic Monastic Discourse On Love and Self-Control** Carolyn Schneider, 2017-04-28 This book introduces a beautiful fourth century Coptic discourse on love and self control in its first English translation. The text's heading attributes it to Athanasius bishop of Alexandria but this attribution is questionable. Exploring issues of authorship and context this book locates the origins of *On Love and Self Control* in the Upper Egyptian Pachomian monastic community of the mid fourth century. It then traces the various uses of *On Love and Self Control* to the late eleventh and early twelfth centuries when the single surviving manuscript was copied as part of an anthology at the Monastery of St Shenoute of Atripe. A partial reconstruction of this now dismembered codex is provided.

**The Monastic Origins of the Nag Hammadi Codices** Hugo Lundhaug, Lance Jenott, 2015-10-19 Hugo Lundhaug and Lance Jenott offer a sustained argument for the monastic provenance of the Nag Hammadi Codices. They examine the arguments for and against a monastic *Sitz im Leben* and defend the view that the Codices were produced and read by Christian monks most likely Pachomians in the fourth and fifth century monasteries of Upper Egypt. Eschewing the modern classification of the Nag Hammadi texts as Gnostic the authors approach the codices and their ancient owners from the perspective of the diverse monastic culture of late antique Egypt and situate them in the context of the ongoing controversies over extra canonical literature and the theological legacy of Origen. Through a combination of sources including idealized hagiographies travelogues monastic rules and exhortations and the more quotidian details revealed in documentary papyri manuscript collections and archaeology monasticism in the Thebaid is brought to life and the Nag Hammadi codices situated within it. The cartonnage papyri from the leather covers of the codices which bear witness to the monastic culture of the region are closely examined while scribal and codicological features of the codices are analyzed and compared with contemporary manuscripts from Egypt. Special attention is given to the codices scribal notes and colophons which offer direct evidence of their producers and users. The study ultimately reveals the Nag Hammadi Codices as a collection of books completely at home in the monastic manuscript culture of late antique Egypt.
