Early Modern Philosophy Martin Lenz, Anik Waldow, 2013-05-13 Normativity has long been conceived as more properly pertaining to the domain of thought than to the domain of nature This conception goes back to Kant and still figures prominently in contemporary epistemology philosophy of mind and ethics By offering a collection of new essays by leading scholars in early modern philosophy and specialists in contemporary philosophy this volume goes beyond the point where nature and normativity came apart and challenges the well established opposition between these all too neatly separated realms It examines how the mind's embeddedness in nature can be conceived as a starting point for uncovering the links between naturally and conventionally determined standards governing an agent's epistemic and moral engagement with the world The original essays are grouped in two parts The first part focuses on specific aspects of theories of perception thought formation and judgment It gestures towards an account of normativity that regards linguistic conventions and natural

constraints as jointly setting the scene for the mind's ability to conceptualise its experiences. The second part of the book asks what the norms of desirable epistemic and moral practices are. Key to this approach is an examination of human beings as parts of nature who act as natural causes and are determined by their sensibilities and sentiments. Each part concludes with a chapter that integrates features of the historical debate into the contemporary context.

Contemporary Perspectives in Critical and Social Philosophy J. Rundell, et al, 2005-01-01 This volume is also published as volume 5 of the journal *Critical Horizons* ISSN 1440 9917 *Contemporary Perspectives in Critical and Social Philosophy* brings together a range of essays concerning ways of conceptualising modernities, subjectivities and recognition. It highlights recent developments in German critical and social philosophy and includes essays by Martin Seel, Christoph Menke, Max Pensky, Andrew Bowie and Karl Ameriks and critical discussions of the works of Manfred Frank, Theodor Adorno and Axel Honneth. These recent developments open onto dialogues between hermeneutics, post-structuralism, Critical Theory and the Budapest School represented here by Agnes Heller and Maria M. Ruck. The essays contribute to debates regarding the modern constellation between those who at first glance may be viewed as protagonists but from the perspective of greater distance share similar concerns and preoccupations.

Merleau-Ponty In Contemporary Perspectives P. Burke, J. van der Veken, 2012-12-06 Merleau-Ponty in contemporary perspective: this was the theme of the conference at the Institute of Philosophy, Katholieke Universiteit Leuven (KU Leuven) from 29 November to 1 December 1991. Thirty years after Merleau-Ponty's untimely death, it seemed appropriate to bring together scholars from Europe and from the United States of America to reappraise his philosophy. In fact, a significant body of scholarship has emerged which would seem to attest to the continuing importance of his thought for a variety of disciplines within the humanities, the social sciences and the philosophy of nature. In the present volume, Gary Brent Madison addresses the issue whether Merleau-Ponty can be considered to be a

classical philosopher The fact that his work is one of the highlights of the phenomenological tradition and is of continuing inspiration for researchers in various domains seems to justify that claim Yet it is the feeling of many of the contributors to this volume that the so called second Merleau Ponty is still not really known The unfinished state of *The Visible and the Invisible* and the cryptic condition of many of the Working Notes may be responsible for that More research should be done to uncover the unsaid of Merleau Ponty

Contemporary Perspectives on Natural Law Ana Marta González, 2016-05-13 Resorting to natural law is one way of conveying the philosophical conviction that moral norms are not merely conventional rules Accordingly the notion of natural law has a clear metaphysical dimension since it involves the recognition that human beings do not conceive themselves as sheer products of society and history And yet if natural law is to be considered the fundamental law of practical reason it must show also some intrinsic relationship to history and positive law The essays in this book examine this tension between the metaphysical and the practical and how the philosophical elaboration of natural law presents this notion as a limiting concept between metaphysics and ethics between the mutable and the immutable between is and ought and in connection with the latter even the tension between politics and eschatology as a double horizon of ethics This book contributed to by scholars from Europe and America is a major contribution to the renewed interest in natural law It provides the reader with a comprehensive overview of natural law both from a historical and a systematic point of view It ranges from the mediaeval synthesis of Aquinas through the early modern elaborations of natural law up to current discussions on the very possibility and practical relevance of natural law theory for the contemporary mind

Contemporary Perspectives on Architectural Organicism Gary Hua fan He, Skender Luarasi, 2023-06-07 This project is born out of similar questions and discussions on the topic of organicism emergent from two critical strands regarding the discourse of organic self generation one dealing with the problem of stopping in the design processes in history and the other with the organic legacy of style in the nineteenth century as a preeminent form of aesthetic ideology The epistemologies of self generation outlined by enlightenment and critical philosophy provided the model for the discursive formations of modern urban planning and architecture The form of the organism was thought to calibrate modernism s infinite extension The architectural organicism of today does not take on the language of the biological sciences as they did in the nineteenth and twentieth centuries but rather the image of complex systems be they computational informational geo ecological or even ontological aesthetic

networks What is retained from the modernity of yesterday is the ideology of endless self generation Revisiting such a topic feels relevant now in a time when the idea of endless generation is rendered more suspect than ever amid an ever increasing speed and complexity of artificial intelligence AI networks The essays collected in this book offer a variety of critiques of the modernist idea of endless growth in the fields of architecture literature philosophy and the history of science They range in scope from theoretical and speculative to analytic and critical and from studies of the history of modernity to reflections of our contemporary world Far from advocating a return to the romantic forms of nineteenth century naturphilosophie this project focuses on probing organicism for new forms of critique and emergent subjectivities in a contemporary post pandemic constellation of neo naturalism in design climate change complex systems and information networks This book will be of interest to a broad range of researchers and professionals in architecture and art history historians of science visual artists and scholars in the humanities more generally

Contemporary Perspectives on Corporate Marketing John M.T. Balmer, Laura Illia, Almudena González del Valle Brena, 2013-07-24 Corporate marketing and corporate communications are topics that have grown in scholarly and practical importance in these last decades. Fields such as branding, marketing, communications and public relations have all contributed to this boost. Whilst there is a large amount of literature on each of these disciplines, there is little systematic development from the perspective of corporate marketing and corporate communication studies, although these two have the most to contribute to how companies manage their brands, image and corporate identities in the 21st Century. This book seeks to redress this balance and provide insights via case studies or histories on issues such as nation branding, managing multiple corporate identities during merger and acquisitions and establishing a company's CSR and green image. Scholars from various disciplines within the fields of public relations, branding, marketing and corporate identity have come together in *Contemporary Perspectives on Corporate Marketing* to offer the latest approaches and studies in these areas. As such, it will become a platform for developments in the field and serve as a respected reference resource for corporate marketing and corporate communication studies.

Contemporary Perspectives On Constitutional Interpretation Susan J Brison, 2018-03-08 Current controversies over abortion, affirmative action, school prayer, hate speech and other issues have sparked considerable public debate about how the U.S. Constitution should be interpreted. Such controversies, along with the changing composition of an often deeply divided Supreme Court, have led to a resurgence of interest in theories of constitutional interpretation. This anthology, edited by Susan J Brison and Walter Sinnott-Armstrong, presents some of the most exciting and influential contemporary work in this area. Written by ten of the country's most prominent legal scholars, the selections represent a wide variety of interpretive approaches reflecting different political orientations from the far right to the far left. These theorists have drawn on a variety of other disciplines including literature, economics, history, philosophy and politics and have in turn influenced these fields. The selections were chosen for their accessibility, originality, variety and importance. Together, they provide an excellent introduction to constitutional interpretation as well as a valuable collection for experienced scholars in the field.
