Philosophy And Its History Issues In Philosophical Historiography:

Philosophy and Its History Jorge J. E. Gracia, 1992-01-01 This book is a systematic and comprehensive treatment of issues involved in philosophical historiography It deals with such topics as the relation of philosophy to its history the role of value judgments in historical accounts the value of the history of philosophy for philosophy the nature and role of texts and their interpretation in the history of philosophy historiographical method and the stages of development of philosophical progress The book defends two main theses The first is that the history of philosophy must be done philosophically that is it must include philosophical judgments The second is that one way to bring a rapprochement between Anglo American and Continental philosophy is through the study of the history of philosophy and its historiography An extensive bibliography of pertinent materials and detailed indexes close the book **Modern Challenges to Past Philosophy** Thomas D. Sullivan, Russell Pannier, 2014-02-27 Does philosophy have a timeless essence Are the writings that have come down to us over the centuries from philosophers of genius mere souvenirs from a bygone era Or are their thoughts still eminently worth examining with care Modern Challenges to Past Philosophy argues pondering past philosophy with modern problems in mind is worth the effort even though earlier works are uninformed by modern science and lack some of tools of modern analysis The great texts defamiliarize our world and offer solutions to crucial questions often forgotten as we fixate on current philosophical trends Modern Challenges is no appeal to a return to a golden past but a study designed to show how and why understanding earlier works of some of the most penetrating minds ever to ponder eternally valid questions can contribute to a renewal of our own culture **The Bloomsbury Encyclopedia of Philosophers in America** John R. The Historiographical Concept 'System of Philosophy' Leo Catana, 2008-03-31 Jacob Brucker 1696-1770 established the history of philosophy as a philosophical discipline in the 1740s In order to separate this new discipline from other historical disciplines he introduced the historiographical concept system of philosophy The historian of philosophy should use this concept as a criterion of inclusion of past philosophies and as an ideal form of exposition The present book describes the origin of this historiographical notion its implicit Protestant assumptions and it traces the concept's impact upon the methods of history of philosophy and history of ideas as developed over the following centuries Finally it discusses the concept's strengths and weaknesses as a historiographical tool arguing that it ought to be given up

Schopenhauer's Doctrine of Salvation in Relation to his Critique of Religion and Philosophical Teachings Anil Dominic Batti,2023-10-31 Arthur Schopenhauer 1788 1860 was perhaps the last polymath among the great Germanic philosophers Switching with ease and elegance between epistemic positions and fields as diverse as idealism and empiricism fideism and rationalism realism and nominalism art and religion jurisprudence and politics psychology and occultism Schopenhauer erected an imposing edifice bearing testimony to his universal learning This study is an investigation into the very conclusion of Schopenhauer s philosophy and endeavours to answer the following question did Schopenhauer s doctrine of salvation issue forth organically from his intellectual output or was it annexed to his philosophy as a result of his critical engagement with religion The labyrinthine paths through which Schopenhauer arrives at the soteriological culmination of his philosophy are subjected to critical assessment the picture that emerges is of a philosopher who seemed convinced that he had solved some of the most pressing cosmic riddles to have tormented mankind through the ages *Deus ut tentus vel visus* Thomas Jeschke,2010-12-20 In his Sentences Commentary published ca 1320 the Carmelite John Baconthorp discusses the question of whether beatitude is a reflexive act He refers to John of Paris s view in which beatitude is an act of knowing that we possess God and Durandus of St Pour ain s view that it is knowing that we know God The object of the first is God as possessed *Deus ut tentus* and the second is God as known *Deus ut visus* Taking Baconthorp s account as a starting point the present study adopts a threefold approach First it analyzes Baconthorp s text on its own terms Next it reconstructs the 13th 14th century debate on the basis of the original sources Finally it compares Baconthorp s narration with the historical positions drawing further conclusions about Baconthorp s specific methodology

Disappearing Ink Eileen O'Neill,2025-03-07 When Eileen O Neill 1953 2017 published her ground breaking essay *Disappearing Ink* Early Modern Women Philosophers and the History of Philosophy in 1998 women philosophers were virtually absent from encyclopedias of philosophy and the numerous histories and anthologies of early modern thought This essay would come to have an enormous impact signaling the beginning of the movement to introduce early modern women philosophers into the canon In its densely packed 46 pages *Disappearing Ink* presented the names major works and principal theses of literally dozens of forgotten women whose works were published during the early modern period and who had

engaged in correspondence with central male figures but whose names and works had since been erased Disappearing Ink reprints this now canonical piece together with subsequent essays some widely read some harder to locate and one on Cartesianism and the Gendered Mind written in 2013 and published here for the first time The essays in Part I develop O'Neill's views on feminist history of philosophy articulating an account of feminist historiography that is inclusive yet at the same time textually nuanced The essays in Part II provide in depth treatment of individual figures and themes These essays discuss the views of early modern women philosophers such as Mary Astell Margaret Cavendish and Mme de Lambert alongside those of Descartes Leibniz Poullain de la Barre and the Scholastics engaging with questions of mind body interaction occasional causation physical influx pan organicism and whether the Cartesian mind is gendered The sole essay in Part III departs from the historical orientation of Parts I and II This essay informed by O'Neill's deep knowledge of art history is an illuminating study of agency in representations of women in feminist erotic art of the 1980s Combined these works trace the complete arc of O'Neill's thought from painstaking studies of individual themes and figures to a sweeping vision of how feminism should inform our approach to the history of early modern thought indeed to the history of philosophy more generally More than anyone else O'Neill explained why women were excluded from the canon and showed how they could be incorporated into it

A Theory of Textuality Jorge J. E. Gracia, 1995-07-01 This book is just what it says it is A theory of textuality divided into two parts logical and epistemological

Debating Race, Ethnicity, and Latino Identity Iván Jaksic, 2015-07-07 The philosopher Jorge J E Gracia engages fifteen prominent scholars on race ethnicity nationality and Hispanic Latino identity in the United States Their discussion joins two

distinct traditions the philosophy of race begun by African Americans in the nineteenth century and the search for an understanding of identity initiated by Latin American philosophers in the sixteenth century Participants include Linda M Alcoff K Anthony Appiah Richard J Bernstein Lawrence Blum Robert Gooding Williams Eduardo Mendieta and Lucius T Outlaw Jr and their dialogue reflects the analytic Aristotelian Continental literary Marxist and pragmatic schools of thought These intellectuals start with the philosophy of Hispanics Latinos in the United States and then move to the philosophy of African Americans and Anglo Americans in the United States and the philosophy of Latin Americans in Latin America Gracia and his interlocutors debate the nature of race and ethnicity and their relation to nationality linguistic rights matters of identity and Affirmative Action binding the concepts of race and ethnicity together in ways that open new paths of inquiry Gracia s Familial Historical View of ethnic and Hispanic Latino identity operates at the center of each of these discussions providing vivid access to the philosopher s provocative arguments while adding unique depth to issues that each of us struggles to understand *Aquinas on the Metaphysics of the Hypostatic Union* Michael Gorman, 2017-06-22 This book is an insightful exploration of Aquinas s views on how Christ could be both divine and human but still only be one person

Immanent Transcendence Victor M. Salas, 2022-10-21 Long considered one of late scholasticism s most important thinkers Francisco Suarez has paradoxically enough often been treated only in relation to other medieval authors or as a transitional figure in the shift from medieval to early modern philosophy As such his thought has often been obscured and framed in terms of an alien paradigm This book seeks to correct such approaches and examines Suarez s metaphysical thinking as it stands on its own Suarez is shown to be much more in line with his medieval predecessors who developed their accounts of being to express the theological commitments they had made Central to Suarez s account is a fundamental existential orientation one that many interpreters have overlooked in favour of an understanding of being as reduced to essence or to the thinkable **The Invention of Custom** Francesca Iurlaro, 2021 This book tells the neglected story of the relationship between custom and the European natural law and ius gentium tradition It explores what cultural values and practices facilitated the emergence of custom and rendered it into as a source of the law of nations and how they did so

Kant in Context Daniel Patrick Kelly, 2023-11-03 Kant in Context The Historical Primacy of the Transcendental Dialectic examines the introduction of Kant s critical philosophy through the lens of historical contextualization Daniel Patrick Kelly argues that Kant s seismic Copernican epistemic turn must be adequately positioned and understood within the German philosophical landscape that developed in Spinoza s wake This necessary historical analysis illuminates the development and comparative strength of Kant s emergent transcendental idealism However in order to render the introduction of Kant s critical system sufficient to this historical task this book heuristically organizes the contents of the Critique of Pure Reason to highlight the work s meta philosophical historical conclusions In this revised take on Kant s Critique Kelly argues that the Transcendental Aesthetic and subsequent Transcendental Dialectic emerge as foundational in understanding Kant s Critique

as a profound historical methodological development as they justify and ground the call for his new and supporting science of cognition placing the Transcendental Analytic as inherently secondary in this heuristic reading of the Critique. The author's overarching contention is that Kant's identification of the dialectical limitations of metaphysical reasoning provides a more solid justification for Kant's transcendental idealism than that of the novel postulates of the Analytic.

Geo-epistemology

Claudio Canaparo, 2009. This book is about the formation and development of Latin America as name, idea, and concept as well as the wider concepts of location, knowledge, and the relationship between them. Latin America is not only a subject or an academic construct; it is also a perspective from which subjectivities are established, knowledge is developed, and narratives are produced. This study argues that epistemology cannot exist in abstract terms despite traditional academic arguments to the contrary. Therefore, the author uses Latin America to anchor his more general arguments in a particular location and calls this approach geo-epistemology. The author discusses how the specificity of a particular location can contribute to the establishment of both a method of formulating human knowledge and the boundaries of what can be known. The text explores the relationship between philosophy, geography, and geometry and analyses the notions of science, empire, and colonialism. In response to the contemporary debate on space and thinking, the author proposes a new concept of reversal thinking which leads to an examination of the roles of language and writing from an epistemic point of view.
