Painting In The Age Of Artificial Intelligence:

Painting in the Age of Artificial Intelligence Art & Design magazine, 1996 **Painting in the Age of Artificial Intelligence** David Moos, 1996-05-17 A significant contribution to the understanding of painting today Writings by established artists critics art historians and philosophers Demonstrates the continuing strength and versatility of painting in today's multimedia age Paintings extensively illustrated in colour including a folded colour insert of a unique 15th century manuscript Architecture in the Age of Artificial Intelligence Neil Leach, 2025-04-17 AI has been unleashed Nothing is going to be the same again Updated to cover all the latest developments Architecture in the Age of Artificial Intelligence introduces AI for designers and explores its seismic impact on the future of architecture and design From ChatGPT and smart assistants to groundbreaking diffusion models for video and 3D modelling this updated new edition investigates the profound effects of AI technologies on architectural practice It explores how AI transforms every part of the process from the inspiration and brief to regulations and copyright to performance driven design and looks beyond discussions of software and functionality to ask more fundamental questions too How did AI evolve How does it work What does it tell us about creativity And what does it mean for the very future of the profession itself Written by one of the world's leading experts in the field this book is a must read for all architects wishing to stay at the forefront of the AI revolution **Copyright and Patent Laws for the Age of Artificial Intelligence** Eva Janecková, 2025-05-15 This book responds to the need to distinguish human creations from those produced by AI It does so by tracing human attributes of authorship and inventorship in statutory requirements for protection and ownership in European copyright and patent laws Its main contribution lies in exposing shortcomings in how the laws are applied in the UK Germany and France It shows that the human origin of creations is traditionally inferred from their expressive form or technical character Given the advancements in AI such inferences are no longer legitimate What is more these shortcomings may eventually lead to granting copyright or patent protection where none is lawfully permitted or sufficiently justified To remedy the situation this book offers doctrinal and conceptual amendments and proposes law reforms to implement them This book guides authorities practitioners and students through the main arguments of the debate concerning copyright and patents for objects entirely or partly generated by AI It also makes original contributions to advance the ongoing academic and policy debates on AI and intellectual property law Architectural Intelligence in the Age of Artificial Intelligence Andri Gerber, Oya Atalay Franck, Michael Mieskes, 2025-09-19 How will AI transform architecture How can we conceptualize AI in the context of architecture The contributors to this volume discuss different positions to understand the fundamental shift provoked by AI and contextualize this shift in forms of operational theories and performative uses of the medium The volume includes essays by practicing architects who explain how AI is used in their work by philosophers who reflect on the impact of AI on our way of thinking and conceptualizing the world and by scientists who explain the foundations and the potential of AI for architecture It

provides the starting point to engaging with AI in architecture

Art in the Age of Machine Learning Sofian Audry, 2021-11-23 An examination of machine learning art and its practice in new media art and music Over the past decade an artistic movement has emerged that draws on machine learning as both inspiration and medium In this book transdisciplinary artist researcher Sofian Audry examines artistic practices at the intersection of machine learning and new media art providing conceptual tools and historical perspectives for new media artists musicians composers writers curators and theorists Audry looks at works from a broad range of practices including new media installation robotic art visual art electronic music and sound and electronic literature connecting machine learning art to such earlier artistic practices as cybernetics art artificial life art and evolutionary art Machine learning underlies computational systems that are biologically inspired statistically driven agent based networked entities that program themselves Audry explains the fundamental design of machine learning algorithmic structures in terms accessible to the nonspecialist while framing these technologies within larger historical and conceptual spaces Audry debunks myths about machine learning art including the ideas that machine learning can create art without artists and that machine learning will soon bring about superhuman intelligence and creativity Audry considers learning procedures describing how artists hijack the training process by playing with evaluative functions discusses trainable machines and models explaining how different types of machine learning systems enable different kinds of artistic practices and reviews the role of data in machine learning art showing how artists use data as a raw material to steer learning systems and arguing that machine learning allows for novel forms of algorithmic remixes
