Philosophy Ideology And Social Science Essays In Negation And Affirmation:

Philosophy, Ideology and Social Science István Mészáros, 1986 **Ideology and False Consciousness** Christopher L. Pines, 1993-07-01 In this book Christopher Pines demonstrates that Karl Marx conceived of ideology as false consciousness. He shows how the different meanings of false consciousness found in the writings of Marx and Engels reflect the influence of the views of the Baconian French Enlightenment and of Hegelian Feuerbachian philosophies. Pines argues that for Marx the diverse senses of false consciousness all generally denote a social consciousness that takes certain false things to be true regarding matters of significance to class divided societies *Social Structure and Forms of Consciousness, Volume 2* István Mészáros, 2011-03-01 In *The Dialectic of Structure and History Volume Two of Social Structure and Forms of Consciousness* István Mészáros brings the comprehension of our condition and the possibility of emancipatory social action beyond the highest point reached to date. Building on the indicatory flashes of conceptual lightning in the *Grundrisse* and other works of Karl Marx, Mészáros sets out the relations of structure and agency, individual and society, base and superstructure, nature and history in a dialectical totality open to the future. The project is brought to its conclusion by means of critique, an analysis that shows not only the inadequacies of the thought critiqued but at the same time their social historical cause. The crucial questions are addressed through critique of the highest point of honest and brilliant thought in capitalism's ascending phase: that of Adam Smith, Kant and Hegel, as well as the irrationalities and dishonesty of the apologists of the capitalist system's descending phase, such as Hayek and Popper. The dead ends of both Lévi-Strauss's structuralism and postmodernism arising from their denial of history are placed in their context as capitalist apologetics. What Mészáros, the leading Marxist philosopher of our times, has achieved is of world historical importance. He has cleared the philosophical ground to permit the illumination of a path to transcend the destructive death spiral of the capitalist system **The Work of Sartre** István Mészáros, 2012-07 This landmark book, first published in 1979, met acclaim as a doubly important work of radical philosophy. Its subject, Jean Paul Sartre, was among the twentieth century's most controversial and influential philosophers; its author, István Mészáros, was himself establishing a reputation for profound contributions to the Marxian tradition which would continue into the next century. *The Work of Sartre* was thus considered essential for its insights on Sartre and as a piece of Mészáros's developing politico-philosophical project. In this completely updated and expanded volume, Mészáros examines the manifold aspects of Sartre's legacy as novelist, playwright, philosopher, and political actor, and in so doing casts light upon the entire oeuvre, situating it within the historical and social context of Sartre's time. Although critical of aspects of Sartre's philosophy, Mészáros celebrates his unyielding commitment to the struggle against the power of capital and elucidates what this means for the individual in their search for freedom **Marxism at Work** Robert Stuart, 2002-05-02 This book examines the socialists who introduced Marxism to France in the decades before the First World War **Karl Marx's Realist Critique of Capitalism** Paul Raekstad, 2022-10-13 This book offers the first realist reconstruction of Marx's critique of capitalism. Reading Marx

through a realist lens enables us to make sense of the connections between 1 Marx's positive concept of freedom rooted in a theory of human development 2 his understanding of alienation as diagnosing capitalist unfreedom and 3 his conceptions of democracy and socialism respectively as the cures for this unfreedom Along the way it discusses and responds to some of Marx's most insightful critics such as Max Weber and Friedrich Hayek This clarifies Marx's ideas for a new generation of political thinkers explains the challenge they pose to contemporary debates about freedom democracy and future economic institutions and demonstrates that these ideas remain both defensible and compelling Media Capitalism Thomas Klikauer,2022-01-01 This book argues that media and capitalism no longer exist as separated entities and posits three reasons why one can no longer exist without the other Firstly mass media have become indispensable to capitalism due to the media's ability to sell the commodities of mass consumerism Media capitalism also creates pro capital attitudes among a target population and establishes an ideological hegemony Thirdly media capitalism provides mass deception to hide the pathologies of capitalism which include mass poverty rising inequalities and the acceleration of global warming To illuminate this the book's historical chapter traces the emergence of media capitalism Its subsequent chapters show how media capitalism has infiltrated the public sphere society schools universities the world of work and finally democracy The book concludes by outlining how societies can transition from media capitalism to a post media capitalist society Imagining India Ronald Inden,2000 This edition contains a new introduction *Philosophy Of Leisure* Tom Winniffrith,Cyril Barrett,2016-02-09 *Marx in the Anthropocene* Kohei Saito,2023-05-11 The book reveals unknown aspects of Marx's vision of post capitalism that is adequate to the Anthropocene **The Political Economy of Human Rights Enforcement I.** Manokha,2008-05-30 This book examines humanitarian interventions in the post Cold War era in the context of the development of global capitalism It argues that it is often our duty to use force to uphold human rights but that attempts to promote and protect these rights can unintentionally contribute to the perpetuation of poverty and poverty related problems

Western Conceptions of the Individual Brian Morris,2024-11-01 This is a comprehensive study of the varying conceptions of the human subject in the Western intellectual tradition Although informed by an anthropological perspective the author draws on material from all the major intellectual disciplines that have contributed to this tradition and offers biographical and theoretical vignettes of all the major Western scholars By scrutinizing the classical texts of the Western tradition he succeeds in delineating the differing conceptions of the human individual which emerge from these writings and gives a guide to the most important ideas in Western cultural traditions Internationalizing the Internet Byung-Keun Kim,2005-01-01 This compelling book focuses on the global formation of the Internet system It contests the common belief that the Internet's adoption was inevitable and instead examines the social and economic processes that allowed it to prevail over competing standards and methods for achieving a global information infrastructure Researchers and academics involved with science and technology policy industrial and corporate change and the information society will welcome this insightful

original and highly pertinent book It will also be of value for anyone with an interest in how the backbone of the digital economy was formed

BOOK JACKET Twenty-first-century capital Aleksander Buzgalin, Andrey Kolganov, 2021-11-30 How would Marx have understood twenty first century capitalism For Buzgalin and Kolganov the answer lies in a theoretical investigation of how and why the fundamental elements of capitalism commodities money and capital have changed since the publication of Marx's Capital more than 150 years ago Introducing the concepts of social creativity markets for simulacra and virtual fictitious capital Buzgalin and Kolganov offer a recovery and development of Marx's understanding of social transformations Twenty first century capitalism not only demonstrates Marxism's relevance to the core economic questions of our time and its superiority over neoclassical economics but it leads English language readers into the undiscovered country of Soviet and post Soviet critical Marxism How might modern Marxism respond to the contemporary challenges of the commodification of knowledge and information And can it arrive at something resembling a Capital for the twenty first century This accessible and comprehensive account is essential reading for those wanting to understand the problems of the modern economy

Mass Education, Global Capital, and the World T. Griffiths, R. Imre, 2013-12-18 By presenting a series of intricate analyses of educational phenomena through the theoretical lenses offered by Immanuel Wallerstein and István Mészáros the book engages readers and helps them to critically analyze their own participation in the global economy as citizens policy makers and academics or teachers

Capitalists and Conquerors Peter McLaren, 2005-04-07 Capitalists and Conquerors is a series of path breaking essays in the political sociology of education on topics hotly debated within the educational community In this volume Peter McLaren addresses some of the most daunting political challenges of the current times including the globalization of capitalism the United States drive towards world domination strategies tactics and models of resistance to neoliberalism and the ravages of empire building the role of the educator as a social agent and public citizen the purposes and possibilities of public schooling and the struggle for socialism As a Marxist humanist philosopher and social theorist McLaren is able to offer new philosophical premises and socialist principles for building an alternative to capitalism The passion poetry and fierce political conviction for which McLaren is known is very much present in this volume

Crisis and Commonwealth Charles Reitz, 2013-08-29 Crisis and Commonwealth Marcuse Marx McLaren advances Marcuse scholarship by presenting four hitherto untranslated and unpublished manuscripts by Herbert Marcuse from the Frankfurt University Archive on themes of economic value theory socialism and humanism Contributors to this edited collection notably Peter Marcuse Henry Giroux Peter McLaren Zvi Tauber Arnold L Farr and editor Charles Reitz are deeply engaged with the foundational theories of Marcuse and Marx with regard to a future of freedom equality and justice Douglas Dowd furnishes the critical historical context with regard to U S foreign and domestic policy particularly its features of economic imperialism and militarism Reitz draws these elements together to show that the writings by Herbert Marcuse and these formidable authors can ably assist a global movement toward intercultural commonwealth The collection extends the

critical theories of Marcuse and Marx to an analysis of the intensifying inequalities symptomatic of our current economic distress. It presents a collection of essays by radical scholars working in the public interest to develop a critical analysis of recent global economic dislocations. Reitz presents a new foundation for emancipatory practice, a labor theory of ethics and commonwealth, and the collection breaks new ground by constructing a critical theory of wealth and work. A central focus is building a new critical vision for labor, including academic labor. Lessons are drawn to inform transformative political action as well as the practice of a critical multicultural pedagogy supporting a new manifesto for radical educators contributed by Peter McLaren. The collection is intended especially to appeal to contemporary interests of college students and teachers in several interrelated social science disciplines: sociology, social problems, economics, ethics, business ethics, labor, education, history, political philosophy, multicultural education, and critical pedagogy.
