**A Democracy Is Born** Matthew J. Morgan, 2007-09-30 In October 2004 more than eight million citizens of Afghanistan turned out to vote in the first democratic election in the turbulent 5 000 year history of the country This incredible voter turnout in the face of horrific threats and actual bullets rockets and bombs was a shout of defiance and a significant setback to the former Taliban regime and their al Qaeda allies It was a stunning success and serious step forward

for the Afghan people and for the United States in the campaign against international terrorism The change is more dramatic than the American Revolution in the aftermath of which the new American democracy maintained a representative form of government similar to its British roots The change is also more positive than the French Revolution which degenerated into tyranny and anarchy The Afghan Revolution of democratic governance albeit aided and guided by international military and political powers is thus one of the most historic events of our time Written by a former U S Army intelligence officer this book provides readers with a candid account of Afghanistan s first presidential election and its subsequent transition to democratic self governance In particular Morgan speaks to the security apparatus and the measures protecting the election The election s security process marked a defeat for the al Qaeda and Taliban terrorist insurgents attempting to frustrate Afghanistan s transformation into a democratic nation Morgan s narrative of Afghan development is interspersed with firsthand personal accounts from the author s eleven month deployment as an officer serving in the U S military in Afghanistan His stint there embedded within the United Nations in a civilian clothes role enables him to write from the perspective of a UN security officer offering insights beyond those that might be gained on the battlefield

Secessionism and Separatism in Europe and Asia Jean-Pierre Cabestan,Aleksandar Pavković,2013-01-03 The boundaries between secessionism and separatism are often blurred and in many cases study of secessionism encompasses that of separatism and vice versa Recognising this inherent relationship this book provides a comparative survey of recent attempts at secession and separatist movements from across Europe and Asia and assesses the responses of the respective host governments The essays address two main questions which arise from the relationship between state governments and secessionist movements first how secessionist or separatist movements gather support and mobilize their target populations and second how central political authorities respond to the challenges that secessionist or separatist movements pose to their capacity to control the country With political analysis of recent cases ranging from the Balkans the USSR the UK and the Basque Country to Sri Lanka Burma China Tibet and Taiwan the authors identify both similarities and differences in the processes and outcomes of secessionist and separatist movements across the two distinct regions This volume will be an invaluable resource for those who wish to understand the dynamics of secessionist movements and as such will appeal to students and scholars of Asian and European politics comparative politics international relations and conflict studies It will also be helpful to practitioners and policy makers who wish to understand and contribute to the resolution of such conflicts
