*Philosophy in Economics* Joseph C. Pitt, 2012-12-06 The essays in this volume are the result of a workshop held at Virginia Polytechnic Institute and State University in April 1979 The assembled group was diverse comprised of philosophers economists and statisticians But it was not the complete group on which we had initially planned Richard Rudner was in France on sabbatical and was unable to fly back for the occasion His untimely death the following summer saddened us all for we lost not just a colleague but a friend This book is dedicated to him out of the spirit of friendship and in appreciation for the ground breaking work he did in the philosophy of the social sciences In addition to the participants a number of people worked very hard to make our gathering possible We are especially indebted to Dean Henry Bauer Dean Ernie Stout and Dean John Ballweg of the College of Arts and Sciences at Virginia Tech for their good will and support both moral and substantive We would also like to thank Professor Guy Hammond Head Department of Philosophy and Religion for his council and assistance Our special thanks to Jeanne Keister and Betty Davis for their patience with unending typing and reservations and finally to Barbara Kersey always at hand ever helpful Without them nothing would have transpired

*Nuclear Physics* W. R. Shea, 1983-08-31 and less as the emanation underwent radioactive decay and it became motionless after about 30 seconds Since this process was occurring very rapidly Hahn and Sackur marked the position of the pointer on a scale with pencil marks As a timing device they used a metronome that beat out intervals of approximately 1.3 seconds This simple method enabled them to determine that the half life of the emanations of actinium and emanium were the same Although Giesel's measurements had been more precise than Debierne's the name of actinium was retained since Debierne had made the discovery first Hahn now returned to his sample of barium chloride He soon conjectured that the radium enriched preparations must harbor another radioactive substance The liquids resulting from fractional crystallization which were supposed to contain radium only produced two kinds of emanation One was the long lived emanation of radium the other had a short life similar to the emanation produced by thorium Hahn tried to separate this substance by adding some iron to the solutions that should have been free of radium but to no avail Later the reason for his failure became apparent The element that emitted the thorium emanation was constantly replenished by the element believed to be radium Hahn succeeded in enriching a preparation until it was more than 100 000 times as intensive in its radiation as the same quantity of thorium

*Philosophy in Economics* Joseph C. Pitt, 1981      **Leibniz's Metaphysics of Nature** N. Rescher, 2012-12-06 The essays included in this volume are a mixture of old and new Three of them make their first appearance in print on this occasion Nos III IV and V The remaining four are based upon materials previously published in learned journals or anthologies However these previously published papers have been revised and generally expanded for inclusion here Detailed acknowledgement of prior publications is made in the notes to the relevant articles I am grateful to the editors of

these several publications for their kind permission to use this material I am grateful to an anonymous reader for the Western Ontario Series for some useful corrigenda And I should like to thank John Horty and Lily Knezevich for their help in seeing this material through the press

NICHOLAS RESCHER Pittsburgh Pennsylvania May 1980 xi INTRODUCTION The unifying theme of these essays is their concern with Leibniz's metaphysics of nature In particular they revolve about his cosmology of creation and his conception of the real world as one among infinitely many equipossible alternatives

**Change and Progress in Modern Science** Joseph C. Pitt, 2012-12-06 The papers presented here derive from the 4th International Conference on History and Philosophy of Science held in Blacksburg Virginia U S A November 26 1982 The Conference was sponsored by the International Union of History and Philosophy of Science and Virginia Polytechnic Institute and State University Virginia Tech Particular thanks go to L Jonathan Cohen Secretary of the Union as well as to Dean Henry Bauer of the College of Arts Sciences Wilfred Jewkes and the Center for Programs in the Humanities Arthur Donovan and the Center for the Study of Science in Society and the Department of Philosophy and Religion at Virginia Tech Not only did they come through with the necessary funds but they were all always ready with a helping hand when things got confusing Two additional groups of individuals require a special note of thanks First considerable appreciation is due the members of the Joint Commission of the International Union of History and Philosophy of Science Maurice Crosland Risto Hilpinen and Vladimir Kirsanov They were more than generous in their advice and cooperation The Local Organizing Committee Kenneth Alpern Roger Ariew Arthur Donovan Larry Laudan Ann La Berge Duncan Porter Eleonore Stump and Dennis Welch not only demonstrated efficiency and insured a pleasant stay for all participants but also went out of their way on numerous occasions to make everyone feel at home

*IFS* W.L. Harper, G.A. Pearce, R. Stalnaker, 1980-12-31 With publication of the present volume The University of Western Ontario Series in Philosophy of Science enters its second phase The first fourteen volumes in the Series were produced under the managing editorship of Professor James J Leach with the cooperation of a local editorial board Many of these volumes resulted from colloquia and workshops held in connection with the University of Western Ontario Graduate Programme in Philosophy of Science Throughout its seven year history the Series has been devoted to publication of high quality work in philosophy of science considered in its widest extent including work in philosophy of the special sciences and history of the conceptual development of science In future this general editorial emphasis will be maintained and hopefully broadened to include important works by scholars working outside the local context Appointment of a new managing editor together with an expanded editorial board brings with it the hope of an enlarged international presence for the Series Serving the publication needs of those working in the various subfields within philosophy of science is a many faceted operation Thus in future the Series will continue to produce edited proceedings of worthwhile scholarly meetings and edited collections of seminal background papers However the publication priorities will shift emphasis to favour production of monographs in the various fields covered by the scope of the Series

Likeness to Truth G. Oddie,2012-12-06 The concept of likeness to truth like that of truth itself is fundamental to a realist conception of inquiry To demonstrate this we need only make two rather modest aim of an inquiry as an inquiry is realist assumptions the truth doctrine that the the truth of some matter and the progress doctrine that one false theory may realise this aim better than another Together these yield the conclusion that a false theory may be more truthlike or closer to the truth than another It is the aim of this book to give a rigorous philosophical analysis of the concept of likeness to truth and to examine the consequences some of them no doubt surprising to those who have been unduly impressed by the admittedly important true false dichotomy Truthlikeness is not only a requirement of a particular philosophical outlook it is as deeply embedded in common sense as the concept of truth Everyone seems to be capable of grading various propositions in different hypothetical situations according to their closeness to the truth in those situations And if my experience is anything to go by there is remarkable unanimity on these pretheoretical judge ments This is not proof that there is a single coherent concept underlying these judgements The whole point of engaging in philosophical analysis is to make this claim plausible      **The**
