Religion Mircea Eliade,1969 Examines the study of comparative religions and certain themes common to different religious experiences and beliefs The author writes for the intelligent general reader in the hope of developing an awareness of the place of the history of religion in secularized society Begotten, Not Made: Explorations in the Philosophy and Sociology of Religious Translation Rossa O. Muireartaigh,2015-01-08 Begotten Not Made explores the philosophy and sociology of religious translation The book ranges over a wide array of philosophers including Cassirer Beneviste Wittgenstein Ayer Quine Davidson Derrida Lyotard Eco and i ek and divides the main historical currents in the philosophy of translation into word centric proposition centric and sign centric paradigms The sign centric paradigm which argues that translation is a social act emergent from the innate interpretive plurality of any given text is put forward as the one with the least anomalies Taking a sign centric approach Begotten Not Made asserts that translators always read texts in a non ritual way which means that translators unlike other users and readers of religious texts are in a unique position to discover new originally lost meanings in ancient scripture and to bring these alive again in new social and historical settings Actual examples of D T Suzuki s Zen writings the King James Bible and Christianity in Japan are presented as exemplifications of the core philosophical and sociological points being made in this book
