Judaeo-Christian Intellectual Culture in the Seventeenth Century A.P. Coudert, S. Hutton, R.H. Popkin, G.M. Weiner, 2013-03-07 MURIEL MCCARTHY This volume originated from a seminar organised by Richard H Popkin in Marsh s Library on July 7 8 1994 It was one of the most stimulating events held in the Library in recent years Although we have hosted many special seminars on such subjects as rare books the Huguenots and Irish church history this was the first time that a seminar was held which was specifically related to the books in our own collection It seems surprising that this type of seminar has never been held before although the reason is obvious Since there is no printed catalogue of the Library scholars are not aware of its contents In fact the collection of books by late seventeenth and early eighteenth century European authors on for example such subjects as biblical criticism political and religious controversy is one of the richest parts of the Library s collections Some years ago we were informed that of the 25 000 books in Marsh s at least 5 000 English books or books printed in England were printed between 1640 and 1700 **Notebooks, English Virtuosi, and Early Modern**

Science Richard Yeo, 2014-03-01 In Notebooks English Virtuosi and Early Modern Science Richard Yeo interprets a relatively

unexplored set of primary archival sources the notes and notebooks of some of the leading figures of the Scientific Revolution Notebooks were important to several key members of the Royal Society of London including Robert Boyle John Evelyn Robert Hooke John Locke and others who drew on Renaissance humanist techniques of excerpting from texts to build storehouses of proverbs maxims quotations and other material in personal notebooks or commonplace books Yeo shows that these men appreciated the value of their own notes both as powerful tools for personal recollection and following Francis Bacon as a system of precise record keeping from which they could retrieve large quantities of detailed information for collaboration The virtuosi of the seventeenth century were also able to reach beyond Bacon and the humanists drawing inspiration from the ancient Hippocratic medical tradition and its emphasis on the gradual accumulation of information over time By reflecting on the interaction of memory notebooks and other records Yeo argues the English virtuosi shaped an ethos of long term empirical scientific inquiry

Evil, Spirits, and Possession

David L Bradnick, 2017-08-28 In Evil Spirits and Possession An Emergentist Theology of the Demonic David Bradnick develops a multidisciplinary view of the demonic using biblical theological social scientific and philosophical scientific perspectives Building upon the work of Pentecostal theologian Amos Yong this book argues for a theology informed by emergence theory whereby the demonic arises from evolutionary processes and exerts downward causal influence upon its constituent substrates Consequently evil does not result from conscious diabolic beings rather it manifests as non personal emergent forces that influence humans to initiate and execute nefarious activities Emergentism provides an alternative to contemporary views which tend to minimize or reject the reality of the demonic and it retains the demonic as a viable theological category in the twenty first century Jesuit Philosophy on the Eve of Modernity Cristiano Casalini, 2019-03-19 Jesuit Philosophy on the Eve of Modernity edited by Cristiano Casalini is the first comprehensive volume to trace the origins and development of Jesuit philosophy during the first century of the Society of Jesus 1540 c 1640 Filling a gap in the history of philosophy the volume seeks to identify and examine the limits of the distinctiveness of Jesuit philosophers during an age of dramatic turbulence in Western thought The eighteen contributions by some of the leading specialists in various fields are divided into four sections which guide the reader through cultural milieus thematic issues and intellectual biographies to show the impact of Jesuit philosophy on early modern thought

The Rise and Fall of Soul and Self

Raymond Martin, John Barresi, 2006 This book traces the development of theories of the self and personal identity from the ancient Greeks to the present day From Plato and Aristotle to Freud and Foucault Raymond Martin and John Barresi explore the works of a wide range of thinkers and reveal the larger intellectual trends controversies and ideas that have revolutionized the way we think about ourselves The authors open with ancient Greece where the ideas of Plato Aristotle and the materialistic atomists laid the groundwork for future theories They then discuss the ideas of the church fathers and medieval and Renaissance philosophers including St Paul Philo Augustine Aquinas and Montaigne In their coverage of the emergence of a new mechanistic conception of nature in the seventeenth century Martin and Barresi note a shift away from religious and purely philosophical notions of self and personal identity to more scientific and social conceptions a trend that has continued to the present day They explore modern philosophy and psychology including the origins of different traditions within each

discipline and explain both the theoretical relevance of feminism and gender and ethnic studies and also the ways that Derrida and other recent thinkers have challenged the very idea that a unified self or personal identity even exists Martin and Barresi cover a number of issues broached by philosophers and psychologists such as the existence of a fixed and unchanging self and whether the concept of the soul has a use outside of religious contexts They address the question of whether notions of the soul and the self are still viable in today's world Together they reveal the fascinating ways in which great thinkers have grappled with these and other questions and the astounding impact their ideas have had on the development of self understanding in the west

Physics and Metaphysics in Descartes and in his Reception Delphine Antoine-Mahut, Sophie Roux, 2018-09-14 This volume explores the relationship between physics and metaphysics in Descartes philosophy According to the standard account Descartes modified the objects of metaphysics and physics and inverted the order in which these two disciplines were traditionally studied This book challenges the standard account in which Descartes prioritizes metaphysics over physics It does so by taking into consideration the historical reception of Descartes and the ways in which Descartes himself reacted to these receptions in his own lifetime The book stresses the diversity of these receptions by taking into account not only Cartesianisms but also anti Cartesianisms and by showing how they retroactively highlighted different aspects of Descartes works and theoretical choices The historical aspect of the volume is unique in that it not only analyzes different constructions of Descartes that emerged in the 18th 19th and 20th centuries but also reflects on how his work was first read by philosophers across Europe Taken together the essays in this volume offer a fresh and up to date contribution to this important debate in early modern philosophy

Indifference and Repetition; or, Modern Freedom and Its Discontents Frank Ruda, 2023-12-05 In capitalism human beings act as if they are mere animals So we hear repeatedly in the history of modern philosophy Indifference and Repetition examines how modern philosophy largely coextensive with a particular boost in capitalism's development registers the reductive and regressive tendencies produced by capitalism's effect on individuals and society Ruda examines a problem that has invisibly been shaping the history of modern especially rationalist philosophical thought a problem of misunderstanding freedom Thinkers like Descartes Kant Hegel and Marx claim that there are conceptions and interpretations of freedom that lead the subjects of these interpretations to no longer act and think freely They are often unwillingly led into unfreedom It is thus possible that even freedom enslaves Modern philosophical rationalism whose conceptual genealogy the book traces and unfolds assigns a name to this peculiar form of domination by means of freedom indifference Indifference is a name for the assumption that freedom is something that human beings have a given a natural possession When we think freedom is natural or a possession we lose freedom Modern philosophy Ruda shows takes its shape through repeated attacks on freedom as indifference it is the owl that begins its flight so that the days of unfreedom will turn to dusk

Philosophy Across Borders Emma Ingala, Gavin Rae, 2024-11-14 This book brings into conversation geographically diverse theorists to question the meaning purpose and place of conceptual borders in philosophy It shows how contemporary theory is constituted by a dynamic practice in which the boundaries created to define it are simultaneously overcome in their establishment Philosophy has often taken itself to be distinguished from and superior to alternative ways of thinking To do so philosophical thinking has found itself rigidly affirming the need to think within borders to obtain conceptual clarity and certainty and or secure its own independent existence The chapters in this volume call into question the need to retreat behind demarcated boundaries that mark the domain of philosophy proper to instead offer a performative account of how philosophy can creatively work across geographical cultural linguistic borders without foreclosing that analysis conceptually In so doing the contributors tackle issues including the historical establishment of philosophical borders the metaphysics of philosophical borders the relationship between Western and non Western thinking the ethics of transgressing borders and the political implications of Western rationality on and for non Western societies *Philosophy Across Borders* will therefore be of interest to scholars and advanced students working in philosophy aesthetics critical theory comparative philosophy cultural studies feminist theory history of ideas political theory and postcolonial studies **Routledge Philosophy**
