Philosophy Of History With Reflections And Aphorisms:

The Philosophy of History John William Miller, 1983-02-17 The Philosophy of History with Reflections and Aphorisms consists of essays and some notes written by John William Miller between 1943 and 1974 Criticizing all attempts to interpret history on premises not themselves historical Miller holds that to view history philosophically is to consider it as a constitutional mode of experience a way of organization no less fundamental than physics or logic **Confrontations:**

Steiner, 2023-09-27 This book strongly challenges the Western philosophical tradition's assertion that humans are superior to nonhuman animals It makes a case for the full and direct moral status of nonhuman animals The book provides the basis for a radical critique of the entire trajectory of animal studies over the past fifteen years The key idea explored is that of felt kinship a sense of shared fate with and obligations to all sentient life It will help to inspire some deep rethinking on the part of leading exponents of animal studies The book's strong outlook is expressed through an appeal for radical humility on the side of humans rather than a constant reference to the human animal divide Historical figures examined in depth include Aristotle Seneca and Kant contemporary figures examined include Christine Korsgaard and Martha Nussbaum This book presents an account according to which the tradition has not proceeded on the basis of impartial motivations at all but instead has made a set of pointedly self-serving assumptions about the proper criteria for assessing moral worth Readers of this book will gain exposure to a wide variety of thinkers in the Western philosophical tradition historical as well as contemporary This book is suitable for professionals working in nonhuman animal studies students advanced undergraduates and practitioners working in the fields of philosophy environmental studies law literature anthropology and related fields

Three American Hegels Ryan J. Johnson, 2024-09-03 Three American Hegels explores Georg Wilhelm Friedrich Hegel's influence on three seminal yet overlooked philosophers Henry C. Brokmeyer Horace Williams and John William Miller Each of them was in his own way both an apprentice of Hegel and a true American original Brokmeyer the backwoods translator of Hegel Williams the mentor of Southern Hegelianism Williams the Hegelian teacher of democracy Until now their influence on the one school of philosophy that is distinctly grounded in the U.S. experience pragmatism has been overlooked along with the intellectual history of how their contributions developed Such neglect has resulted in an underestimation of the role that the theories of Hegel played in the development of American philosophy To unearth these formative yet forgotten works and influences Johnson explores their respective untapped archives and unearths a three-generation story of a Hegel that is

thoroughly practical concrete and alive *Commonplace Commitments* Peter S. Fosl, Michael J. McGandy, Mark D. Moorman, 2016-09-30 Joseph P. Fell proposes that the solution to the problem of nihilism is found in the common experience of persons and the everyday commitments that one makes to people, practices and institutions. In his landmark 1979 book *Heidegger and Sartre* and in his subsequent essays, Fell describes a quiet but radical reform in the philosophical tradition that speaks to perennial dilemmas of thought and pressing issues for action. Since Descartes at least, we have been puzzled as to what we can know, how we should act, and what we should value. The skeptical influence of modern dualism, distilled in the mind-body problem, arose with the assertion "I think, therefore I am," which has shot through not just philosophy and psychology but also society, politics and culture. With dualism arose radical subjectivism and the concomitant problems of nihilism and alienation. The broad aim of phenomenology is to repair the rupture of self and world. Announced by Edmund Husserl and developed by Jean-Paul Sartre, Martin Heidegger and John William Miller, who drew from the North American tradition, this is the project to which Fell has devoted more than a half century of reflection and technical elaboration. In this volume, an array of scholars consider, criticize and cultivate Fell's key contributions to the phenomenological project. Ranging from analyses of key texts in Fell's phenomenology to probing examinations of his crucial philosophical presuppositions to the prospects for Fell's call to find the solution to nihilism in everyday experience, these essays gather the work of the authors thinking with and through Fell's key works on Sartre, Heidegger and Miller. Also included are seminal statements from Fell on his pedagogical practice and his conception of philosophy.

"The Time Is Fulfilled" Lynne Moss Bahr, 2018-12-27 In this study, Lynne Moss Bahr explores the concept of temporality as central to Jesus's proclamation of the Kingdom of God. Using insights from continental philosophy on the messianic, which expose the false claim that time progresses in a linear continuum, Bahr presents these philosophical positions in critical dialogue with the sayings of Jesus regarding time and time's fulfillment. She shows how the Kingdom represents the possibilities of a disruption in time, one that reveals the intrinsic relation between God and humanity. In illustrating how Jesus's sayings regarding time are thus expressions of his messianic identity as of the world and not of the world, Bahr argues that the meaning of Jesus's identity as Messiah is embedded in the disjuncture of time in the impossibility of now from which the Kingdom comes. Bahr's use of critical theory in this study expands the concept of God's Kingdom beyond the traditional confines of the discipline.

Diagrams of Power in Benjamin and Foucault Mark Laurence Jackson, 2022-09-04 This book's overarching premise is that discussion and critique in the discourses of architecture and urbanism have their primary focus on engagements with form, particularly in the sense of the question as to what planning and architecture signify with respect to the forms they take and how their meanings or content, what is contained, is considered in relation to form as container. While significant critical work in these disciplines has been published over the past 20 years that engages pertinently with the writings of Walter Benjamin and Michel Foucault, there has been no address to the coincidence in the work of Benjamin and Foucault of an architectural figure that is pivotal to

each of their discussions of the emergence of modernity The arcade for Benjamin and the panoptic prison for Foucault have a parallel role In Foucault's terms panopticism is a diagram of power The parallel for Benjamin would be his understanding of constellation In more recent architectural writings the notion of the diagram has emerged as a key motif Yet and in as much as it supposedly relates to aspects of the work of Foucault along with Gilles Deleuze this notion of diagram amounts for the most part to a thinly veiled reinstatement of geometry as idea This book redresses the emphasis given to form within the cultural philosophy of modernity and particularly with respect to architecture and urbanism inflects on the agency of force that opens a reading of their productive capacities as technologies of power It is relevant to students and scholars in poststructuralist critical theory architecture and urban studies This is a book about Foucault and Benjamin and it is grounded in a deep knowledge of and reflection upon their works but it is also underpinned by an impressive erudition There are reflections on Hegel and Heidegger central to the author and Derrida along with Kierkegaard and others This leads to a rich and suggestive discussion in staging a spatial architectural political conversation between Foucault and Benjamin

Anonymous Reviewer Mark Jackson's *Diagrams of Power in Benjamin and Foucault: The Recluse of Architecture* juxtaposes and interrogates its two leading actors so as to draw from and through them a theory of architecture which is inseparable from its recluse In doing so it elaborates a series of complex connections with their various interlocutors and inspirations Hegel Heidegger Derrida the Kabbalah Agamben allegory Marx Deleuze Klossowski tragedy capitalism modernity and so on The list is long and impressive This is not only done with an extremely high degree of scholarship but is presented in a light lucid and very compelling manner in a voice both personal and authoritative The recluse is the figure of mimesis itself the appearance of a withdrawal always already a ruin This book not only contributes a highly astute reading of its philosophical objects but it enacts the ontology of the recluse through its own unfolding simultaneously revealing and withholding the meaning of architecture as such so that we not only understand its meaning but feel the pulsing differential of the book's object as if it were alive within us

Stephen Zepke Independent Researcher Vienna [The Right to Resist](#) Mario Wenning, Thomas Byrne, 2023-01-12

While the idea of total revolution seems anachronistic today there is increasing consensus about the importance of new forms of political ethical and aesthetic resistance In the past resistance was often motivated as a form of protest against specific institutions Increasingly dissent has become integrated into the fabric of modern life This volume addresses new forms of resistance at a level that combines a rootedness in the philosophical tradition and a sensitivity to rethinking the possibility of emancipation in today's age The work focuses on contemporary social and political philosophy from a perspective informed by critical theory The text specifically addresses three challenges

- 1 Critical theorists need to investigate in which ways resistance conformism and oppression oppose and constitute each other
- 2 The relationship between the theory and the practice of resistance needs to be posed anew given recent protest movements and media of protest
- 3 It needs to be shown in which ways different areas of society such as the arts religion and social

media establish divergent practices of resistance The chapters are written by scholars from Asia Europe and North America These experts in resistance discourse focus on practices of dissent ranging from traditional forms of civil disobedience to more recent practices such as guerrilla protest art and resistance in digital networks including social media What unites them is a shared concern for the dimensions of political acts of resistance in an age that is characterized by a tendency to integrate and thereby neutralize those very acts

A Political Theology for the US-Mexico Borderlands Bryan M. Ellrod, 2025-03-13 Since 1994 over 4 000 human remains have been recovered from the Sonoran Desert Victims of a border enforcement strategy that weaponizes the landscape against migrants the ever growing ledger of the dead counts the human cost at which the present political paradigm is secured Through a series of readings of biblical texts informed by philosophical theological and legal theory this book facilitates a reckoning between the self determining polity and the excluded outsider s ethical demand Finding in their demand the motivation for novel forms of legal interpretation and political agency Ellrod sketches a hopeful life affirming alternative to Realist Political Theologies of Migration

Race and the Politics of the Exception Utz McKnight, 2013-07-04 The traditional assumption today about race is that it is not political that it has no political content and is a matter of individual beliefs and attitudes In *Race and the Politics of the Exception* Utz McKnight argues that race is in

fact political and defines how it functions as a politics in the United States McKnight organizes his book into three sections beginning with a theoretical section about racial politics in the United States Using theorists such as Benjamin Agamben and Schmitt McKnight discusses how the idea of racial communities went from being constituted through the idea of racial sovereignty and a politics of the exception that defined blacks as the internal enemy to being constitutionally defined through the institutions of racial equal opportunity In the second section McKnight further develops his critical race theory by exploring in more detail the social use of race today The election of President Obama has brought the politics of racial equality to a critical point In spite of a very powerful set of political tools to define it as a thing of the past race matters In the final section McKnight engages with important African American fiction from each of the three major periods of racial politics in the US Earlier descriptions of political theory are used throughout these analyses to refine the argument for a new critical politics of race Scholars of political theory identity politics African American studies and American Studies will find this work ground breaking and relevant

Analogical City Cameron McEwan, 2024-01-18 In *Analogical City* Cameron McEwan argues for architecture's status as a critical project McEwan revisits architect Aldo Rossi as a paradigmatic figure of the critical rational tradition studying a neglected aspect of his thought the analogical city to excavate its potential McEwan develops a grammar of the analogical city under the headings of Imagination Transformation City Multitude and Project McEwan argues that the analogical city is critical collective and emancipatory Analogical thought and understanding cities as analogical might open the conditions of possibility for rethinking the critical project in architecture At a time when the humanities and the sciences are threatened by irrational thought from climate denial to post truth narratives and when architecture has seemingly disavowed its critical capacity and political possibility through its commodification as an instrument of the neoliberal city McEwan offers critical strategies conceptual tools figures of thought and knowledge practices to articulate modes of thinking and acting differently within architectural criticism and practice Today knowledge is a common terrain of struggle and thought requires constant reinvention The task of architecture and critique more broadly must be to interpret the world in order to change it Consequently *Analogical City* proposes modes for imagining the city the subject and the world otherwise towards a more egalitarian and critical architecture of the city Ultimately the analogical city is not a fully developed theory nor is it only an intuitive poetic or purely formal practice as some critics propose McEwan argues that the analogical city is poetic and political it always refers beyond itself towards a collective and critical project of the city and yet it invites a series of formal spatial and graphic operations comprising erasure and negativity followed by substitution and remontage

The Haitian Revolution Eduardo Grüner, 2019-11-19 It is impossible to understand capitalism without analyzing slavery an institution that tied together three world regions Europe the Americas and Africa The exploitation of slave labor led to a form of proto globalization in which violence was indispensable to the production of wealth Against the background of this expanding circulation of capital and slave labor the first revolution in Latin America took

place the Haitian Revolution which began in 1791 and culminated with Haiti's declaration of independence in 1804. Taking the Haitian Revolution as a paradigmatic case, Grner shows that modernity is not a linear evolution from the center to the periphery but rather a co-production developed in the context of highly unequal power relations where extreme forms of conquest and exploitation were an indispensable part of capital accumulation. He also shows that the Haitian Revolution opened up a path to a different kind of modernity or counter modernity, a path along which Latin America and the Caribbean have traveled ever since. A key work of critical theory from a Latin American perspective, this book will be of great interest to students and scholars of critical and cultural theory and of Latin America as well as anyone concerned with the global impact of capitalism, colonialism and race.

Assured Self, Restive Self Prasanta Chakravarty, 2023-07-30 The book explores the encounter of the self with situations of crisis from diverse disciplinary and cultural perspectives from antiquity to contemporary times. A crisis is at once a historically situated phenomenon and a recurring idea of endangerment or a breakdown in creaturely living. By making our choices stark and difficult, crisis opens up the possibility for genuinely fresh and unexpected beginnings. At the most fundamental level, crisis is the disintegration of relationality among creatures. In fact, crisis is a battle of attrition with and within selfhood. It has the potential to turn into a norm in everyday interaction. It then stops being an exception and becomes the very condition of our living. Through the rubrics of the assured and the restive, the volume addresses how selfhood encounters and negotiates concentric circles of crisis in life and literature. Does the idea of crisis allow us to formulate the idea of self in a particular way? How do certain sources and resources within the self—stoic or heroic, political and creative—come into being during crisis? While some essays delve into questions of repose and sensuality by highlighting specific cases and trajectories from the subcontinent, others deal with questions of mythology, politics and art in a wider sense. One essay directly addresses the core literary question of the uncanny and its relation to selfhood. While specific concerns illuminate each essay, the volume speaks with a collective global sense of crisis that faces humanity now and tentatively offers some prospects to deal with it.

Critical Social Theory Craig Browne, 2016-02-14 In this accomplished, sophisticated and up-to-date account of the state of critical social theory today, Craig Browne explores the key concepts in critical theory like critique, ideology and alienation and crucially goes on to relate them to major contemporary developments such as globalization, social conflict and neo-liberal capitalism. Critical theory here is not solely the work of Adorno, Horkheimer, Marcuse and Habermas. The book begins with the Frankfurt School but uses this as a base to then explore more contemporary figures such as Nancy, Fraser, Axel Honneth, Luc Boltanski, Cornelius Castoriadis, Ulrich Beck, Anthony Giddens, Pierre Bourdieu, Hannah Arendt. A survey of critical social theory for our times, this is an essential guide for students wishing to grasp a critical understanding of social theory in the modern world.

Paradox, Aphorism and Desire in Novalis and Derrida Clare Kennedy, 2008 Building on recent investigations into affinities between early German Romanticism and French post-structuralism, this study brings together the work of Jacques Derrida with the writings of one of early

Romanticisms most important theorists Friedrich von Hardenberg 1772 1801 better known as Novalis In contrast to recent criticism which traces the historical path from Romanticism to modern theory in broad strokes this book undertakes comparative readings of Novalis and Derridas texts on literature and philosophy The book focuses on the significance both writers accord to paradox and argues that readings which are attuned to paradox can better appreciate the proximity of Romanticism and post structuralism As well as their affirmation of paradox the texts of Novalis and Derrida testify to a profound respect for the Other and the close readings of selected texts reveal remarkable similarities in their thinking on literature philosophy and representation and on the intricate interrelation between language identity and desire **Political**

Theology Saul Newman, 2018-12-18 God is dead but his presence lives on in politics This is the problem of political theology the way that theological ideas find their way into secular political institutions particularly the sovereign state In this intellectual tour de force leading political theorist Saul Newman shows how political theology arose alongside secularism and relates to the problem of legitimising power and authority in modernity It is not about the power of religion so much as about the religion of power Examining the current crisis of the liberal order he argues that recent phenomena such as the rise of populism the renewed demand for strong national sovereignty and the return of religious fundamentalism may be understood through this paradigm He illustrates his argument through an exploration of themes such as sovereignty democracy economics technology ecological catastrophe messianism and the future of radical politics engaging with thinkers ranging from Schmitt and Hobbes to Stirner Foucault and Agamben This book will be a crucial text for all students scholars and general readers interested in the meaning and significance of political theology for political theory **Discordant**

Democracy: Noise, Affect, Populism, and the Presidential Campaign Justin Patch, 2019-01-15 Discordant Democracy Noise Affect Populism and the Presidential Campaign paints a portrait of the political experience at a pivotal time in American political and social history The modern political campaign is aestheticized and assimilated into mass culture divorced from fact and policy and nakedly tethered to emotional appeal Through a multi modal comparative examination of the sonic and emotional cultures of the 2008 and 2016 campaigns Justin Patch raises critical queries about our affective relationship to modern politics and the impact of emotional campaigning on democracy Discordant Democracy asks how do campaign sounds affect us what role do we the electorate play in creating and sustaining these sounds and affects and what actions do they generate Theories from anthropology cognitive science sound studies and philosophy are engaged to grapple with these questions and connect bombastic mass mediated political events campaign media and individual sonic experience The analyses complicate notions of top down campaigning political spin and enthusiastic millennial populism by examining our role in producing and animating political sounds through conversation applause laughter media and music
