

Le cerveau, l'esprit et la conscience

(extraits)

Chapitre du livre du Dr David Fortin

Le cerveau une galaxie dans votre tête

Tout ce que nous savons sur le cerveau simplifié et vulgarisé¹.

Dr. David Fortin est neurochirurgien, neuro-oncologue et professeur titulaire à la Faculté de médecine et des sciences de la santé de l'Université de Sherbrooke. Il dirige le laboratoire de recherche sur les tumeurs cérébrales, et a plus de 125 publications et 150 résumés scientifiques à son actif. Après ses études de médecine et sa formation en neurochirurgie, il a complété sa formation en neuro-oncologie à l'Université Western Ontario puis à l'Oregon Health & Science University. Il s'est mérité de nombreuses distinctions dont le prix César Galéano du meilleur professeur de la Faculté de médecine de 2005 à 2010, le prix du rayonnement en recherche du Centre de recherche clinique du CHUS en 2010. Il s'est vu décerner le prix du médecin spécialiste québécois de l'année 2018 par le Collège royal des médecins et chirurgiens du Canada.

Au fil de cet ouvrage, nous avons mis en place les pièces d'information nous permettant ultimement d'avoir une discussion à propos des différentes fonctions cognitives nous animant. Or peut-être avez-vous remarqué qu'à aucun moment nous n'avons évoqué le mot *conscience*. Comment même est-ce possible de parler du cerveau sans écrire une seule fois le mot *conscience* dans l'ouvrage? La raison est à la fois simple, surprenante, décevante, voire effrayante : en réalité, nous ne savons pas vraiment ce qu'est la conscience. Il y a des experts en neuroscience, il y a des experts en neuro-anatomie, en neurophysiologie, mais il n'y a *aucun* véritable expert en conscience. Toute prétention contraire est [...] trompeuse. En fait, il n'existe aucune définition de ce qu'est la conscience qui fasse consensus. L'être humain réfléchit sur lui-même depuis le crépuscule de son existence, et ne peut toujours donner une définition de ce qu'est la conscience...
[...]

De manière simplifiée, la conscience est tout ce dont vous faites l'expérience. La joie à entendre une mélodie, l'amour que vous ressentez envers quelqu'un, la douleur de l'échec ou la honte d'un affront, la douleur physique ressentie lors d'une blessure, le plaisir du sexe ou le sentiment de bien-être après l'exercice physique. Mais aussi la crainte d'être malade, de mourir, et l'apprehension de disparaître et de ne pas laisser de traces après votre décès. Ainsi, l'introspection trouve aussi une place prépondérante dans le concept de la conscience. La sensation d'avoir une existence qui nous est propre, une réflexion sur cette dernière et l'impact qu'elle peut avoir sur le construit extérieur à notre personne en font partie.

Philosophie De L'esprit Et Sciences Du Cerveau

**France Farago, Frédéric Guillaud, Maël
Lemoine, Cyril Morana**

Philosophie De L'esprit Et Sciences Du Cerveau:

Philosophie de l'esprit et sciences du cerveau Jean-Pierre Changeux, 1991 De nos jours existe un extraordinaire engouement pour les sciences du cerveau qui captivent de plus en plus de penseurs Des philosophes americains encouragent leurs pairs à s'initier aux neurosciences Des hommes de science conscients des enjeux métaphysiques inhérents à leur domaine invitent les philosophes à découvrir les faits nouveaux apportés par les découvertes sur le système nerveux Il paraît donc légitime que le philosophe soit concerné par les développements récents des sciences du cerveau Par la diversité des points de vue et des perspectives le présent recueil souhaite contribuer à éclairer dans la mesure du possible quelquesunes des questions inhérentes aux interactions entre la philosophie et les neurosciences

Philosophie, terminales L, ES, S

France Farago, Frédéric Guillaud, Maël Lemoine, Cyril Morana, 2004 , Self-Identity and Powerlessness Alice

Koubová, 2013-05-30 In Self Identity and Powerlessness Alice Koubová proposes a conception of human existence that does not essentially depend on the definition of self identity The author shows that the philosophical stress on human identity fails to grasp essential aspects of human existence By emphasizing the moments of Dasein's powerlessness in Heidegger's fundamental ontology she develops in her analysis of various philosophers literary examples and social psychology an original phenomenology of alternation of existence and affair How necessary is identity for thinking Are we capable of philosophical thought even when we have neither ourselves nor the world under our full control Is it possible to relax become powerless and yet think precisely These questions are to be answered in this book

Les neurosciences et la philosophie de l'action

Jean-Luc Petit, 1997 Ayant constaté que depuis 20 ans l'intérêt s'est déplacé du mouvement vers l'action des chercheurs en neurosciences sciences cognitives et philosophie ont confronté les progrès expérimentaux aux analyses philosophiques Ils ont reconnu l'originalité des nouvelles neurosciences cognitives dans le fait qu'elles ne se contentent plus de dégager les corrélats neuraux de la cognition mais qu'elles reposent le problème classique de l'union de l'esprit et du corps en apportant une masse de données sur le rôle de l'action dans la constitution de l'agent lui-même comme dans celle correlative du monde environnant Reactivant les intuitions de la phénoménologie sur l'enracinement corporel de l'intentionnalité l'interprétation de ces données va obliger la philosophie analytique à briser sa clôture linguistique

Metaphysics and the Sciences in Nineteenth-Century France, 2025-07-22 This volume is the first systematic study of the style of reasoning specific to the field of philosophy in nineteenth century France The chapters analyze the often dispersed responses to the fundamental question of the division of the sciences based on the reciprocal relationships of inclusion or exclusion of adversary or sorority between metaphysics and the positive sciences In line with the arrhythmic progress of the different forms of knowledge these responses renew the Condillacian criticisms of the Cartesian order of the relationships between metaphysics and physics Between a pronounced divorce and a successful marriage this volume traces the philosophical history of the various attempts at divorce or union which as the century progressed resulted in original

hybridizations that aspired to define a new and ever problematic French philosophy **Discovering Life, Manufacturing Life** Pierre V. Vignais, Paulette M. Vignais, 2010-06-21 Francis BACON in his Novum Organum Robert BOYLE in his Skeptical Chemist and Ren DESCARTES in his Discourse on Method all of these men were witnesses to the th scientific revolution which in the 17 century began to awaken the western world from a long sleep In each of these works the author emphasizes the role of the experimental method in exploring the laws of Nature that is to say the way in which an experiment is designed implemented according to tried and tested techniques and used as a basis for drawing conclusions that are based only on results with their margins of error taking into account contemporary traditions and prejudices Two centuries later Claude BERNARD in his Introduction to the Study of Experimental Medicine made a passionate plea for the application of the experimental method when studying the functions of living beings Twenty first century Biology which has been fertilized by highly sophisticated techniques inherited from Physics and Chemistry blessed with a constantly increasing expertise in the manipulation of the genome initiated into the mysteries of information technology and enriched with the ever growing fund of basic knowledge at times appears to have forgotten its roots *Hans Jonas et la liberté* Marie-Geneviève Pinsart, 2002 Hans Jonas b nifie de la reconnaissance de ses pairs comme de la notori t aupr s d un large public L auteur du Principe responsabilit est aussi un sp cialiste de la religion gnostique un philosophe de la vie analysant la dynamique de l organisme et de l esprit La notion de libert est un fil conducteur herm neutique pour exposer une pens e lectrique mais unitaire et originale

Parlons bioéthique Margarita Boladeras, 2017-12-04T00:00:00-05:00 Ce livre pr sente cinq entretiens avec des philosophes pionniers dans le champ de la biothique francophone Anne Fagot Largeault et Jean Yves Goff i France Gilbert Hottois et Jean No l Missa Belgique et Marie H l ne Parizeau Qu bec cinq personnalit s de renom connues pour leur trajectoire exceptionnelle Les entretiens men s avec ces auteurs au sujet de leurs oeuvres de leurs exp riences dans des comits de biothique et des diff rents d bats soulev s ces derni res ann es nous permettent de conna tre leur travail mais aussi de faire une incursion dans le d veloppement fulgurant de la biom decine et des biotechnologies des cinquante derni res ann es Les cons quences de ces applications les probl mes thiques g n r s les jugements favorables et d favorables l gard des changements sociaux qui se sont produits et le bouleversement d id es qui s en est suivi sont autant d aspects abord s dans ces entretiens L utilisation du langage courant exige un effort de synth se important aussi ces entretiens sous la forme d une conversation offrent ils au lecteur une large vision panoramique rigoureuse et concise de l volution de la biothique francophone

L'organe de la pensée Laurent Clauzade, 2009 Comment la fin du XVIIIe si cle la physiologie c rbrale est progressivement integr e dans la philosophie positive puis modifi e en fonction des objectifs th oriques et politiques poursuivis par Auguste Comte Le positivisme comtien aborde aussi la reformulation des probl mes philosophiques tels que l unit humaine la subjectivit la constitution du moi la philosophie de la connaissance **Revue philosophique de la France et de l'étranger**, 1897 **Top Secret Révélations d'un Univers étonnant 1ère partie** Marc Wittmann Marc

Wittmann,2011-01-04 Une etude complete realisee depuis plusieurs annee par Marc Wittmann devant un jour mener au voyage rapide dans l espace temps a la vie eternelle Sciences philosophie cosmologie medecine autant de grandes categories que vous retrouverez dans ces etudes interessantes L'esprit-cerveau Jean-Noël Missa,1993 Cet ouvrage effectue un p riple philosophique travers les th ories et les champs de recherche les plus passionnantes des neurosciences contemporaines perception et reconnaissance visuelles vision aveugle cerveau divis m moire conscience intentionnalit darwinisme neural Sous tendu par l id e que l esprit cerveau est une entit double face il montre l apport consid rable des neurosciences la philosophie de l esprit travers l tude critique des th ses de nombreux penseurs tels que Churchland Nagel Dennet Damasio Edelman Sperry Shallice Zeki L auteur proc de galement une mise en perspective historique des th mes fondamentaux de la neurophysiologie et de la neuropsychologie retraiant l essor difficile et controvers d une science de l esprit cerveau au XIXe et au XXe si cle chez Bergson Ribot James Ainsi il nous fait mieux saisir les enjeux des d bats philosophiques qui animent aujourd hui les sciences cognitives RHSH n°9 - L'espace : objet ou m thode des sciences humaines ,2003-10
