Howell, 2013-11-05 This finely illustrated book

offers a simple yet comprehensive grammar of a new discipline Performance Art first became popular in the fifties when artists began creating happenings Since then the artist as a performer has challenged many of the accepted rules of the theatre and radically altered our notion of what constitutes visual art This is the first publication to outline the essential characteristics of the field and to put forward a method for teaching the subject as a discipline distinct from dance drama painting or sculpture Taking the theory of primary and secondary colours as his model Anthony Howell posits three primaries of action and shows how these may be mixed to obtain a secondary range of actions Based on a taught course the system is designed for practical use in the studio and is also entertaining to explore Examples are cited from leading performance groups and practitioners such as Bobbie Baker Orlan Stelarc Annie Sprinkle Robert Wilson Goat Island and Station House Opera This volume however is not just an illustrated grammar of action it also shows how the syntax of that grammar has psychoanalytic repercussions This enables the performer to relate the system to lived experience ensuring a realisation that meaning is being dealt with through these actions and that the system set forth is more than a dry structuring of the characteristics of movement Freud's notion of transference and Lacan's understanding of repetition are compared to a performer's usage of the same terms Thus the book provides a psychoanalytic critique of performance at the same time as it outlines an efficient method for creating live work on both fine art and theatre courses

Performance Art Alix

Wood, 2014-12-15 Performance art encompasses a wide variety of artistic pursuits from modern dance to artists presenting something about themselves as art It's another form of art that divides the art community some say it's art others say it isn't Readers consider both sides of the coin through an introduction to the topic informational sidebars and full color photographs A colorful fun layout invites readers into the vibrant world of performance art while the main content engages their brains with critical thinking questions which ultimately ask is it art

Performance Art in China Thomas J.

Berghuis, 2006 Performance Art in China takes as its subject one of the most dynamic and controversial areas of experimental art practice in China In his comprehensive study Sydney based theorist and art historian Thomas J Berghuis introduces and investigates the idea of the role of the mediated subject of the acting body in art a notion grounded in the realization that the body is always present in art practice as well as its subsequent secondary representations Through a series of in depth case studies Berghuis reveals how during the past 25 years Chinese performance artists have acted out their art often in opposition to the principles governing correct behavior in the public domain In addition to a 25 year chronology of events a systematic index of places names and key terms as well as a bibliography and a glossary in English and Chinese this study also offers the reader numerous previously unpublished photos and documents

The Ecology of the Performance Art

Process Angela Viora, 2025-02-25 This book offers a new dynamic and ecological perspective to analyse the process of performance art namely what occurs during the unfolding of a piece exploring the essence of its happening through the forces at play The author's aim is to provide a deeper understanding of performance art which the existing scholarship

acknowledges as an art form that actively engages with the world Much work has been done on the transformative effects of performance art on the artists and the audiences and its impact on society over time The author takes this perspective further by asking how does this transformation happen Little work exists on exploring the forces and dynamics occurring while a performance is developing neither before nor after but during it This is the first and main gap that this book fills given the importance of process and processuality as the characterising features of this art form By filling this gap this book offers a new way to understand performances and their impact in the world and over time as well as providing practitioners with tools for performing and designing their works starting from the process rather than focusing on the outcomes This book studies the matrix of the performance art process by conceiving it as an ecosystem in which all the elements at play animate and inanimate are agentic and intertwine in relationships of mutual influence and exchange This book will be useful for scholars and practitioners of performance art and performance studies practice as research PaR visual culture art history and philosophy especially phenomenology
