Wood,2023-06-14 In this provocative history James B Wood challenges the received wisdom that Japan's defeat in the Pacific was historically inevitable He argues instead that it was only when the Japanese military prematurely abandoned its original sound strategic plan to secure the resources Japan needed and establish a viable defensible perimeter for the Empire that the Allies were able to regain the initiative and lock Japanese forces into a war of attrition they were not prepared to fight The book persuasively shows how the Japanese army and navy had both the opportunity and the capability to have fought a different and more successful war in the Pacific that could have influenced the course and outcome of World War II It is therefore a study both of Japanese defeat and of what was needed to achieve a potential Japanese victory or at the very least to avoid total ruin Wood's argument does not depend on signal individual historical events or dramatic accidents Instead it examines how familiar events could have been different

A History of the Second World War in 100 Maps Jeremy Black,2020-11-18 The First World War was marked by an exceptional expansion in the use and production of military cartography But World War II took things even further employing maps charts reconnaissance and the systematic recording and processing of geographical and topographical information on an unprecedented scale As Jeremy Black one of the world's leading military and cartographic historians convincingly shows in this lavish full color book it is impossible to understand the events and outcomes of the Second World War without deep reference to mapping at all levels In World War II maps themselves became the weapons *A History of the Second World War in 100 Maps* traces how military cartography developed from simply recording and reflecting history to having a decisive impact on events of a global scale Drawing on one hundred key maps from the unparalleled collections of the British Library and other sources many of which have never been published in book form before Jeremy Black takes us from the prewar mapping programs undertaken by both Germany and the United Kingdom in the mid 1930s through the conflict's end a decade later Black shows how the development of maps led directly to the planning of the complex and fluid maneuvers that defined the European theater in World War II for example aerial reconnaissance photography allowed for the charting of beach gradients and ocean depths in the runup to the D Day landings and the subsequent troop movements at Normandy would have been impossible without the help of situation maps and photos In the course of the conflict both in Europe and the Pacific the realities of climate terrain and logistics recorded on maps overcame the Axis powers Maps also became propaganda tools as the pages of *Time* outlined the directions of the campaigns and the Allies dropped maps from their aircraft In this thrilling and unique book Jeremy Black blends his singular cartographic and military expertise into a captivating overview of World War II from the air sea and sky making clear how fundamental maps were to every aspect of this unforgettable global conflict

The Allied Defense of the Malay Barrier, 1941-1942 Tom Womack, 2015-12-01 Though few realize it the Netherlands East Indies were the object of Japan's attack on Pearl Harbor in December 1941 Likewise their invasions of Guam Wake Island and the Philippines were mainly diversionary operations to safeguard their main assault on Dutch and British colonies Since the end of World War I Japan had coveted the vast East Indies oil reserves and the colony had feared invasion since Germany overran Holland in May 1940 Isolated politically the weakly defended archipelago was a tempting prize The East Indies government initially maintained a strict policy of neutrality while desperately working to build up its military strength As Japanese actions pushed the region toward war the Dutch reluctantly embraced closer ties with America and Britain For a brief period the East Indies were key players in Pacific War strategy

This book details for the first time in English the Dutch prewar strategy their efforts to counter Japanese espionage and their sizable though largely forgotten military contribution in the early months of the Pacific War *Moral Constraints on War* Bruno Coppieters, N. Dillon,2010-07-30 China s transformation in the last few decades has been perhaps the most remarkable and most controversial development in modern history Barely a century removed from the struggling and outdated Qing Empire China has managed to reinvent itself on an unprecedented scale from Empire to Communist state to hybrid capitalist superpower Yet the full implications of China s rapid march to modernity are not widely understood particularly the effects of China s meteoric rise on the nation s many ethnic minorities China A Modern History is the definitive guide to this complex contemporary phenomenon Deng Xiaoping s 1980s policy of reform and opening which saw China enter the world market is only the most recent in a series of dramatic shifts that have transformed Chinese society over the past 150 years China A Modern History explores these contrasts in detail while also highlighting the enduring values which have informed Chinese identity for millennia Michael Dillon s China A Modern History is essential reading for those interested in the past present and future course of one of the world s great nations Clearly and compellingly written this will stand as the best introduction to this spectacular and still unfinished story **Historical Dictionary of World War II** Anne Sharp Wells,2023-12-15
