### **The Work of Art in the Digital Age** Le Berthéline, 2012-08-29

Since the cave mornings of Cro Magnon man has painted and decorated with colour solutions In the Digital Age it will be natural even compelling to question the traditional painting its status and legitimacy Has the traditional physical painting become a mere thing of the past an antique a relic or an artifact from the archives of art history In millenniums art has rebelled shaking of every reductive determination spoken appraisal and valuation disobedient and rebellious striding for freedom thus it has achieved our highest esteem Today art turns to its absolute emancipation it releases itself from materialism and catapulted out into virtual reality the picture will at the same time become ubiquitous and non existent in the Digital Age the picture does not even have to exist Perishability is it bygone Thus Yesterday is pass the 21th century poses a new world has sought us out and it doesn t backtrack it boasts itself in an unknown brash semiotic gigabytes GUI and GIF can you Google it IT is today to be or bail out The magic words of our time are clipart download edutainment freeware hotspot hyperlink net etiquette screendump webhotel and remember WYSIWYG isn t always trustworthy The world anno post MM is a hip hypertext to be or not to be down loaded that is the question In the Digital Era everything is digitised and infused by virtuality everything is constituted by everything is this diffusion Therefore in the Digital Era it is expected that digitisation and virtualization will penetrate art and vice versa that art will digitise itself The Work of Art in the Digital Age explores from a philosophical point of view i how this fusion takes place ii the relationship between the digital image and traditional painting and especially iii the status and legitimacy of the traditional physical painting in the current Digital Era
