Philosophical Works Of Lady Mary Shepherd:

Philosophical Works of Lady Mary Shepherd Lady Mary Shepherd, 2000-10-15 This collection confirms that Mary Shepherd is an unjustly neglected figure in modern philosophy. It will be especially interesting to students of Berkeley and Hume. David Raynor. Very little is known about the life and work of Lady Mary Shepherd 1777-1847 and yet she is undoubtedly one of the most important women philosophers of the early modern period. Whewell is reputed to have used one of her books as a text at Cambridge and Sir Charles Lyell said of her that she was an unanswerable logician in whose argument it was impossible to find a loophole or flaw. Exceptionally well read and analytically clear, she made a significant scholarly contribution to the philosophical discussion and debate surrounding the work of Hume, Berkeley and others. This, the first modern edition of Shepherd's writings, includes her two major philosophical works: *An Essay upon the Relation of Cause and Effect* (1824), a critique of Hume's view of causality; and *Essays on the Perception of an External Universe and Other Subjects* (1827), a refutation of Berkeley's idealism. Also included is her first anonymous publication, *Enquiry respecting the Relation of Cause and Effect* (1819), and two shorter pieces. There is a growing interest in the contribution of women writers to the history of philosophy. However, limited access to original texts has prevented a serious and systematic examination of their doctrines. Shepherd's philosophical works deserve the careful consideration of contemporary historians and philosophers but until now have been largely unavailable to the modern reader. A reevaluation of her works is long overdue and this new collection is a welcome addition to Thoemmes Press's list of very rare works by an eminent and increasingly prominent woman philosopher of the Scottish Enlightenment. No single library in the world has all these works available for the first time in a modern edition. Includes critical responses to leading figures of early modern philosophy, introduction with biographical detail on Shepherd and account of her works. [Philosophical Works of Lady Mary Shepherd](#) Lady Mary Shepherd, 2000-10-15 **Philosophical Works of Lady Mary Shepherd** Lady Mary Shepherd, 2000 *Philosophical Works of Lady Mary Shepherd: Essays on the perception of an external universe* Lady Mary Shepherd, 2000 *Lady Mary Shepherd* Deborah Boyle, 2019-01-09 The philosophical writings of Lady Mary Shepherd 1777-1847 reveal an astute and lively intellect. In *An Essay upon the Relation of Cause and Effect* (1824) and *Essays on the Perception of an External Universe and Other Subjects Connected with the Doctrine of Causation* (1827), Shepherd engaged critically with the views of Hume, Berkeley, Reid, Stewart, de Condillac and others but she also presented an original and carefully argued philosophical system of her own. Highly regarded in her day, Shepherd's work faded into obscurity after her death; this collection of selections from her writings is intended to bring her work back into focus for students and scholars. Selections include her writings about causation, knowledge of the external world, mathematical and physical induction, belief in miracles and God, and mind and body. This volume also includes an 1828 essay Shepherd published on vision. [Mary Shepherd's Essays on the Perception of an External Universe](#) Antonia Lolordo, 2020-03-11 This is the first modern edition of the works of Lady Mary Shepherd, one of

the most important women philosophers of the early modern period Shepherd has been widely neglected in the history of philosophy but her work engaged with the dominant philosophers of the time among them Hume Berkeley and Reid In particular her 1827 volume *Essays on the Perception of an External Universe* outlines a theory of causation perception and knowledge which Shepherd presents as an alternative to what she sees as the mistaken views of Berkeley and Hume What she ultimately presents is an original and systematic metaphysics and epistemology Shepherd's *Essays* consists of two parts The first is a theory of perception and knowledge of the external world which is designed to rebut idealism and skepticism about the external world and show that our ordinary beliefs are based on reason The second is a collection of essays on topics in metaphysics and epistemology including the immateriality and eternity of the mind the relationship between mind and body the possibility of miracles the association of ideas the relationship between physical and mathematical reasoning and the epistemology of testimony Antonia LoLordo's edition of Shepherd's *Essays* includes scholarly notes throughout the text that provide historical and philosophical context and expand on the major concepts of Shepherd's system Her extensive introduction to Shepherd's life and works surveys some of the major points of Shepherd's system points out directions for future research and offers guidance for readers planning to teach her work in their courses This volume is an invaluable primary resource for scholars graduate students and undergraduates interested in metaphysics epistemology and early modern philosophy
