Lecture Notes: Introduction to Philosophy

Definition of Philosophy

- Philosophy is the study of fundamental questions about existence, knowledge, values, reason, and more.
- It seeks to understand the nature of reality, the meaning of life, and the principles that govern human thought and behavior.
- Philosophy explores concepts such as truth, morality, beauty, and justice, and examines different perspectives and arguments on these topics.

Components of Philosophy

1. Metaphysics:

- Metaphysics deals with the nature of reality and the fundamental questions about existence. It explores concepts such as the nature of being, time, space, causality, and the relationship between mind and body.

Metaphysics is a branch of philosophy that explores fundamental questions about the nature of reality, existence, and the relationship between mind and matter. Here are a few examples of metaphysical concepts and questions:

1. **Substance Dualism:** This is the belief that the mind and body are two distinct substances. It raises questions about the nature of consciousness and the relationship between the physical and non-physical aspects of human existence.
2. **Determinism vs. Free Will:** This debate centers around whether human actions are predetermined by external factors or if individuals have the ability to make choices freely. It explores the nature of causality and the extent of human agency.
3. **Ontology:** Ontology is the study of being and existence. It examines questions such as: What is the nature of reality? What are the fundamental categories of existence? Are there abstract entities that exist independently of our perception?
4. **Time and Space:** Metaphysics also delves into the nature of time and space. Questions arise about the nature of time (is it linear or cyclical?) and the nature of space (is it absolute or relative?).

A Theologian's Guide to Heidegger Hue Woodson, 2019-08-30 *A Theologian's Guide to Heidegger* provides a uniquely theological introduction to the philosophy of Martin Heidegger by focusing on not just the relationship between Heidegger and theology or even the nature of the discourse that must occur between theological concerns and Heidegger's philosophical errands but by precisely exploring how theology can use Heidegger's philosophy as a means of outlining the scope and task of postmodern theology To do this especially with the postmodern theologian in mind this book considers the general relationship between Heidegger and theology how Heidegger can be read theologically while justifying why Heidegger must be read this way and defining the role that Heidegger must take in postmodern theology This includes a careful consideration of Heidegger's early theological roots from Freiburg to Marburg by examining the content of Heidegger's lesser known theologically minded seminars lectures and talks

A History of Hegelianism in Golden Age Denmark, Tome I Jon Stewart, 2024-02-19 This is the first of a three volume work dedicated to exploring the influence of G W F Hegel's philosophical thinking in Golden Age Denmark The work demonstrates that the largely overlooked tradition of Danish Hegelianism played a profound and indeed constitutive role in many spheres of Golden Age culture This initial tome covers the period from the beginning of the Hegel reception in the Danish Kingdom in the 1820s until the end of 1836 The dominant figure from this period is the poet and critic Johan Ludvig Heiberg who attended Hegel's lectures in Berlin in 1824 and then launched a campaign to popularize Hegel's philosophy among his fellow countrymen Using his journal *Kjøbenhavn's flyvende Post* as a platform Heiberg published numerous articles containing ideas that he had borrowed from Hegel Several readers felt provoked by Heiberg's Hegelianism and wrote critical responses to him many of which appeared in *Kjøbenhavnsposten* the rival of Heiberg's journal Through these debates Hegel's philosophy became an important part of Danish cultural life

Henri Bergson's Creative Evolution 100 Years Later Michael Kolkman, Michael Vaughan, 2010-09-01 This special issue of *SubStance* 2007 celebrates the centennial of Henri Bergson's *Creative Evolution* published in 1907 Since evolution is a living process and not a completed history any understanding of it must necessarily be open ended If no one can have the last word Bergson writes the project of understanding evolution will only be built up by the collective and progressive effort of many thinkers of many observers also completing correcting and improving one another Included in the issue are articles from Bergson scholars from the United States Japan France and Great Britain Topics in the issue range from Bergson's encounters with Darwin Nietzsche Derrida and Deleuze and from the analytical to the metaphysical

Max Horkheimer and the Foundations of the Frankfurt School John Abromeit, 2011-10-10 This book is the first comprehensive intellectual biography of Max Horkheimer during the early and middle phases of his life 1895-1941 Drawing on unexamined new sources John Abromeit describes the critical details of Horkheimer's intellectual development This study recovers and reconstructs the model of early Critical Theory that guided the work of the Institute for Social Research in the 1930s Horkheimer is

remembered primarily as the co author of *Dialectic of Enlightenment* which he wrote with Theodor W Adorno in the early 1940s But few people realize that Horkheimer and Adorno did not begin working together seriously until the late 1930s or that the model of Critical Theory developed by Horkheimer and Erich Fromm in the late 1920s and early 1930s differs in crucial ways from *Dialectic of Enlightenment* Abromeit highlights the ways in which Horkheimer s early Critical Theory remains relevant to contemporary theoretical discussions in a wide variety of fields

The History of Beyng Martin Heidegger,2015-11-02 This updated translation showcases what is a central and often overlooked text in Heidegger s oeuvre and essential to understanding his later work *Phenomenological Reviews* The History of Beyng belongs to a series of Martin Heidegger s reflections from the 1930s that concern how to think about being not merely as a series of occurrences but as essentially historical or fundamentally as an event It builds directly on an earlier work in the series *Contributions to Philosophy Of the Event* and provides a pathway to the later text *Mindfulness* Together these texts are important for their meditations on the oblivion and abandonment of being politics and race and for their incisive critique of power force and violence Originally published in 1998 this English translation opens new avenues for understanding the trajectory of Heidegger s thinking during this crucial time
