Philosophies Of Social Sciences The Classic And Contemporary Readings:

Philosophies of Social Science Gerard Delanty, Piet Strydom, 2003-04 This is a collection of extracts from classic works on the philosophy of social science highlighting the work of many influential authors who have shaped social science

Beyond the Myths about the Natural and Social Sciences Katarina Prpić, 2009 **Philosophy of the Social Sciences** Patrick Baert, 2005-11-18 In this ground breaking new text Patrick Baert analyses the central perspectives in the philosophy of social science critically investigating the work of Durkheim Weber Popper critical realism critical theory and Rorty's neo pragmatism Places key writers in their social and political contexts helping to make their ideas meaningful to students Shows how these authors views have practical uses in empirical research Lively approach that makes complex ideas understandable to upper level students as well as having scholarly appeal The Idea of Social Science and Proper Phenomenology Jonathan Tuckett, 2018-06-11 This monograph examines an academic discipline in crisis The author claims that this field concerned with society and relationships is in trouble No one can seem to agree on what it does or how to go about doing it His insightful argument revives the thought of key phenomenologists often no longer considered in social science Looking predominantly at debates within religious studies this book uncovers certain misguided presuppositions which have strongly influenced scholars in the field This reflects itself in a Weberian Ideal regarding the institutional place of science in the universities and a failure to properly consider the epistemic status of knowledge produced for its own sake But even recognizing these issues will not get to the core of the crisis It will not help scholars better understand what it is to be human To address this the author digs deeper He draws on the philosophical phenomenology of Husserl's Phenomenological Movement to critique our very idea of social science In the process he presents a radical approach to the question of humanity This volume concludes that properly understood social science is a hobby It deserves no special place in the university Indeed if it is to be pursued properly it requires a fundamentally revised understanding of humanity The author argues this not of the sake of controversy Rather his intention is to affect the necessary shift in our understanding that will enable future constructive solutions **The Spirit of Luc Boltanski** Simon Susen, Bryan S. Turner, 2014-11-01 What is the relevance of Luc Boltanski's pragmatic sociology of critique to central issues in contemporary social and political analysis In seeking to respond to this question this book contains critical commentaries from prominent social theorists attempting to map out the influence and broad scope of Boltanski's oeuvre Post Traumatic Survival Gwynyth Overland, 2014-06-02 Some refugees who survive wars recover and thrive others do not This study sets out to discover what successful survivors of the Khmer Rouge regime found instrumental for both their survival and their mental health The aim is to contribute to the understanding of resilience here understood as the ability to recover from misfortune or change in order to contribute to the psychosocial rehabilitation of survivors of war crimes and other traumatic events to discover how war refugees may be best assisted in processes of recovery and normalisation The resilience found here was based largely on informants cultural and

religious resources Psychosocial guidelines for accessing clients backgrounds are available but health and social workers often fail to access the cultural explanatory models used by survivors in building personal and group resilience Proposals from the project are incorporated in a cultural resilience interview scheme for the use of health and social workers wishing to conduct resilience work with war survivors **The Media and Social Theory** David Hesmondhalgh,Jason

Toynbee,2008-05-21 This collection brings together major and emerging media analysts to consider key processes of media change using a number of critical perspectives The editors present a formidable range of theoretical viewpoints and approaches applied to a broad and fascinating variety of case studies from reality television to the BBC World Service from blogging to control of copyright **New Atheism: Critical Perspectives and Contemporary Debates** Christopher R.

Cotter,Philip Andrew Quadrio,Jonathan Tuckett,2017-06-07 Whether understood in a narrow sense as the popular works of a small number of white male authors or as a larger more diffuse movement twenty first century scholars journalists and activists from all sides in the atheism versus theism debate have noted the emergence of a particular form of atheism frequently dubbed New Atheism The present collection has been brought together to provide a scholarly yet accessible consideration of the place and impact of New Atheism in the contemporary world Combining traditional and innovative approaches chapters draw on the insights of philosophers religious studies scholars sociologists anthropologists and literary critics to provide never before seen insights into the relationship between New Atheism science gender sexuality space philosophy fiction and much more With contributions from Australia Germany and the United Kingdom the volume also presents diversity in regard to religious irreligious commitment with contributions from atheists theists and more agnostic orientations New Atheism Critical Perspectives and Contemporary Debates features an up to date overview of current research on New Atheism a Foreword from Stephen Bullivant co editor of The Oxford Handbook of Atheism and eleven new chapters with extensive bibliographies that will be important to both a general audience and to those conducting research in this area It provides a much needed fresh look at a contentious phenomenon and will hopefully encourage the cooperation and dialogue which has predominantly been lacking in relevant contemporary debates **Conflict Management in**

Nonprofits Yashwant V. Pathak,2025-05-19 Nonprofit organizations NPOs where citizens come together to solve societal problems promote civic engagement and create the building blocks of democracy are a major sector and employer both in the United States and the rest of the world This book addresses conflicts in the nonprofit organization sector and offers ways to resolve and manage these conflicts Conflict Management in Nonprofits Volume 2 explores conflict management with regard to employees vs volunteers gender and inclusiveness mindfulness religious groups working with governmental organizations as well as political issues Perspectives on negotiation mediation and facilitation are presented throughout In this the second title in a two volume collection an exceptional set of renowned authors explore the topic of conflict management with a focus on faith based nonprofits This book will be a valuable resource for academicians scholars students as well as social political

activists and the layperson interested in volunteer driven nonprofit organization management American Pragmatism and Organization Nick Rumens, 2016-04-15 Emerging during the late nineteenth century in the diverse scholarship of US commentators such as Charles Sanders Peirce William James and John Dewey American pragmatism shaped many intellectual currents within a range of disciplines including politics education administrative science and religion Despite attracting attention and interest due to its conceptualization of theory in terms of its practical consequences for improving the human condition American pragmatism struggled to maintain its influence and suffered a hiatus until it experienced a renaissance within scholarly circles during the 1970s While renewed interest in American pragmatism continues to grow with some scholars distinguishing between classical neo and new forms of pragmatism it is only relatively recently that organization studies scholars have drawn upon American pragmatist philosophies for shedding new light on aspects of contemporary organizational life This edited collection builds on this emergent literature in an engaging and scholarly manner American Pragmatism and Organization is a ground breaking collection and distinctive in its book length treatment of American pragmatism as a relevant resource for analysing organisations It draws together an international body of research focused on the interconnections and interplay between American pragmatism and organizational phenomena explores the theoretical possibilities afforded by pragmatist thinking for understanding organization and illuminates the practical advantages of doing so Key Issues for Education Researchers Diana Burton, Steve Bartlett, 2009-05-20 Doing a small scale research project is a compulsory element of an Education Studies degree This book will guide and support students through their research offering practical advice on designing planning and completing the research collecting and analysing data and on writing up It outlines the philosophical approaches underpinning research together with the key concepts and current debates in education research Chapters cover Research paradigms Ethical approaches to research Research methods including interviewing questionnaires observation and experiments Research diaries and personal biography Writing up your research Each chapter includes points for reflection encouraging students to explore different perceptions on the whole research project Tasks in each chapter take readers through the process of designing and justifying their own research project Essential reading for education studies students it will also be very suitable for those doing masters courses in education students on initial teacher training programmes and of interest to others such as classroom assistants studying education on foundation degrees *Health, Food and Social Inequality* Carolyn Mahoney, 2015-02-20 Health Food and Social Inequality investigates how vast amounts of consumer data are used by the food industry to enable the social ranking of products food outlets and consumers themselves and how this influences food consumption patterns This book supplies a fresh social scientific perspective on the health consequences of poor diet Shifting the focus from individual behaviour to the food supply and the way it is developed and marketed it discusses what is known about the shaping of food behaviours by both social theory and psychology Exploring how knowledge of social identities and health

beliefs and behaviours are used by the food industry Health Food and Social Inequality outlines for example how commercial marketing firms supply food companies with information on where to locate snack and fast foods whilst also advising governments on where to site health services for those consuming such foods disproportionately Giving a sociological underpinning to Nudge theory while simultaneously critiquing it in the context of diet and health this book explores how social class is an often overlooked factor mediating both individual dietary practice and food marketing strategies This innovative volume provides a detailed critique of marketing and food industry practices and places class at the centre of diet and health It is suitable for scholars in the social sciences public health and marketing

Handbook of Contemporary European Social Theory Gerard Delanty, 2006-09-27 This innovative publication maps out the broad and interdisciplinary field of contemporary European social theory It covers sociological theory the wider theoretical traditions in the social sciences including cultural and political theory anthropological theory social philosophy and social thought in the broadest sense of the term This volume surveys the classical heritage the major national traditions and the fate of social theory in a post national and post disciplinary era It also identifies what is distinctive about European social theory in terms of themes and traditions It is divided into five parts disciplinary traditions national traditions major schools key themes and the reception of European social theory in American and Asia Thirty five contributors from nineteen countries across Europe Russia the Americas and Asian Pacific have been commissioned to utilize the most up to date research available to provide a critical international analysis of their area of expertise Overall this is an indispensable book for students teachers and researchers in sociology cultural studies politics philosophy and human geography and will set the tone for future research in the social sciences

Historical Developmental Psychology Willem Koops, Frank Kessel, 2020-05-21 This book explores and underlines the thesis that developmental psychology cannot function fruitfully without systematic historical scholarship Scientific thinking not only depends on empirical analytical research but also requires self reflection and critical thinking about the discipline s foundations and history The relevance of history was made especially clear in the writings of William Kessen who analyzed how both children and child development are shaped by the larger cultural forces of political maneuverings practical economics and implicit ideological commitments As a corollary he emphasized that the science of developmental psychology itself is culturally and historically shaped in significant ways Discussing the implications of these insights in the book s introduction Koops and Kessel stress that we need a Historical Developmental Psychology In the book s following chapters historians of childhood Mintz Stearns Lasse Sandin and Vicedo demonstrate how conceptions of childhood vary across historical time and sociocultural space These foundational variations are specified by these historians and by developmental psychologists Harris and Keller in the research domains of emotions attachment and parenting This collection demonstrates the importance of bridging both intellectually and institutionally the gap between the research of historians and both current and future research of developmental psychologists This book was originally published as a

special issue of the European Journal of Developmental Psychology *Conflict Transformation* Rhea A. DuMont,,Tom H. Hastings,Emiko Noma,2013-02-28 Seeking to expand the transformative aspect of conflict resolution the contributors to this edited collection have focused on gathering scholarship from under represented voices and viewpoints in the field the emerging discipline Most mainstream conflict resolution seems to look either at interpersonal conflict or international conflict without much focus on the differing individuals and social structures involved These peer reviewed essays add significant findings to those gaps in the literature The editors and contributors are perhaps not coincidentally mostly women and people of color whose voices are often absent from other collections Instructors considering this book for use in a course may request an examination copy here **After the Empires** P. Preston,2014-08-26 The shift to the modern world in East Asia was accomplished in part via the experience of colonial rule in the late nineteenth century Following imperial crisis in the 1930s and 1940s independent nation states formed from which the political structure of East Asia is based today **A New Synthesis for Solving the Problem of Psychology** Gregg Henriques,2022-12-10 In this incisive analysis of academic psychology Gregg Henriques examines the fragmented nature of the discipline and explains why the field has had enormous difficulty specifying its subject matter and how this has limited its ability to advance our knowledge of the human condition He traces the origins of the problem of psychology to a deep and profound gap in our knowledge systems that emerged in the context of the scientific Enlightenment To address this problem this book introduces a new vision for scientific psychology called mental behaviorism The approach is anchored to a comprehensive metapsychological framework that integrates insights from physics and cosmic evolution neuroscience the cognitive and behavioral sciences developmental and complex adaptive systems theory attachment theory phenomenology and social constructionist perspectives and is well grounded in the philosophy of science Building on more than twenty years of work in theoretical psychology and drawing on a wide range of literature Professor Henriques shows how this new approach to scientific knowledge fills in the gaps of our current understanding of psychology and can allow us to develop a more holistic and sophisticated way to understand animal and human mental behavioral patterns This work will especially appeal to students and scholars of general psychology and theoretical psychology as well as to historians and philosophers of science *Theoretical Issues in Psychology* Sacha Bem,Huib Looren de Jong,2013-05-22 Bem and de Jong present complex ideas in an accessible manner Theoretical Issues in Psychology gives undergraduate psychology students all the resources they need to begin reflecting on the most pressing conceptual issues in their discipline Stuart Wilson Queen Margaret University The 3rd edition of Theoretical Issues in Psychology provides an authoritative overview of the conceptual issues in psychology which introduces the underlying philosophies that underpin them It includes new insights across the philosophy of science combined with increased psychological coverage to show clearly how these two communities interrelate ensuring an integrative understanding of the fundamental debates and how they link to your wider studies Key features of this new edition include Concise paragraphs

multiple examples and additional summaries throughout to help you focus on key areas of knowledge Textboxes with definitions and key concepts to help your understanding of the main debates and ideas New content on the philosophy of mind philosophy of science cognition and cognitive neuroscience New up to date material on consciousness and evolutionary psychology For lecturers and teachers PowerPoint slides are available for each chapter Sacha Bem Huib Looren de Jong's textbook remains essential for students taking courses in conceptual and historical issues in psychology the philosophy of psychology or theoretical psychology

Urban Regeneration and Neoliberalism Clare Kinsella, 2020-10-29 This book explores the concept of home in Liverpool over phases of regeneration following the Second World War Using qualitative research in the oral history tradition it explores what the author conceptualises as forward facing regeneration in the period up to the 1980s and neoliberal regeneration interventions that prioritise the past from the 1980s to the present The author examines how the shift towards city centre focused redevelopment and event led initiatives has implications for the way residents make sense of their conceptualisations of home and demonstrates how the shift in regeneration focus discourse and practice away from Liverpool's neighbourhood districts and towards the city centre has produced changes in the ways that residents identify with neighbourhoods and the city centre with prominence being given to the latter Employing Pierre Bourdieu's concepts of habitus and field as mechanisms for understanding different senses of home and shifts from localised views to globalised views this book will appeal to those with interests in urban sociology regeneration geography sociology home cultures and cities

Open to the Public Jonathan D. Breul, 2017-07-05 Open to the Public grows out of concern with evaluation in the public arena and the struggle to understand how best to use the information it generates Many concepts and models of evaluation how to undertake it and how to make it more useful were developed before government performance became of so much interest to the public In fact it is arguable that recent changes in the forms shapes structures and media through which the information developed in the process of evaluation becomes public require new ways of thinking about its role in society What is the role of evaluative information in the public arena today How when and under what circumstances does the actual use of evaluative information take place and what are the forces at play By compiling and comparing international case studies this book considers forces that make the information produced in evaluations increasing open to the public They provide insights into the many factors that influence evaluation and its use in the public arena Their case studies include such current topics as spin doctoring of information by the media and this practice's relationship to evaluation studies the hotly debated issue of school performance and information about it aired in the public arena and the controversial link between budget processing and government performance This book will be invaluable to those conducting evaluations public employees and commissioners and those studying public administration
